

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
ODDO BHF Global Target 2028

Legal entity identifier:
969500XPDH1A64WTNM31

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: N/A**

In economic activities that qualify as environmentally sustainable under the EU Taxonomy

In economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective: N/A**

It promoted **Environmental/Social characteristics (E/S)** and while it did not have as its objective a sustainable investment, it had a proportion of 23.40% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments.**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not establish a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

TO WHAT EXTENT WERE THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS PROMOTED BY THIS FINANCIAL PRODUCT MET?

Sustainability indicators measure how the environmental and social characteristics promoted by the product were attained.

During the period covered by this report, the Fund complied with its environmental and social characteristics via the following action:

- Application of the ODDO BHF Asset Management exclusion policy (coal, UNGC list, unconventional oil and gas, controversial weapons, tobacco, loss of biodiversity, and the production of fossil fuels in the Arctic) as well as other Fund-specific exclusions.
- Consideration of ESG ratings as described in the Fund prospectus (investment strategy) and ESG data from external providers.
- Application of the Fund Manager’s voting policy if the Fund meets its requirements.
- Dialogue and engagement in line with the Fund Manager’s dialogue and engagement policy.
- Consideration of principal adverse impacts (PAIs) in accordance with the Fund Manager’s policy regarding Article 4 of the SFDR.
- Application of the Fund Manager’s approach to the “do no significant harm” principle for investments considered to be sustainable.

This Fund’s consideration of PAIs is based on negative screening for three PAIs (7, 10 and 14), and on ESG ratings, dialogue, engagement and voting for the other PAIs, as described in the PAI policy that is available in the regulatory information section of the ODDO BHF Asset Management website.

● *How did the sustainability indicators perform?*

	29/12/2023	
	Fund	Hedging
Internal ESG rating*	3.1	93.7
Average E rating	3.0	93.7
Average S rating	2.9	93.7
Average G rating	3.2	93.7
Weighted carbon intensity (tCO ₂ e/€m revenue)	175.3	100.0
Sustainable investments (%)	23.4	87.7
Taxonomy-aligned investments (%)	N/A	N/A
Fossil fuel exposure (%)**	3.3	3.5
Carbon solutions exposure, green share (%)***	20.0	21.2

* 1 is the rating with the highest risk and 5 is the best rating.

** Percentage of revenue generated from the use of fossil fuels, based on the MSCI coverage ratio at portfolio level.

*** Percentage of revenue generated by the use of zero carbon solutions (renewable energy, sustainable transport, etc.), based on the MSCI coverage ratio at portfolio level.

● ... and compared to previous periods?

	30/12/2022	
	Fund	Hedging
Internal ESG rating*	3.5	95.2
Average E rating	2.8	95.2
Average S rating	3.0	95.2
Average G rating	3.0	95.2
Weighted carbon intensity (tCO ₂ e/€m revenue)	268.4	48.5
Sustainable investments (%)	15.7	85.5
Taxonomy-aligned investments (%)	0.0	0.0
Fossil fuel exposure (%)**	1.2	1.6
Carbon solutions exposure, green share (%)***	15.4	21.7

* 1 is the rating with the highest risk and 5 is the best rating.

** Percentage of revenue generated from the use of fossil fuels, based on the MSCI coverage ratio at portfolio level.

*** Percentage of revenue generated by the use of zero carbon solutions (renewable energy, sustainable transport, etc.), based on the MSCI coverage ratio at portfolio level.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investments contribute to such objectives?**

The sustainable investments pursued the following goals:

1. EU Taxonomy: contribution to climate change adaptation and mitigation, and to the other four environmental objectives of the EU Taxonomy. This contribution is measured by the sum of Taxonomy-aligned revenue for each of the portfolio's investments, according to its weighting and based on data published by investee companies. MSCI research may be used in the absence of data published by investee companies.
2. Environment: contribution to the environmental impact as defined by MSCI ESG Research, and its "sustainability impact" field in relation to environmental objectives. The following categories are concerned: alternative energy, energy efficiency, eco-construction, sustainable water, pollution prevention and control, sustainable farming.

The Fund held 23.4% sustainable investments and 0.0% Taxonomy-aligned investments at the end of the financial year (the Taxonomy objective was introduced on 1 January 2023).

The Fund respected its sustainable investment objective by a commitment to hold at least 2.0% of sustainable investments and 0.0% of Taxonomy-aligned investments.

