SPACs: less than 5%

money market instruments: up to 30%

distressed securities: up to 10%

The fund may also invest in other subordinated financial debt and preference shares.

Investment Process: In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to flexibly allocate investments across asset classes and geographic areas. The investment manager aims to identify investment opportunities that will benefit from varying inflationary regimes such as deflation, disinflation, stagflation and inflation that result from changes over time in global economic and social environments. Examples of such investments may include, but are not limited to, sectors and regions that are able to defend against economic and inflation shocks, currencies that may benefit from different inflation regimes, and companies whose business model benefits from shifting inflation.

The Investment Manager takes into account Sustainability Risks in its investment process.

For more information see "Sustainable Investing Policy and ESG integration".

Derivatives and Techniques: The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on equities, credit, interest rates and currency). The fund may use long or short positions.

Base Currency: USD.

Benchmark: None.

Risk Management Method: Absolute VaR, limited to 20%. Expected gross leverage: 450% (may be higher or lower but not expected to exceed 750%).

Distribution: As this is a non-distributing share class, dividends are re-invested.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment.

The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 4 because, in accordance with the investment policy, the value of the investments may fluctuate moderately. Consequently, both the expected return and the potential risk of loss may be average.

Additional risks: credit, leverage, emerging markets, interest rate.

Recommended holding period: This product may appeal to investors who plan to hold their investment for a recommended holding period of at least 3 years.
