Shareholders' information

The annual general meeting of shareholders of Morgan Stanley Investment Funds (the "Company") is held at the registered office of the Company and will be held on the second Tuesday of the month of May at 10.30 am. If such day is a legal or a bank holiday in Luxembourg, the annual general meeting shall be held on the next business day.

Notices of all general meetings are sent by mail to all registered shareholders at their registered address at least 8 days prior to the meeting. Such notices will indicate the time and place of the meeting as well as the conditions of admission thereto. Said notices will also contain the agenda and requirements of Luxembourg law with regard to the necessary quorum and majorities at the meeting.

To the extent required by law, further notices will be published in the Mémorial and in one Luxembourg newspaper.

Audited financial statements in respect of the preceding financial year are made available at the registered office of the Company and are available to shareholders upon request. In addition, unaudited semi-annual reports are also made available at the registered office.

The annual and semi-annual reports are also available on the Company's website (www.morganstanleyinvestmentfunds.com).

The Company's financial year end is 31 December.

Any other notices relevant to the Company are also published in a Luxembourg newspaper or mailed to affected shareholders.

The net asset value per share of each Class of Share is available on their respective dealing day during Luxembourg business hours at the registered office of the Company. Net asset value per share information is also available from market information providers, such as Bloomberg, www.fundinfo.com and Morningstar, as well as being available at www.morganstanleyinvestmentfunds.com.

No subscriptions can be received on the basis of financial reports alone. Subscriptions are only valid if made on the basis of the current prospectus and the latest Key Information Document.

Carnegie Fund Services S.A., 11, rue du Général-Dufour, 1204 Geneva, web: carnegie-fund-services-ch, is the representative in Switzerland and Banque Cantonale de Genève, 17, quai de l'Île, 1204 Geneva is the paying agent in Switzerland. The Prospectus, the latest Key Investor Information Document, the Articles and the annual and semi-annual reports of the Company may be obtained free of charge from the representative in Switzerland.

A list of purchases and sales (securities transactions) carried out by the Company during the reporting year may be obtained free of charge from the representative in Switzerland.

The investment objectives set out in this annual report are summaries only. The complete investment objectives and policies for each Fund are set out in the Company's current prospectus.

Board of Directors' Report

Directors

CARINE FEIPEL

Independent Non-Executive Director

Carine Feipel is a non-executive director of the Company. Ms. Feipel is a Luxembourg attorney and certified independent director. She is the current Chair of ILA.

Ms. Feipel obtained the INSEAD IDP Certificate on Corporate Governance in 2014 and was admitted by ILA as a Certified Director in the same year. Ms. Feipel serves the Board of Directors of a Luxembourg based bank, four insurance companies, both active in the life insurance and the non-life insurance fields. Ms. Feipel is further a member of the Board of Directors of various Luxembourg companies active in the financial and investment funds sectors. In 2014, Ms. Feipel was elected to the Board of Directors of ILA and

Board of Directors' Report (continued)

became a member of the Management Committee of such association. She was appointed as Chair of such professional association in June 2019.

Since January 2014, Ms. Feipel practices as an independent lawyer, notably advising insurance and reinsurance companies as well as other financial institutions. Ms. Feipel has 20 years of experience as a lawyer with the Luxembourg law firm Arendt & Medernach where she headed the insurance law practice and was co-head of the employment law practice. Ms. Feipel was also a member of the Board of such firm and headed its New York office from 2007 to 2012. Since 2010, Ms. Feipel has been a member of various committees within the *Haut Comité pour la Place Financière*, a Government lead think tank coordinating promotion and innovation initiatives for the Luxembourg financial sector.

WILLIAM JONES

Independent Non-Executive Director

William Jones is a non-executive director of the Company. Mr. Jones is the founder of Beaumont Governance which provides directorship and corporate governance services from Luxembourg. Mr. Jones has over 32 years' experience in the funds industry and has held senior positions with Commodities Corporation, Goldman Sachs Asset Management International and Bank of Bermuda/HSBC. Mr. Jones acts as director of investment funds and related entities sponsored by major US and international banks and asset managers. He also acts as advisor and director of non-financial start-up and early stage companies. He completed the first cohort of the INSEAD International Directors Program ("IIDP") in 2011, was a member of the IIDP Advisory Board (2011-2017) and served as its first President (2011-2015). Mr. Jones was accredited in 2011 as a certified director by IIDP and the ILA. He served on the Board of Directors of ILA (2016-2020) and its Fund Governance Committee (2010-2020) and co-chaired the Alternative Investment Task Force of ILA's Fund Governance Committee which issued the "ILA Guide for Board Members in the Context of AIF and AIFM" in July 2014. He sits on multiple committees of ALFI. He was co-vice chair of the Alternative Investment Management Association's ("AIMA") working group which issued "AIMA's Fund Director Guide" in April 2015. He served on the Board of Governors of the International School of Luxembourg from 2011 to 2015 and was its Chairman during 2014-15. Mr. Jones has law and business degrees (1988) from Columbia University and a bachelor degree (1984) from Princeton University. Mr. William Jones resigned as a member of the Board of Directors on 31 December 2022.