The investments were sustainable in that they contributed to the development of green business activities based on revenue: low-carbon energy, energy efficiency, eco-construction, sustainable use of water, pollution prevention and control, and sustainable farming. Although these economic activities are covered by the EU Taxonomy, a lack of data prevents us from demonstrating their Taxonomy-alignment. These investments are therefore classed as sustainable in the "Other environmental" category.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This principle, as applied to the Fund’s sustainable investment objective, was checked through a 3-stage approach:

1. Companies subject to serious environmental, social or governance controversies are not considered to be sustainable.
2. Companies covered by the ODDO BHF Asset Management exclusion policy (anti-personnel mines, cluster bombs, chemical weapons and biological weapons) are not considered to be sustainable and may not be invested in by the Fund.
3. Companies exposed to controversial weapons and/or breaching the principles of the UN Global Compact are not considered to be sustainable and may not be invested in by the Fund.

Our monitoring teams are tasked with checking that the Fund’s sustainable investments follow our approach on the do no significant harm principle and may therefore be considered sustainable investments at Fund level. Our approach is based on controversies as well as (pre-trade) exclusions.

How have the indicators for adverse impacts on sustainability factors been taken into account?

We consider all PAIs provided that we have enough data on them. This Fund’s consideration of PAIs is based on negative screening for three PAIs (7, 10 and 14), and on ESG ratings, dialogue, engagement and voting for the other PAIs, as described in the PAI policy that is available in the regulatory information section of the ODDO BHF Asset Management website.

Their consideration is based on exclusion lists (coal, UNGC list, unconventional oil and gas, controversial weapons, tobacco, loss of biodiversity, and the production of fossil fuels in the Arctic), and the use of ESG ratings, dialogue, voting and engagement. They may result from published data or, to a lesser extent, estimates.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Detailed description:

Although the Fund does not have sustainable investment as its objective, 23.4% of its investments were sustainable, whereas the minimum proportion indicated in the pre-contractual appendix was 2.0%.

The Fund Manager ensures that the Fund’s sustainable investments are aligned by applying its exclusion list based on the UN Global Compact (UNGC), as indicated in the Fund Manager’s exclusion policy. The UN Guiding Principles on Business and Human Rights and the OECD Guidelines for Multinational Enterprises are considered in the internal or external ESG rating methodology (MSCI ESG Research) used by the Fund, as indicated in the pre-contractual disclosures.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The other underlying investments do not take into account EU criteria on environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

HOW DID THIS FINANCIAL PRODUCT CONSIDER PRINCIPAL ADVERSE IMPACTS ON SUSTAINABILITY FACTORS?

The financial product considered principal adverse impacts through exclusions based on pre-trade and post-trade checks, dialogue, engagement and ESG analyses.

This Fund’s consideration of Principal Adverse Impacts is based on negative screening for three PAIs (biodiversity, breaches of the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, and exposure to controversial weapons (anti-personnel mines, cluster bombs, chemical weapons and biological weapons)) and on ESG ratings, dialogue, engagement and voting for the other PAIs, as described in the PAI policy that is available in the regulatory information section of the ODDO BHF Asset Management website.

PAI	29/12/2023	Hedging
1. Scope 1 GHG emissions	31,739.2	36.4%
1. Scope 2 GHG emissions	5,514.3	36.4%
1. Scope 3 GHG emissions	179,394.8	36.4%
2. Total GHG emissions	210,105.8	36.4%
3. Carbon footprint	797.9	36.4%
4. GHG intensity of investee companies	1,368.3	46.4%
5. Share of investments in companies active in the fossil fuel sector	0.0	47.4%
6. Share of non-renewable energy consumption and production	0.8	27.8%
7. Energy consumption intensity per high impact climate sector	3.7	13.4%
8. Activities negatively affecting biodiversity-sensitive areas	0.0	47.4%
9. Emissions to water	0.0	0.0%
10. Hazardous waste and radioactive waste ratio	3.5	15.0%
11. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.0	47.0%
12. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	0.2	47.4%
13. Unadjusted gender pay gap	0.1	8.1%
14. Board gender diversity	0.3	47.0%
15. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.0	47.4%

WHAT WERE THE TOP INVESTMENTS OF THIS FINANCIAL PRODUCT?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period: 01/01/2023 - 29/12/2023

