These may include Sharia-compliant bonds. The Fund can invest across any sector and credit quality. The Fund may also invest in money market instruments.

Investment Process

In actively managing the Fund, the Investment Manager uses a combination of market and issuer analysis to build a diversified portfolio of securities it believes offer the best risk-adjusted returns relative to the benchmark. The Fund's management approach uses strict risk controls. The Investment Manager considers ESG factors a core element of its strategy by adopting a best in class approach which seeks to invest in securities of issuers with low sustainability risks while avoiding those with high sustainability risks, subject to good governance practices. Activities that adversely affect society or the environment are also avoided. There may be engagement with companies to positively influence ESG practices. For further information, please refer to our exclusion framework in the Responsible Investment policy*, SFDR product category Article 8. The performance of the Fund is likely to be significantly different from that of the benchmark, because the Investment Manager has significant discretion to deviate from its securities and weightings.

The Share Class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Fund's investments and strategy. The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time. The lowest category does not mean a risk-free investment. The Fund offers no capital guarantee or asset protection measures.

The Fund may be exposed to the following risks which are not adequately captured by the synthetic risk indicator and may negatively impact its value:

- **Investments in Mainland China** may be subject to capital restrictions and trading quotas (e.g. QFII and RQFII regimes). The Fund may encounter difficulties or delays in enforcing its rights in the event of disputes.
- **Counterparty risk:** losses occur when a counterparty does not honour its obligations related to contracts such as over-the-counter derivatives.
- **Credit risk:** sudden losses may occur when issuers of debt securities default on their payment obligations.
- **Investments in emerging markets** are generally more sensitive to risk events, such as changes in the economic, political, fiscal and legal environment, as well as fraud.
- **Financial Derivatives risk:** the leverage resulting from derivatives amplifies losses in certain market conditions.
- **Liquidity risk:** markets with low volumes result in difficulties valuing and/or trading some assets.
- **Operational risk:** losses resulting from human errors, system failures, incorrect valuation and safekeeping of assets.
- **Sukuk investments** may lead to losses because of the lack of uniform regulatory standards and weak legal frameworks for settling disputes and defaults, among other risks.
- **Sustainability risk:** ESG related risk events or conditions could cause a material negative impact on the value of the investment if they were to occur.