HENRY KELLY

Independent Non-Executive Director

Henry Kelly is a non-executive director and Chairman of the Company. Mr. Kelly is an independent board member of several investment funds and investment management companies domiciled in Luxembourg and internationally. He is the Managing Director of the Luxembourg-based consultancy firm that he founded in 1999, KellyConsult S.à r.l., which provides advisory

services to the investment fund sector. He is a member and was the founding Chairman of the Fund Governance Forum for Association of the Luxembourg Fund Industry ("ALFI"). He is a member of the Management Committee of the *Institut Luxembourgeois des Administrateurs* (Luxembourg Institute of Directors) ("ILA") and is a founding member of the ILA Investment Funds Committee. He is a regular speaker at conferences on investment funds and corporate governance matters.

From 1993 – 1999 he was a Managing Director of Flemings Luxembourg (now JP Morgan Asset Management) following 5 years' experience in the capital markets division of BNP Paribas based in Paris. Prior to these posts, he acquired seven years' experience with Price Waterhouse in Paris, Frankfurt and New York. He has a master's degree in Modern Languages from Cambridge University, is a Member of the Institute of Chartered Accountants and holds the INSEAD Certificate in Corporate Governance. He obtained the qualification of ILA certified director in 2013.

Mr. Henry Kelly resigned as a member of the Board of Directors on 31 December 2022.

DIANE HOSIE

Non-Executive Director

Diane Hosie is a non-executive director of the Company and formally International Head of Morgan Stanley Investment Managements client services and distribution oversight teams. Ms Hosie joined Morgan Stanley Investment Management in 1997 as a Senior Associate within Investment Management Operations and was named Managing Director in 2014. She has over 30 years' experience in Asset Management. Prior to Morgan Stanley Investment Management Ms Hosie spend nine years with Nomura Capital Management.

Ms. Hosie is an Executive Director on a number of Luxembourg fund boards including Morgan Stanley Investment Funds, Morgan Stanley Liquidity Funds Board, and Morgan Stanley Asset Management S.A. She is also a Non-Executive Director of MSIM Fund Management (Ireland) Limited.

ANDREW MACK

Non-Executive Director

Mr. Mack joined Morgan Stanley in 1996 and has over 30 years of investment experience. Mr. Mack joined Morgan Stanley as a portfolio manager in the asset management business, where he launched and co-managed a global equity arbitrage fund. He subsequently headed the global market risk oversight team for all of Morgan Stanley before taking over as market risk manager of the European equities business. Mr. Mack was appointed as European head of multi asset class prime brokerage in 2004 and took over prime brokerage sales for Europe in 2006 before running the European listed derivative business. Mr. Mack rejoined Morgan Stanley Investment Management (MSIM) in

Board of Directors' Report (continued)

2008 as global chief risk officer, taking over as head of MSIM EMEA at the beginning of 2009. Mr. Mack was an employee of Morgan Stanley until 30 June 2010. Mr. Mack provided services as a consultant and senior adviser to Morgan Stanley between 1 July 2010 and 31 December 2013. Mr. Mack assumed a non-Executive Director role of Morgan Stanley Investment Management (ACD) Limited which was the Management Company from 1 April 2014 until 1 January 2019. Mr. Mack has been involved in taking and managing risk for most of his investment career, his previous experience includes portfolio management, trading and risk management positions at Cargill, Bankers Trust and Black River Asset Management, a Minneapolis based hedge fund. Mr. Andrew Mack resigned as a member of the Board of Directors on 31 December 2022.

SUSANNE VAN DOOTINGH

Independent Non-Executive Director

Susanne van Dootingh is a non-executive director of the Company. Ms. van Dootingh is an independent non-executive director of various Luxembourg domiciled investment funds and management companies. Prior to becoming an independent non-executive director in 2017, Ms. van Dootingh worked at State Street Global Advisors (SSGA) from 2002 to 2017 with her final position being Senior Managing Director, Head of European Governance and Regulatory Strategy, EMEA. During her tenure at SSGA she held various other senior positions, amongst others in Global Product Development and Fixed Income Strategy, and was the chairwoman of the SSGA flagship Luxembourg Sicav and Management Company and various other boards for a decade. Before joining SSGA in 2002 Ms. van Dootingh gained experience in global fixed income portfolio management and strategy at Fortis Investment Management, Barclays Global Investors and ABN AMRO Asset Management. She graduated from the Vrije Universiteit Amsterdam with a Master's degree in Financial Sector Management.

ZOË PARISH

Executive Director

Zoë Parish is a Managing Director of Morgan Stanley and the Head of International Product and Board Governance for Morgan Stanley Investment Management. Before returning to Morgan Stanley in 2019, Zoë spent 4 years at Coutts and Co and was most recently Head of Europe and Americas. Prior to that she was Head of Delivery responsible for developing and implementation of strategies for Coutts products for England and Wales. Prior to this she was business lead for several strategic projects for the firm including a web based investment platform. From 1993 to 2014, Zoë held leadership and product roles in Morgan Stanley's Private Wealth Management business in EMEA. In her latest role with the firm as Managing Director, she was Head of Product and also headed up the Alternatives platform, the Private Investment Club and Strategic Lead Management for EMEA. Zoë received a B. A. (Hons) and an LLB (Hons) both from the University of London. She also sits on

the Board of Morgan Stanley Asset Management S.A and is the Chairman of the Board of Trustees for the University of London Boat Club.