Largest investments	Sector*	% of assets**	Country
Teva Pharmaceutical Finance Ne 3.75% 05/2027	Consumer staples	3.3%	Netherlands
Lorca Telecom Bondco 4.00% 09/2027	Communications	2.1%	Spain
Iliad Holding Sas 5.63% 10/2028	Communications	1.9%	France
Cirsa Finance International Sa 10.38% 11/2027	Consumer discretionary	1.7%	Luxembourg
Parts Europe Sa E3M 07/2027	Consumer discretionary	1.7%	France
Telecom Italia Spa 6.88% 02/2028	Communications	1.6%	Italy
Rossini Sarl E3M 10/2025	Consumer staples	1.5%	Luxembourg
Iliad Holding Sas 5.13% 10/2026	Communications	1.4%	France
Iho Verwaltungs Gmbh 8.75% 05/2028	Consumer discretionary	1.3%	Germany
Cheplapharm Arzneimittel 4.38% 01/2028	Consumer staples	1.3%	Germany
Faurecia Sa 7.25% 06/2026	Consumer discretionary	1.2%	France
Ford Motor Credit Co Llc 4.54% 03/2025	Consumer discretionary	1.2%	United States
Grubhub Inc 4.13% 05/2028	Consumer staples	1.2%	Germany
Verisure Midholding Ab 9.25% 10/2027	Consumer discretionary	1.1%	Sweden
Picard Groupe Sas E3M 07/2026	Consumer staples	1.1%	Luxembourg

* At 29/12/2023, the Fund's total exposure to fossil fuels was 3.3% with coverage of 3.5%.

**Calculation method: Average of investments based on four inventories covering the reference financial year (interval used: 3-month rolling.)

WHAT WAS THE SHARE OF SUSTAINABILITY-RELATED INVESTMENTS?

The breakdown can be viewed in the itemised table below.

● What was the asset allocation?

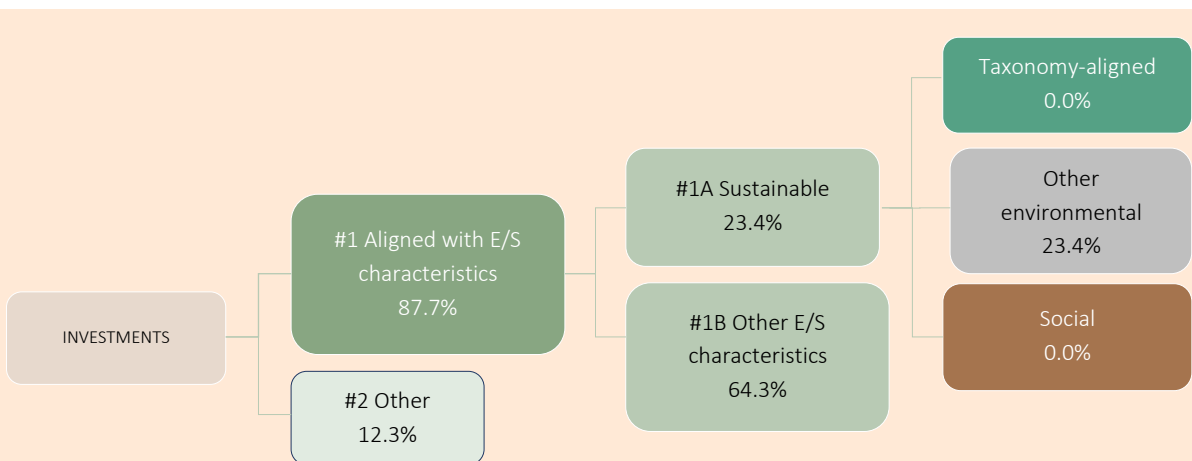

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

– **turnover** reflecting the share of revenue from green activities of investee companies.

– **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

#1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives;
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#2 Other include 5.6% cash, 0.0% derivatives and 6.7% investments that are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

● In which economic sectors were the investments made?

Sector*	% of assets at 29/12/2023
Consumer discretionary	31.4%
Communications	21.1%
Consumer staples	17.6%
Capital goods	7.2%
Basic industry	5.2%
Technology	3.1%
Non-guaranteed gov. entity	2.6%
Transport	2.2%
Electricity	1.6%
Energy	1.2%
Banks	0.8%
Other industrials	0.4%
Cash	5.6%

*At 29/12/2023, the Fund's total exposure to fossil fuels was 3.3% with coverage of 3.5%.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Based on data from investee companies and the Fund Manager’s data provider (MSCI), Taxonomy-aligned investments amounted to 0.0% at the end of the financial year if we include sovereign, supranational and central bank bonds, and 0.0% if we exclude these securities.

