What is this product?

Type

This investment product is a sub-fund of Kempen International Funds SICAV, a Luxembourg based investment company.

Term

The product has no maturity date. The product manufacturer is not entitled to terminate the product unilaterally.

Objective

Kempen (Lux) Sustainable European Small-cap Fund aims to achieve for investors long-term capital growth.

This product invests in equity shares of companies listed on the European stock exchanges. Van Lanschot Kempen Investment Management NV selects the investment funds and manages the portfolio, with the aim of achieving a higher return in the long-term than the MSCI Europe Small Cap Index .

This product is actively managed and may hold investments that are not included in the benchmark. The investment manager is allowed to deviate significantly from the benchmark.

The product falls under the scope of article 8 of the SFDR which means that the product promotes environmental and/or social characteristics. While it does not have as its objective a sustainable investment, it will have a minimum proportion of sustainable investments. The product considers principal adverse impacts on sustainability factors.

For this aim shares will be selected of smaller listed European companies, while at the same time complying with strict exclusion and sustainability criteria. These are defined as companies with a maximum market capitalisation at the time of initial purchase of either EUR 5 billion, or the highest market capitalisation of any company included in the MSCI Europe Small Cap Index , whichever is the greater. The portfolio construction process involves a disciplined end to end framework initially utilizing proprietary in-house stock filters screening for high quality and attractively valued stocks. Thereafter, fundamental in-house research is carried out to identify high conviction investment

ideas. The end result is a portfolio of 30-50 stocks, well-diversified across all regions and sectors.

Financial derivative instruments such as options, warrants and futures may be used for hedging purposes and for efficient portfolio management.

The investment return is determined by the dividend received and the change in value of the shares of the companies in which it invests. The (changes in the) expectations regarding economic growth, the growth in specific market sectors and the success and growth of the specific companies have an impact on the return. If these investments are traded in a currency other than the Euro, then changes in exchange rates also affect the return. In addition, the return is influenced by the changes that are made to the portfolio. The product's costs lower the return.

The return will be calculated daily in EUR based on the value of the portfolio.

In the view of the long-term objective and because investments in equity shares can also yield a negative return, it is recommended to hold an investment in this product at least 5 years.

The shares of this product can normally be bought or sold on any business day in Luxembourg.

This product does not distribute dividend, but will reinvest the income it receives.

Intended retail investor

This product can only be purchased by institutional investors, e.g. for retail investors in the context of discretionary asset management.

This product is aimed at investors who consider short-term capital preservation and long-term capital growth important, while accepting a negative return in a bad investment year.

Investing in this product is appropriate for both the novice investor with at least some knowledge of the financial market and investment products as well as the advanced investor.

This product is aimed at investors who can invest a minimum of EUR 50 000 and want to be able to subscribe or redeem daily.

This investment is intended as a supplement to a well-diversified portfolio.

Information for investors

The depositary is BNP Paribas, Luxembourg Branch.

More information can be found on the website www.vanlanschotkempen.com/investment-management. Here you will find the English prospectus. In it you will find, among other things, the description of the investment strategy and objectives of the product. On this website you will also find the latest annual report and any subsequent half-yearly report in English and the articles of incorporation. These documents are also available free of charge at the office of Van Lanschot Kempen Investment Management NV.

The net asset value will be published daily on the website.

This product is a sub-fund of Kempen International Funds SICAV. The information about this product is therefore included in the prospectus and the (semi-)annual reports of Kempen International Funds SICAV.

The assets and liabilities of each sub-fund are segregated by law.

The conversion of this product to another product (different sub-fund of Kempen International Funds SICAV) can be done via a redemption and subscription order. The conditions for this are described in the prospectus and can be found on the website.

Other share classes may also be available for this product. Information on these share classes is available in the prospectus under the relevant Appendix and on the website.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level.

Recommended holding period: 5 years
Example Investment: 10 000 EUR

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment		
Stress	What you might get back after costs	1 910 EUR	1 510 EUR
	Average return each year	- 80.87 %	- 31.5 %
Unfavourable	What you might get back after costs	7 660 EUR	8 580 EUR
	Average return each year	- 23.42 %	- 3.01 %
Moderate	What you might get back after costs	10 230 EUR	12 570 EUR
	Average return each year	2.34 %	4.68 %
Favourable	What you might get back after costs	15 880 EUR	15 300 EUR
	Average return each year	58.85 %	8.87 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Due to effects of unusual market conditions, other risks could be triggered. Please see the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Unfavourable: This type of scenario occurred between April 2015 and March 2020.

Moderate: This type of scenario occurred between March 2018 and February 2023.

Favourable: This type of scenario occurred between November 2016 and October 2021.

What happens if Van Lanschot Kempen Investment Management NV is unable to pay out?

The product's assets are held separately from Van Lanschot Kempen Investment Management NV and safeguarded by a depositary. The depositary, BNP Paribas, Luxembourg Branch, is required to keep the product's assets separate from its own assets in accordance with applicable laws and regulations. It is therefore unlikely that the financial position or potential default of Van Lanschot Kempen

Investment Management NV or of the depositary, would affect the pay-out of the product's assets.

Should a financial loss occur due to the default of Van Lanschot Kempen Investment Management NV or the depositary, then this is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

– In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

– EUR 10 000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	100 EUR	641 EUR
Annual cost impact (*)	1 %	1.05 % each year

(*) "This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the

recommended holding period your average return per year is projected to be 5.72% before costs and 4.68% after costs."

Composition of Cost

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	No entry fee will be charged for this product. There may be an upward swing factor of 0.40% applicable if there are more buyers than sellers on the day you purchase this product. This swing factor may be changed due to market circumstances up to a maximum of 5.00%.	0 EUR
Exit costs	No exit fee will be charged for this product. There may be a downward swing factor of 0.20% applicable if there are more sellers than buyers on the day you sell this product. This swing factor may be changed due to market circumstances up to a maximum of 5.00%.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.91% of the value of your investment per year. This is an estimate based on actual costs over the last year.	92 EUR
Transaction costs	0.08% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	8 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

Given the nature of the underlying investments of the product and its objective in the long-term, a minimum holding period of 5 years is recommended.

Buy and sell orders for this product can be placed on any business day in Luxembourg.

How can I complain?