ARTHUR LEV

Non-Executive Director

Arthur Lev is a non-executive director of the Company. Arthur Lev is the former Chairman of Morgan Stanley Investment Management (MSIM), where he spent nearly twenty years in a variety of business, risk and legal roles, most recently managing MSIM's Long Only and Alternatives businesses. Arthur also spent four years at FrontPoint Partners, a hedge fund firm that was acquired by Morgan Stanley. Arthur is currently an independent board member (and chair of the Audit and Risk Committee) of Russell Investments, a global money manager based in Seattle, WA. Arthur was previously an independent board member of NextCapital Group, a digital adviser and financial technology firm based in Chicago, IL (acquired by Goldman Sachs in 2022), and an independent board member of Techstars, a startup accelerator platform based in Boulder, CO. Arthur is a graduate of the University of Southern California (AB, 1983) and Harvard Law School (JD, 1986).

Structure of the Company

Morgan Stanley Investment Funds (the "Company") is registered in the Grand Duchy of Luxembourg as an undertaking for collective investment pursuant to Part I of the Law of 17 December 2010 on Undertakings for collective investment, as amended (the "2010 Law"). Such registration however does not imply a positive assessment by the supervisory authority of the quality of the shares of the Company (the "Shares") offered for sale. Any representation to the contrary is unauthorised and unlawful. The Company is an Undertaking for Collective Investment in Transferable Securities ("UCITS") for the purpose of the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (the "UCITS Directive" or the "UCITS IV Directive"). Since 1 January 2019, the Company has appointed MSIM Fund Management (Ireland) Limited as management company (the "Management Company").

Distribution of the Funds

All of the Funds and Share Classes are registered for distribution in the Grand Duchy of Luxembourg and a number of the Funds and Share Classes are registered for distribution in other jurisdictions. For a full list of countries in which Funds and Share Classes are registered for sale, please refer to www.morganstanleyinvestmentfunds.com.

Board of Directors' Report (continued)

Role and Responsibility of the Board

The responsibility of the Board is governed by Luxembourg law. With respect to the financial statements of the Company, the duties of the Directors are governed by the law of 10 December 2010 on, inter alia, the accounting and annual accounts of undertakings for collective investment and by the law of 17 December 2010 relating to undertakings for collective investment.

The matters reserved for the Board include determination of each Fund's investment objective and policies, investment restrictions and powers, amendments to the Prospectus, reviewing and approving key investment and financial data, including the annual accounts, as well as the appointment of the Auditor, the Custodian and the Management Company.

Prior to each Board meeting, the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. For each quarterly meeting, the Board receives reports consolidated by the Management Company on the basis of information received from the Investment Adviser, the Distributor, the Custodian, the Administrator, the Transfer Agent, Risk Management, the Auditor as well as proposals for changes to existing Funds or proposals to launch new ones as appropriate. Senior representatives of the Management Company and other service providers attend Board meetings by invitation to enable the Directors to question the reports presented to them.

The Board can take independent professional advice if necessary and at the Company's expense.

Board Evaluation

The Board carries out an annual review of its performance.

Board Composition

The Board as a whole has a breadth of investment knowledge, financial skills, as well as legal and other experience relevant to the Company's business. Directors are elected annually by shareholders at the Annual General Meeting. The Board takes into account the nature and requirements of the fund industry and of the Company's business when making the recommendation to shareholders that Directors be elected.

Tabular Summary of Board Composition

Director	Residence	Executive	Non-Executive	Independent non-executive	Length of service on Board
Henry Kelly	Luxembourg			X	10 years
William Jones	Luxembourg			X	14.5 years
Andrew Mack	United Kingdom		X		13.5 years
Carine Feipel	Luxembourg			X	7 years
Susanne Van Dootingh	Belgium			X	4.25 years
Diane Hosie	United Kingdom		X		4.25 years
Zoë Parish	United Kingdom	X			2.75 years
Arthur Lev	United States of America		X		1.75 years

Board Meetings

The Board meets at least quarterly and additional meetings are convened as required from time to time by the business of the Company.

At the quarterly board meetings, the agenda includes, amongst other matters, those items highlighted under the section above called 'Role and Responsibility of the Board' and the approval of the annual report and accounts.

In certain circumstances, when it may not be appropriate to wait until the next Board meeting to discuss a particular issue, authority may be delegated to one or more Board members to deal with particular business issues.

The following table captures the Directors' attendance of Board Meetings throughout 2022.

