

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## UBS (Lux) Money Market Fund - EUR, class P-acc (ISIN: LU0006344922), EUR

a sub-fund of UBS (Lux) Money Market Fund

This sub-fund is managed by UBS Asset Management (Europe) S.A. (the Fund Management Company).

### Objectives and investment policy

The actively managed sub-fund is a standard VNAV money market fund within the meaning of the EU Money Market Fund Regulation and invests exclusively in diversified, high-quality money market instruments with first-class borrower credit ratings. The weighted average maturity of the securities held in the portfolio may not exceed 6 months, while the final maturity of a fixed-income investment may not exceed 1 year. The sub-fund is suitable for investors who wish to invest in a portfolio that generates long-term performance and is in line with the prevailing money market indices. This sub-fund promotes environmental and/or social characteristics but does not pursue a sustainable investment objective.

In constructing the portfolio, the investment manager focuses on capital preservation and liquidity combined with generating attractive returns while maintaining a conservative risk profile.

The actively managed sub-fund uses the benchmark FTSE EUR 3M Eurodeposits as a reference for performance comparison. In times of high market volatility, the performance of the subfund can deviate significantly from the benchmark.

The return of the fund depends primarily on the development of interest rates and creditworthiness of the issuers as well as the interest income

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

Income of this share class is reinvested.

The sub-fund may enter into securities lending transactions.

### Risk and reward profile

#### More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

#### Why is the fund in this category?

- The fund is classed as category 1 because the volatility of its share price is typically low, as a result of which both the risk of loss and potential gains are low. The fund invests in money market instruments and may therefore be subject to volatility. This requires corresponding risk tolerance and capacity. The value of a unit may fall below the purchase price. Changes in interest rates have an effect on the value of the portfolio.

#### Further material risks

- High grade investment instruments are usually subject to a low credit risk (i.e. potential loss due to failure of issuer).
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	3.00%
Exit charge	0.00%
Conversion fee	3.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges	0.53%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

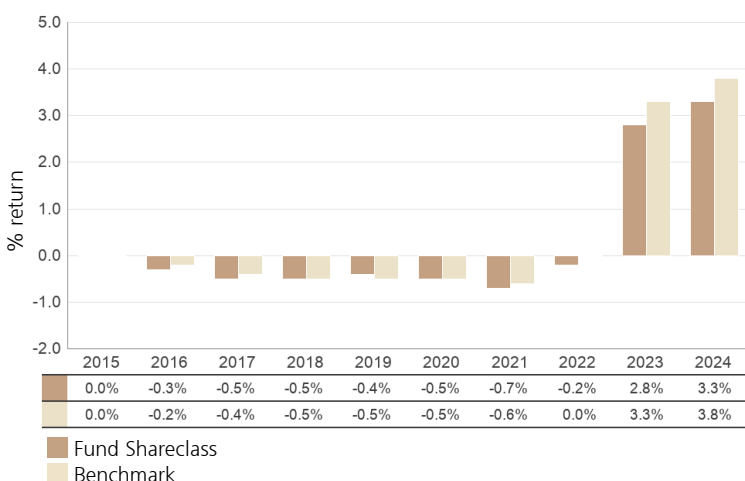

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Securities lending related costs and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at [www.ubs.com/funds](http://www.ubs.com/funds).

## Past performance

### Historical performance is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage change in the fund's net asset value from the end of one year to the end of the next. In general, the calculation of past performance takes account of all costs but not the issuing commission. If the fund is managed against a benchmark, its return is also shown.

The class was launched in 1989.

The past performance is calculated in EUR.

Where shown, the benchmark is a reference point to which the performance of a share class can be compared. The subfund does not intend to replicate the benchmark.

For share classes with "hedged" in their name, currency-hedged versions of the benchmark (or equivalent) may be used where available.

## Practical information

### Depository

UBS Europe SE, Luxembourg Branch
