Warning

You are about to buy a product that is not simple and can be difficult to understand.

What is this product?

Type | Subfund of a SICAV (open-end investment company) governed by Luxembourg law. Each shareholder has co-ownership rights on the SICAV's net assets in proportion to the number of shares held.

Term | The fund was created on 08/11/2013 for an unlimited term.

Objectives | Echiquier World Equity Growth Fund is a dynamic subfund seeking long-term performance via exposure to growth stocks in international markets. The subfund invests in stocks with confirmed global leadership positions in their industry.

The MSCI All Country World Index can be used as an ex-post benchmark for its performance. This index is used solely for information purposes and is calculated in euros, dividends reinvested, by MSCI. It includes 50 countries (developed and emerging countries)

The management of the subfund is based on a rigorous securities selection process (stock picking). The investment strategy is intended to select stocks which provide the best current or potential growth, which are leaders in markets of significant size in all regions of the world.

The subfund has a minimum 60% exposure to the equities of the eurozone and/or international and emerging markets. The subfund's assets consist primarily of large caps. However, the subfund reserves the right to invest up to 10% in small and mid-caps. The UCITS reserves the right to invest up to a maximum of 40% in fixed-income products. At the time of acquisition and for monitoring purposes over the life of the securities, credit risk is assessed on the basis of in-house research and analysis by La Financière de l'Échiquier and using the ratings produced by agencies. The eligible securities in question are deemed to be investment grade, i.e., having a minimum Standard & Poor's rating of BBB- or equivalent or considered as such by the management team.

Financial derivative instruments, both traded on regulated markets or over the counter, can be used on an exceptional basis to:

- Hedge the portfolio against currency risk and against equity risk when the manager anticipates a significant deterioration in market performance;
- Occasionally expose the portfolio to equity risk during significant subscription transactions. The subfund does not, in any event, intend to implement a strategy of over-exposing the portfolio to equity risk.

Furthermore, the portfolio management team systematically includes an extra-financial approach in building the portfolio, although extra-financial criteria are not a determining factor in investment decisions.

Benchmark | MSCI ACWI NET RETURN EUR

Allocation of income | Accumulation

Cut-off time for centralising subscription/redemption orders | The investor may obtain a redemption on request every business day. Redemption requests are centralised each market trading day before 10 p.m. (Paris time) with our centralising agent BNP Paribas SA Luxembourg and executed on the net asset value calculated on the closing price on the day they are centralised.

Valuation frequency | The net asset value is calculated daily except on days when the Paris stock exchange is closed and on French public holidays.

Target retail investors | Potential investors are aware of the risks inherent in holding this type of product and have an investment horizon corresponding to its recommended investment period. This fund may not be suitable for investors who plan to withdraw their money before 5 years. The fund is available to US Persons (more information can be found in the prospectus).

The prospectus, the annual reports and the most recent interim documents, as well as any other practical information, and in particular where to find the most recent price of the shares are available on our website www.lfde.com or upon simple written request, free of charge, at: La Financière de l'Échiquier 53 avenue d'Iéna, 75116 Paris.

What are the risks and what could I get in return?

Risk indicator

The risk indicator is based on the assumption that you hold the shares for 5 years.

 The real risk can be very different if you opt for an exit before this period, and you could get less in return.

The synthetic risk indicator makes it possible to assess the level of risk of this product compared to others. It indicates the likelihood that this product will incur losses in the event of market movements or if we are unable to pay you.

We have classified the product in risk class 4 out of 7, which is a medium risk class. In other words, the potential losses related to the product's future results are at a medium level and, if the situation deteriorates on the financial markets, it is possible that our ability to pay you will be affected.

Risks materially relevant and not taken into account in the indicator:
Credit risk.

As this product does not provide protection against market fluctuations, you may lose some or all of your investment.

Performance scenarios I

The figures shown include all costs of the product itself, including the portion paid to your advisor or distributor by La Financière de l'Échiquier. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

What you will get from this product depends on future market performance. Future market trends may change and cannot be predicted precisely. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the product over the past 10 years. What happens if La Financière de l'Échiquier is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the management company. In the event of failure of the latter, the assets of the product held in custody by the depositary will not be affected. In the case of failure of the depositary, the risk of financial loss for the product is reduced due to the legal segregation of the assets of the depositary and those of the product.

What are the costs?

The person who sells this product to you or who provides you with advice about it may ask you to pay additional costs. If so, this person will inform you about these costs and show you the impact of these costs on your investment.

Costs over time:

The tables show the amounts deducted from your investment in order to cover the different types of costs. These amounts depend on the amount you invest, the time you hold the product, and the product's return. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We assumed:

- that in the first year you will recover the amount you invested (annual return of 0%). That for other holding periods, the product changes as indicated in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years (Recommended holding period)
Total costs	€428	€1,816
Impact of annual costs (*)	4.32%	2.54% each year

(*) It shows the extent to which costs reduce your return annually during the holding period. For example, it shows that if you exit at the end of the recommended holding period, your average annual return is 14.80% before costs and 12.26% after this deduction.

We may share the costs with the person selling the product to cover the services they provide to you. This person will inform you of the amount.

Composition of costs:

One-off costs at entry or exit		If you exit after 1 year
Entry costs	3.00% of the amount you pay when you enter the investment. This is the maximum amount you will pay. The person selling the product will inform you of the actual costs.	EUR 300