Director	Number of board meetings attended
Henry Kelly	6 out of 6
William Jones	6 out of 6
Andrew Mack	5 out of 6
Carine Feipel	6 out of 6
Susanne van Dootingh	6 out of 6
Diane Hosie	6 out of 6
Zoë Parish	6 out of 6
Arthur Lev	5 out of 6

Internal Control

All administrative services are provided by the Management Company and custody of assets is provided by J.P. Morgan SE., Luxembourg Branch. The Management Company may delegate some of its responsibilities to any other party subject to approval by the Company but the Management Company's liability to the Company for the performance of collective portfolio management and other delegated services has not been affected by such delegation. In particular, the Management Company has delegated the investment management, distribution, central administration and transfer agency functions. The Board is responsible for the oversight of the design, implementation and maintenance

Board of Directors' Report (continued)

of internal controls comprising monitoring the services provided by the Management Company and the Custodian, including the operational and compliance controls established by them to meet the Company's obligations to shareholders as set out in the Prospectus, Articles of Incorporation as well as all relevant regulations. The Management Company formally reports to the Board on a quarterly basis on the various activities it is responsible for and in addition shall inform the Board without delay of any material administrative or accounting matters.

Corporate Governance and ALFI Code of Conduct

The Board is responsible for ensuring that a high level of corporate governance is met and considers that the Company has complied with the best practices in the Luxembourg funds industry.

In particular the Board has adopted the ALFI Code of Conduct (the "Code") which sets out principles of good governance. These principles were last amended in June 2022 and are set out below:

1. The Board should ensure that high standards of corporate governance are applied at all times;
2. The Board should have good professional standing and appropriate experience and use best efforts to ensure that it is collectively competent to fulfil its responsibilities;
3. The Board should act fairly and independently in the best interests of the investors;
4. The Board should act with due care and diligence in the performance of their duties;
5. The Board should ensure compliance with all applicable laws and regulations and with the Fund's constitutional documents;
6. The Board should ensure that investors are properly informed, are fairly and equitably treated, and receive the benefits and services to which they are entitled;
7. The Board should ensure that an effective risk management process and appropriate internal controls are in place;
8. The Board should identify and manage fairly and effectively, to the best of its ability, any actual, potential or apparent conflict of interest and ensure appropriate disclosure;
9. The Board should ensure that shareholder rights are exercised in a considered way and in the best interests of the Fund;
10. The Board should ensure that the remuneration of the Board members is reasonable and fair and adequately disclosed.
11. The board should integrate as appropriate sustainability standards and objectives including environmental, social and governance (ESG) criteria in its business model and operations.

The Board considers that the Company has been in compliance with the principles of the Code in all material aspects throughout the financial year ended 31 December 2022. The Board undertakes an annual review of ongoing compliance with the principles of the Code.

Proxy Voting Policy

The Board delegates responsibility for proxy voting to the Management Company. The Management Company manages the voting rights of the shares entrusted in a prudent and diligent manner, based exclusively on the reasonable judgment of what will best serve the financial interests of clients. So far, as is practicable, the Management Company will vote at all of the meetings called by companies in which the funds are invested.

A copy of the proxy voting policy is available from the Fund's registered office upon request or on the website:
<http://www.morganstanley.com/im/en-gb/institutional-investor/about-us/proxy-voting-en-gb.html>

Directors' and Officers' Indemnity Insurance

The Fund has taken out Directors' and Officers' Indemnity Insurance which indemnifies the Directors against certain liabilities arising in the course of their duties and responsibilities but does not cover against any fraudulent or dishonest actions on their part.

Annual General Meeting

The next Annual General Meeting of the Company will be held on 10 May 2023 at the Registered Office of the Company to consider matters relating to the year ended 31 December 2022. At this meeting shareholders will, amongst other matters, be requested to consider the usual matters at such meetings including:

1. The adoption of the financial statements and approval of the allocation of the results;
2. The approval of Directors' fees;
3. The election of the Directors, all of whom wish to stand for election;
4. The election of the Auditor.

Board of Directors

Luxembourg, 5 April 2023

American Resilience Fund*

INVESTMENT AIM

To seek long-term appreciation, measured in US Dollars, through investment primarily in equity securities, including depositary receipts (including American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs)), issued by companies primarily located in the United States of America, while incorporating environmental, social and corporate governance (ESG) considerations.

* Fund commenced operations on 15 December 2022.

Calvert Sustainable Climate Aligned Fund*

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in companies located in developed markets that are involved in economic activities that address climate transition and/or are aligned to the long-term de-carbonisation objectives of the Paris Agreement. The Fund will maintain a carbon profile that follows the net zero objectives of the Paris Agreement, as reflected in the appropriate Paris-Aligned benchmark, or in the absence of an approved Paris-Aligned benchmark it will maintain a substantially lower carbon footprint, of at least 50% less than that of the underlying market benchmark, and taking into account the long-term carbon reduction objectives of the Paris Agreement which may warrant a revision of the targeted range of reduction over time. Carbon footprint shall be measured as weighted average carbon intensity, defined as tonnes of CO₂ per \$1million enterprise value including cash.

* Fund commenced operations on 8 April 2022.