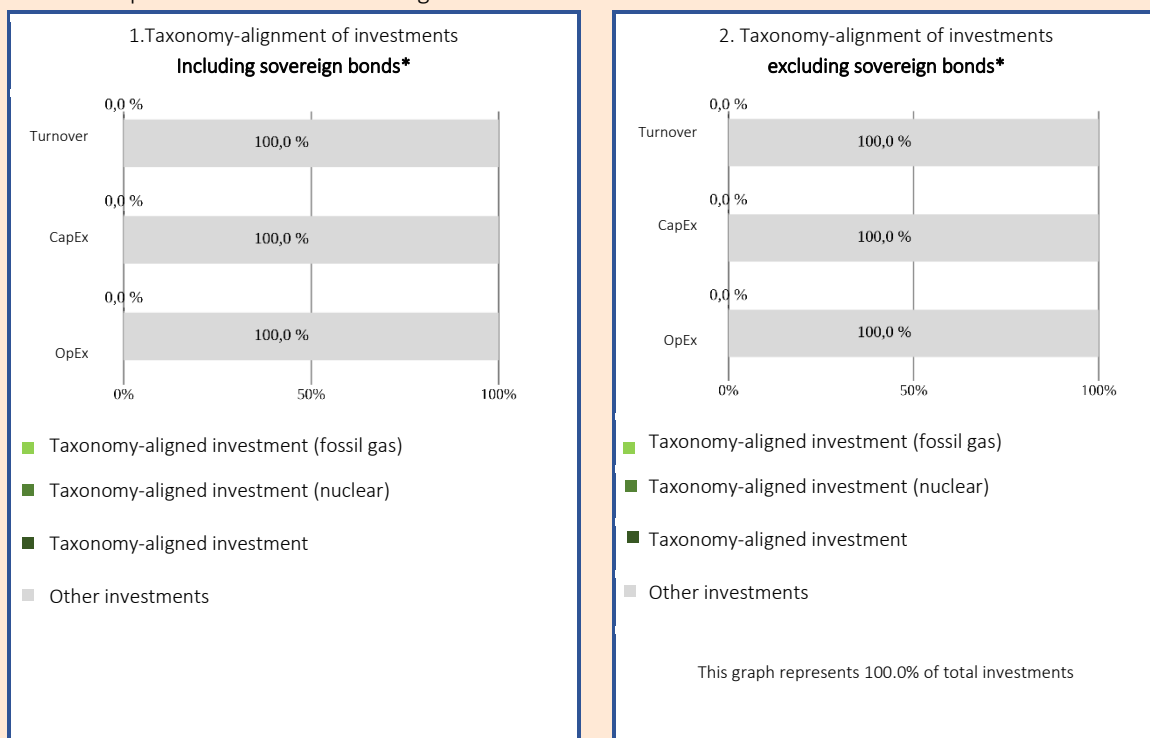

These investments’ compliance with the requirements of Article 3 of Regulation (EU) 2020/852 was not checked by any auditor or third party.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

- Yes
- In fossil gas
- In nuclear
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** includes limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows Taxonomy-alignment solely in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, “sovereign bonds” consist of all sovereign exposures.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The share of investments made in transitional and enabling activities was 0%.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was: 23.4%.

What was the share of socially sustainable investments?

There were no socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included in “#2 Other” are cash, derivatives and other secondary assets used to ensure optimal management of the portfolio.

The minimum safeguards for investments without an ESG rating are maintained by applying the ODDO BHF Asset Management exclusion policy and/or Fund-specific exclusions.

Given the role of these derivatives, we consider that they had no adverse impact on the Fund’s ability to pursue its environmental and social characteristics.

WHAT ACTIONS WERE TAKEN TO MEET THE ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS DURING THE REFERENCE PERIOD?

The Fund Manager applied its active shareholder strategy in the following ways:

1. Vote at annual general meetings if the Fund meets the requirements of the Fund Manager’s voting policy.
2. Dialogue with companies.
3. Engagement with companies in line with the Fund Manager’s engagement policy.
4. Application of the ODDO BHF Asset Management exclusion policy as well as other Fund-specific exclusions.
5. Consideration of PAIs in accordance with the Fund Manager’s PAI policy.

Are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Please refer to the table below for an overview of performance.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How did the reference benchmark differ from a broad market index?***

The Fund tracks the BofAML E HY NF FI&FL Rate HY Constrained benchmark.

This is a broad market index whose composition and method of calculation do not necessarily reflect the ESG characteristics promoted by the Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

The reference benchmarks are not aligned with the environmental or social characteristics promoted by the Fund, so may contain companies excluded by the Fund Manager. Also, these reference benchmarks are not drawn up on the basis of environmental or social factors.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Please refer to the table below for an overview of performance.
