What is this product?

Product type Accumulation shares (shares in which any income and capital growth are retained in the share price) of a sub-fund of a SICAV, a regulated open-ended fund with segregated liability between its sub-funds.

Investment objective and policy

Objective(s) To increase the value of your investment over the medium to long term.

Benchmark(s) The sub-fund is not managed in reference to an index.

Investment policy Under normal conditions, the sub-fund mainly invests in shares of companies in emerging and frontier markets.

The sub-fund may use derivatives for reducing risks (hedging) and costs, but not to seek investment gains.

Strategy In actively managing the sub-fund, the management company selects several investment managers to which it assigns a portion of assets. Each investment manager determines the desired mix of countries, issuers and types of securities.

ESG approach The investment manager may, or may not, consider environmental, social and governance (ESG) factors when assessing investment risks and opportunities, and may invest in securities or issuers that have a low ESG profile.

SFDR category Article 6.

Planning your investment

Product availability The sub-fund is available to professional investors and retail investors with basic financial knowledge.

Investor profile The sub-fund may appeal to investors who understand the risks of the sub-fund and:

- are looking for a growth-oriented investment
- are interested in exposure to emerging equity markets, either for a core investment or for diversification purposes
- have a high risk profile and can tolerate significant losses.

Processing requests Requests to buy, sell (redeem) and exchange (when allowed) shares of the sub-fund are processed every Luxembourg business day.

Terms to understand

derivatives Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

emerging markets Markets of less economically developed nations, such as some nations in Asia, Africa, Eastern Europe and Latin America. Within emerging markets, frontier markets are those particularly small, new or under-developed.

SFDR article 6 Under the EU directive on sustainable finance disclosure, a financial product that does not promote environmental or social characteristics, or have a sustainable investment objective.

shares Securities that represent a share in the business results of a company.

Depository: Banque Degroof Petercam Luxembourg S.A.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep this product for **at least 5 years**. Selling before the end of this period significantly increases the risk of lower investment returns or a loss.

The risk indicator is designed to help you compare the risks of investment products. It uses the required calculation methodology, which includes market movements and the risk that the product manufacturer cannot pay out as required. The risk indicator is not guaranteed and may change over time.

All investments involve risk. The value of your investment in this product can go up and down, and you could lose some or all of your investment. This product is rated at the medium risk level (4 out of 7).

Performance Scenarios

This table shows the money you could get back (net of costs) over different periods, under different scenarios, assuming you were to invest USD 10,000 in the sub-fund. You can compare this with the scenarios of other products.

The figures shown include all costs of the product itself. The figures do not take into account your personal tax situation, which may affect how much you get back.

What you will get from this product depends on future market performance.

Note that future market developments are uncertain and cannot be accurately predicted.

Recommended holding period:		5 years	
Example Investment:		10 000 USD	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum			
Stress	What you might get back after costs	2 720 USD	2 690 USD
	Average return each year	-72.80%	-23.10%
Unfavourable	What you might get back after costs	6 350 USD	6 730 USD
	Average return each year	-36.50%	-7.61%
Moderate	What you might get back after costs	9 900 USD	10 960 USD
	Average return each year	-1.00%	1.85%
Favourable	What you might get back after costs	16 020 USD	19 940 USD
	Average return each year	60.20%	14.80%

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. The stress scenario shows what you might get back in extreme market circumstances. Markets could develop very differently in the future.

Unfavourable scenario: this type of scenario occurred for an investment between 17/02/2021 and 29/12/2023.

Moderate scenario: this type of scenario occurred for an investment between 30/06/2015 and 30/06/2020.

Favourable scenario: this type of scenario occurred for an investment between 26/02/2016 and 26/02/2021.

What happens if Degroof Petercam Asset Services S.A. is unable to pay out?

The sub-fund's assets are segregated from those of the other sub-funds in the SICAV and from Degroof Petercam Asset Services S.A., the product manufacturer and management company of the sub-fund. Even if it were to fail, the product manufacturer could not use the sub-fund's assets to pay its debts.

The only scenario under which an investor could incur a loss is by selling shares at a time when they are worth less than what the investor paid.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

This table shows the amounts taken from your investment to cover different costs. These amounts depend on how much you invest, how long you hold your investment, and how the sub-fund performs. The amounts shown are illustrations based on a hypothetical investment amount and different investment periods.

We have assumed that:

- in the first year, you would get back the amount that you invested (0% annual return);
- for the other holding period(s), the sub-fund performs as shown above in the “moderate” scenario
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	484 USD	1 828 USD
Annual cost impact (*)	4.8%	3.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period, your average return per year is projected to be 4,6 % before costs and 1,9 % after costs.

Composition of the costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	2,0% of the amount you pay in when entering this investment. This is the most you will pay, you could pay less.	Up to 200 USD
Exit costs	N/A	0 USD
Ongoing costs taken each year		
Management fees and other administrative or operating costs	2,4% of the value of your investment per year. This is an estimate based on actual costs over the last year.	237 USD
Transaction costs	0,5% This is an estimate of the costs incurred when buying and selling investments underlying the sub-fund. The actual amount will vary depending on the quantity bought and sold.	47 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 USD