Calvert Sustainable Climate Transition Fund*

INVESTMENT AIM

To provide an attractive level of total return, measured in US Dollars, by investing primarily in a concentrated portfolio of equity securities, including preference shares and depositary receipts (including American Depositary Receipts (ADRs), European Depositary Receipts (EDRs), and Global Depositary Receipts (GDRs)), of companies located throughout the world that are engaged in business models that help to mitigate or adapt to climate change and that qualify as sustainable investments.

* Fund commenced operations on 27 July 2022.

Calvert Sustainable Developed Europe Equity Select Fund*

INVESTMENT AIM

To provide long-term capital appreciation, measured in Euro, primarily investing in companies located in Europe's developed markets that are involved in economic activities that address global environmental or societal challenges that relate to areas such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

* Fund commenced operations on 8 April 2022.

Calvert Sustainable Developed Markets Equity Select Fund*

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in companies located in developed markets that are involved in economic activities that address global environmental or societal challenges, such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

* Fund commenced operations on 8 April 2022.

Calvert Sustainable Diversity, Equity and Inclusion Fund*

INVESTMENT AIM

To provide long-term capital appreciation and advance diversity, equity and inclusion, measured in US Dollars, primarily investing in companies located globally, that demonstrate leadership or meaningful improvement in having a diverse workforce and an equal and inclusive work culture. The Fund will seek to maintain higher levels of workforce diversity at a portfolio level than the underlying market benchmark as measured by average percentage of women at the board level and average percentage of board members representing underrepresented ethnicities.

* Fund commenced operations on 8 April 2022.

Calvert Sustainable Emerging Markets Equity Select Fund*

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in companies located in the world's emerging markets that are involved in economic activities that address global environmental or societal challenges that relate to areas such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

* Fund commenced operations on 31 May 2022.

Calvert Sustainable US Equity Select Fund*

INVESTMENT AIM

To provide long-term capital appreciation, measured in US Dollars, primarily investing in large-capitalisation US companies that are involved in economic activities that address global environmental or societal challenges that relate to areas such as environmental sustainability and resource efficiency, diversity, equity and inclusion, respect for human rights, product responsibility, human capital management and accountable governance and transparent operations, or are leaders in managing financially material environmental or social risks and opportunities. This strategy further takes into account the long-term carbon reduction objectives of the Paris Agreement and advancement of diversity, equity and inclusion.

* Fund commenced operations on 8 April 2022.

China A-shares Fund

INVESTMENT AIM

To provide capital appreciation over the long term, measured in US Dollars, by investing primarily in China A-shares of companies listed on the Shanghai Stock Exchange and/or the Shenzhen Stock Exchange via Stock Connect. The Fund may also invest in issuers of other countries including, but not limited to, those that are listed on the Hong Kong Exchange (including China H-shares and red chips) and depositary receipts (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)) of issuers located in any country and referring to China companies.

The Fund may make use of exchange traded and over-the-counter options, futures and other derivatives for investment or efficient portfolio management (including hedging) purposes.

China Equity Fund

INVESTMENT AIM

To seek to provide an attractive risk-adjusted annualized return, measured in US Dollars, by investing primarily in equity securities of companies located in China, including China A-shares of companies listed on the Shanghai Stock Exchange and/or the Shenzhen Stock Exchange via Stock Connect, and in issuers of other countries including, but not limited to, those that are listed on the Hong Kong Exchange (including China H shares and red chips) and depositary receipts (including American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)), where the underlying companies are located in China. The Fund may make use of exchange traded and over-the-counter options, futures and other derivatives for investment or efficient portfolio management (including hedging) purposes.

Global Quality Fund

INVESTMENT AIM

To seek an attractive long-term rate of return, measured in US Dollars, through investment primarily in equity securities of companies in the world's developed countries. The strategy will invest in a concentrated portfolio of high quality businesses with strong managements that can sustain high cross-cycle returns on capital.

Indian Equity Fund

INVESTMENT AIM

To seek long-term capital appreciation, measured in US Dollars, by investment directly or indirectly, primarily in the equity securities of companies domiciled or exercising the predominant part of their economic activity in India. The Fund, either directly or indirectly, may also invest, on an ancillary basis, in companies listed on Indian stock exchanges which may not be domiciled or exercising the predominant part of their economic activity in India, in depositary receipts (including American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) and European Depositary Receipts (EDRs)), debt securities convertible into common shares, preference shares, debentures, warrants on securities and other equity linked securities, including participatory notes. The Fund, either directly or indirectly, will invest in a concentrated portfolio of companies.

Sustainable Asia Equity Fund

INVESTMENT AIM

To seek long-term capital appreciation, measured in US Dollars, through investment primarily in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in Asia, excluding Japan, thereby taking advantage of the dynamic economic growth capabilities of the region, while incorporating environmental, social and corporate governance (ESG) considerations. The Fund will maintain a lower carbon footprint than the MSCI Asia ex Japan Net Index.

Emerging Markets Corporate Debt Fund

INVESTMENT AIM

To seek to maximize total return, measured in US Dollars, primarily through investments across the credit spectrum of Fixed Income securities of corporate issuers, together with investing in Fixed Income securities of government and government related issuers located, in each case, in emerging markets countries. The Fund intends to invest its assets in emerging market countries' Fixed Income securities that provide a high level of current income, while at the same time holding the potential for capital appreciation.

