WHAT IS THIS PRODUCT?

Type: This product is a share class (C) of a sub-fund (Europe Equities) of an investment company with variable capital (SICAV) under Luxembourg law (Cleome Index), Undertakings for Collective Investment in Transferable Securities (UCITS).

Term: Open-ended.

Objectives:

Principal assets traded:

Shares of companies whose registered offices and/or principal activities are in Europe.

Investment strategy:

The fund seeks to achieve capital growth by investing in the principal assets traded.

The management team endeavours to replicate the performance of the benchmark by selecting a range of assets using a mathematical model.

The replication is mainly achieved by investing in transferable securities (physical replication).

The objective is therefore to reproduce the benchmark (passive management):

- through its key characteristics although this does not require total replication,
- with a limited ex-post tracking error.

The fund promotes, among other characteristics, environmental and/or social characteristics but does not have sustainable investment as its objective. Environmental, social and governance (ESG) criteria contribute to the asset manager's decision-making but are not a decisive factor in this decision-making. For more information, please see the management company's website and/or the prospectus.

The fund may make use of derivative products for both investment and hedging purposes (to protect against future unfavourable financial events).

Benchmark: MSCI Europe Index (Net Return).

The index measures the performance of the large and mid capitalisation equity segment across developed markets in Europe.

Repayment of shares: On demand, every day, at Luxembourg.

Allocation of income: Reinvestment.

Intended retail investor:

This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience who are looking for Capital Growth. This product can be used as a core holding or a component of a diversified portfolio for investments with an investment horizon of 6 years. Investors should understand the product risks and only invest if they can bear potentially substantial losses.

General information:

Depository bank: CACEIS Bank, Luxembourg Branch.

Other information:

This document provides a description of a share class of a sub-fund of Cleome Index. The prospectus and periodical reports are established for all the sub-funds. There are other share classes and these are listed in the prospectus.

Investors may apply for the conversion of their shares into shares of another class of the same sub-fund or into shares of a class of another sub-fund of the fund, based on the eligibility criteria and following the procedures available through their financial intermediary.

The sub-fund is only liable for the debts, liabilities and obligations that can be charged to it.

Additional information about the fund can be found in the prospectus and the periodical reports, which may be obtained free of charge on request from Candriam or viewed at any time on the website www.candriam.com. These documents are available in one of the languages approved by the local authority of each country where the fund is authorised to market its shares or in a common language in the international finance sphere. All other practical information, in particular the latest share price, is available from the places shown above.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The risk indicator assumes you keep the product for 6 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity to pay you.

Other risk(s) materially relevant not included in the summary risk indicator: Index replication. Sustainability.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your adviser or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and/or a suitable benchmark over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 01/2022 and 01/2024.

Moderate: This type of scenario occurred for an investment between 11/2013 and 10/2019.

Favourable: This type of scenario occurred for an investment between 02/2016 and 01/2022.

WHAT HAPPENS IF CANDRIAM IS UNABLE TO PAY OUT?

As the Funds' assets are held with the depositary, they are not part of the assets of Candriam in case of bankruptcy and cannot be seized by the creditors of Candriam. Nevertheless, investors run the risk to suffer a financial loss in case of the default of Candriam.

In case of default of the depositary, the risk of a financial loss is mitigated to some extent as the Fund's assets are legally segregated from the assets of the depositary.

The potential financial loss associated with the default of Candriam is not covered by an investor compensation or guarantee scheme.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

	If you exit after 1 year	If you exit after 6 years
Total costs	371 EUR	1 272 EUR
Annual cost impact (*)	3.7%	1.6% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.3% before costs and 4.7% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

If the fund is part of another product, such as an insurance product, the costs shown here do not include any additional costs you may incur.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: **6 years**

The choice of recommended holding period depends on the types of the underlying investments and on the associated degree of risk, which may be higher or lower. For example "equity" type products (higher risk) generally have a recommended holding period of six years (long term), and "bonds or money market" type products (lower risk) have a shorter recommended holding period (generally between two and four years for bond products or less than one year for money market products - medium term/short term). "Mixed" type products generally have a recommended holding period of between three and five years depending on the weighting of the types of underlyings. "Alternative" type products generally have a recommended holding period of three years.

Investors may request redemption of their units at any time under the conditions set out in "What will this investment cost me? ". The shorter the holding period in relation to the recommended period, the greater the potential impact of any charges on the performance profile.