Total Unrealised Loss on Financial Futures Contracts				(151,797)	(0.18)
Net Unrealised Gain on Financial Futures Contracts				161,768	0.18

Collateral received and paid by the Fund in respect of financial derivative instruments:

Type of Collateral	Counterparty	Currency	Amount received	Amount paid
Emerging Markets Debt Fund				
Cash	Goldman Sachs	USD	866,818	-
			866,818	-

Emerging Markets Domestic Debt Fund

INVESTMENT AIM

To seek to maximise total return, measured in US Dollars, primarily through investment in a portfolio of Emerging Market bonds and other Emerging Market Fixed Income Securities, denominated in the local currency of issue. The Fund intends to invest its assets in Emerging Market Fixed Income Securities that provide a high level of current income, while at the same time holding the potential for capital appreciation.

Global Asset Backed Securities Fund

INVESTMENT AIM

To provide an attractive rate of total return, measured in US Dollars, through investment primarily in Fixed Income Securities that are mortgage-backed securities, commercial mortgage-backed securities, collateralised mortgage obligations and covered bonds that are covered by mortgages including uniform mortgage-backed securities ("Mortgage Backed Securities"). At least half of the Fund's asset will be invested in securities rated investment-grade by an internationally recognised rating agency, securities determined to be of similar creditworthiness by the Investment Adviser, or securities backed by the United States of America.

Global Bond Fund

INVESTMENT AIM

To provide an attractive rate of return, measured in US Dollars, through market, instrument and currency selection. The Fund will invest primarily in domestic, international, emerging market and Euromarket Fixed Income Securities of varying maturities denominated in US Dollars and other currencies, including asset-backed securities (including mortgage backed securities), loan participations and loan assignments, to the extent that these instruments are securitised.

Global Credit Fund*

INVESTMENT AIM

To provide an attractive rate of relative return, measured in USD, primarily through investment in Fixed Income Securities issued by corporations and other non government issuers (“Corporate Bonds”) organised or operating in both developed and emerging markets and denominated in global currencies. With a view to enhancing returns and/or as part of the investment strategy, the Fund may make use of exchange traded and over-the-counter options, futures and other derivatives for investment or efficient portfolio management (including hedging) purposes, while incorporating environmental, social and corporate governance (ESG) considerations.

* Formerly known as Sustainable Global Credit Fund prior to 17 November 2022.

Sustainable Euro Corporate Bond Fund

INVESTMENT AIM

To provide an attractive rate of relative return, measured in Euro, by investing primarily in Euro denominated Fixed Income Securities, issued by corporations and other non-government related issuers (“Corporate Bonds”) while incorporating environmental, social and corporate governance (ESG) considerations. The Fund will only invest in the top 80% of ESG-scoring corporates in each sub-sector of the Bloomberg Barclays European Corporate Index.

Global Balanced Defensive Fund

INVESTMENT AIM

To provide an attractive level of total return, measured in Euro, by investing primarily in portfolio of transferable securities such as equity securities, including closed-end Real Estate Investment Trusts (REITS); Fixed Income Securities (including investment grade, non-investment grade and unrated) and money market instruments and cash globally and through the use of financial derivative instruments. The investments will target total portfolio risk and volatility below that of the Global Balanced Fund.

Multi-Asset Risk Control Fund

INVESTMENT AIM

To provide an attractive level of total return, measured in USD, through investing primarily in a portfolio of transferable securities and money market instruments globally and through the use of financial derivative instruments. The Fund will implement top-down, tactical views on global asset classes across (1) equity including closed-end Real Estate Investment Trusts (REITS); (2) Fixed Income Securities; and (3) cash and money market instruments.

Notes to the financial statements

As at 31 December 2022

1 THE COMPANY

Morgan Stanley Investment Funds (the “Company”) was incorporated on 21 November 1988 under the laws of the Grand Duchy of Luxembourg as a “Société d’Investissement à Capital Variable” (“SICAV”) and is registered as an undertaking for collective investment pursuant to Part 1 of the Law of 17 December 2010, as amended. The 2010 Law transposes the UCITS Directives (Directive 2009/65/EC as amended by Directive 2014/91/EU) into Luxembourg legislation.

The exclusive purpose of the Company is to invest the funds available to it in transferable securities and other assets permitted by law, with the purpose of spreading investment risks and affording its shareholders the results of the management of its assets. The Company is presently structured to provide both institutional and individual investors with a variety of Equity, Bond, Liquidity, Alternative and Asset Allocation Funds.

At the date of this report eighty one funds are open for subscription.

Significant event

Merger of Funds

- In the twelve months to 31 December 2022, the following sub-funds of Eaton Vance International (Ireland) Funds plc, a UCITS structured as an investment company under the laws of Ireland and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, and an umbrella fund with segregated liability between sub-funds, merged into two newly launched Morgan Stanley Investment Funds, on a 1 to 1 basis:
 - On 2 December 2022, Eaton Vance International (Ireland) Funds PLC - Sustainable US High Yield Bond Fund merged into Morgan Stanley Investment Funds – Sustainable US High Yield Bond Fund.
 - On 2 December 2022, Eaton Vance International (Ireland) Funds PLC - US Value Fund merged into Morgan Stanley Investment Funds – US Value Fund.
- As part of the implementation of the J.P. Morgan legal entity strategy within Europe, J.P. Morgan Bank Luxembourg S.A. was merged into J.P. Morgan AG on 24 January 2022 (the “Merger Date”) which at the same time changed its legal form from a German Stock Corporation (*Aktiengesellschaft*) to a European Company (*Societas Europaea*), being J.P. Morgan SE.

The merger does not change the scope of services provided to the Fund by J.P. Morgan Bank Luxembourg S.A.. Since the Merger Date, J.P. Morgan SE continues to carry out the depositary and administration agent functions through J.P. Morgan SE, Luxembourg Branch.

As legal successor of J.P. Morgan Bank Luxembourg S.A., J.P. Morgan SE, Luxembourg Branch has assumed all rights and obligations that J.P. Morgan Bank Luxembourg S.A. had under the existing agreements with the Fund.

All agreements in place with J.P. Morgan Bank Luxembourg S.A. have been transferred to J.P. Morgan SE, Luxembourg Branch by operation of law.

With effect from 31 January 2022, Diane Hosie retired from Morgan Stanley Investment Management Limited. Diane converted to Non-Executive Director of the Fund with effect from 1 February 2022.

Closed Funds

- On 22 July 2022, Morgan Stanley Investment Funds – Real Assets Fund closed. Outstanding cash balance at custody at year end amounted to USD nil.
- On 6 October 2022, Morgan Stanley Investment Funds – Global Infrastructure Unconstrained Fund closed. Outstanding cash balance at custody at year end amounted to USD nil
- On 3 November 2022, Morgan Stanley Investment Funds – Liquid Alpha Capture Fund closed. Outstanding cash balance at custody at year end amounted to USD nil
- On 17 December 2021, Morgan Stanley Investment Funds – Global Multi-Asset Income Fund closed. Outstanding cash balance at custody at year end amounted to USD nil. Five illiquid securities remain unsold at Custody as at year end. There are no public markets available to sell the securities.

Name Change

- On 16 May 2022, Morgan Stanley Investment Funds – Emerging Europe Middle East and Africa Equity Fund changed its name to Morgan Stanley Investment Funds – NextGen Emerging Markets Fund.

Russia invasion of Ukraine

On 24 February 2022 Russia invaded Ukraine. The international community responded by imposing blocking sanctions on individuals, corporations and the Russian Central Bank. Prices

Notes to the financial statements (continued)

As at 31 December 2022

of Russian and Ukrainian securities declined significantly following the invasion. The Directors have made an assessment regarding the potential impact of the Russia-Ukraine conflict on the funds. It remains unclear however what the longer-term impact of this action will be on portfolio positions within the Company. No fund had exposure to Russia and/or Ukraine greater than 1.5% at 31 December 2022.

2 SIGNIFICANT ACCOUNTING POLICIES

The financial statements are presented in accordance with generally accepted accounting principles applicable to UCITS investment funds in Luxembourg and require management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The financial statements of Morgan Stanley Investment Funds – Multi-Asset Risk Control Fund have been prepared on a non-going concern basis as the Board of Directors resolved to close the Fund effective 22 March 2023.

a) Valuation of securities

Securities listed on a recognised stock exchange or dealt in on any other regulated market are valued at their last available prices at the valuation point, or, in the event that there should be several such markets, on the basis of their last available prices on the main market for the relevant security.

In normal market conditions, fixed income securities (including mortgage and asset backed securities) are valued at mid market price at the valuation point, based on data provided by pricing vendors.

In the event that the last available price or mid market price (fixed income) does not truly reflect the fair market value of the relevant securities, the value of such securities will be based on the reasonably foreseeable sales price determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Securities not listed or traded on a stock exchange or not dealt on another regulated market are valued on the basis of the reasonably foreseeable sales price determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Investments in other Undertakings for Collective Investments (“UCIs”) are valued at the last available net asset value for the UCI in question, excluding redemption fees if any.

Events may occur between the determination of an investment’s last available price and the determination of the Fund’s Net Asset Value per Share at the valuation point that may, in the opinion of the Board of Directors of the Company, mean that the last available price does not reflect the fair market value of the investment. In such circumstances the price of such investment shall be adjusted in accordance with the procedures

adopted from time to time by the Board of Directors of the Company in their discretion. As at the date of this annual report, certain securities may be fair valued in accordance with these procedures.

If since the time of determination of the net asset value there has been a material change in the quotations in the markets on which a substantial portion of the investments attributable to an available Fund are dealt in or quoted, the Company may, in order to safeguard the interests of the shareholders and the Company, cancel the first valuation and carry out further valuations as appropriate.

b) Valuation of Interest rate swaps

An Interest Rate Swap (“IRS”) is a bilateral agreement in which each of the parties agree to exchange a series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

IRS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on interest rate swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/ (depreciation) on interest rate swaps” and the realised gain/loss under “Net realised gain/(loss) on interest rate swaps” in the Statement of operations and changes in net assets.

c) Valuation of Inflation rate swaps

An inflation rate swap is a bilateral agreement in which each of the parties agree to exchange fixed rate payments for floating, inflation index linked payments based on a notional amount that serves as a computation basis.

Inflation rate swap contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on inflation rate swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/ (depreciation) on inflation rate swaps” and the realised gain/loss under “Net realised gain/(loss) on inflation rate swaps” in the Statement of operations and changes in net assets.

d) Valuation of Credit default swaps

A Credit Default Swap (“CDS”) is a transaction in which two parties enter into an agreement, whereby the buyer pays the seller a periodic payment for the specified life of the agreement. The seller makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event does occur, the seller will then make a payment to the buyer, and the swap contract will terminate.

Notes to the financial statements (continued)

As at 31 December 2022

CDS contracts are valued by reference to service data providers, market data and algorithms.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on credit default swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on credit default swaps” and the realised gain/loss under “Net realised gain/(loss) on credit default swaps” in the Statement of operations and changes in net assets.

The notional amount represents the highest potential liability of a contract and is not shown in the Statement of assets and liabilities.

e) Valuation of Total return swaps

A Total Return Swap (“TRS”) is a transaction in which the buyer receives the performance of an underlying asset and in return the buyer pays funding costs and generally, an arrangement fee. The underlying asset may be, but not limited to, a specific security, basket of securities, other instruments or an index.

TRS contracts are valued by reference to the mark to market value based on the market value of the underlying asset.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on total return swap contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on total return swaps” and the realised gain/loss under “Net realised gain/(loss) on total return swaps” in the Statement of operations and changes in net assets.

f) Valuation of Options

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specific amount of a financial instrument at a fixed price, either at a fixed future date or at any time within a specified year.

Options are valued by reference to the expected future cash flow based on the market implied performance, spot level and the volatility of the underlying asset(s).

In determining the accounting treatment for options, consideration is given to the nature of the instrument itself and the Fund’s Investment objective. When the underlying asset is acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium paid. When an option is closed, the difference between the premium and the cost to close the position is recorded under “Net realised gain/(loss) on options contracts” in the Statement of operations and changes in net assets. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

For Global Balanced Income Fund and Global Brands Equity Income Fund the premium received on written listed and OTC options is recorded as income. When an option is closed, the cost to close the position is recorded under “Net realised gain/(loss) on options contracts” in the Statement of operations and changes in net assets.

The market value of options purchased at fair value / options written at fair value is recorded in the Statement of assets and liabilities. The changes in unrealised gain/(loss) on options are recorded under “Net change in unrealised appreciation/(depreciation) on options contracts” in the Statement of operations and changes in net assets.

g) Valuation of Forward currency exchange contracts

A forward currency exchange contract is an agreement between two parties to exchange one currency for another at a specific price and date in the future.

All currency exchange contracts with maturity date greater than 2 business days from their trade dates are classified as Forward currency exchange contracts in line with MIFID II classification rule.

Open forward contracts are valued by reference to the last available currency rates prevailing at the relevant valuation point.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on forward currency exchange contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on forward currency exchange contracts” and the realised gain/loss under “Net realised gain/(loss) on forward currency exchange contracts” in the Statement of operations and changes in net assets.

h) Valuation of Financial futures contracts

A financial futures contract is a contractual agreement, to buy or sell a particular commodity or financial instrument at a pre-determined price in the future. Financial futures contracts detail the quality and quantity of the underlying asset and they are standardised to facilitate trading on a futures exchange.

Futures contracts are valued at the last available prices, on the exchanges for which the contracts are traded on, as at the valuation point.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on financial futures contracts” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on financial futures contracts” and the realised gain/loss under “Net realised gain/(loss) on financial futures contracts” in the Statement of operations and changes in net assets.

Notes to the financial statements (continued)

As at 31 December 2022

At the time the Fund enters into a financial futures contract the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is affected. Cash collateral paid/received to the broker as of 31 December 2022 is recorded as part of “Cash at bank and at brokers” and “Bank overdraft and due to broker” in the Statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealised appreciation/(depreciation) on financial futures contracts. When the contract is closed, the Fund records a “Net realised gain/(loss) on financial futures contracts” equal to the difference between the value of the contract at the time it was opened and the time it is closed.

i) Income and securities transactions

Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. For short term money market instruments the discount/premium is accreted/amortised on a daily basis until maturity or the sale of the instrument. Income from securities lending is recorded on a cash receipts basis. Income is recorded net of withholding tax.

Securities transactions are accounted for on a trade date basis, on the date the securities are purchased or sold. Realised gains or losses on the sale of securities are determined on the basis of the average cost method and are recorded under “Net realised gain/(loss) on sales of investments” in the Statement of operations and changes in net assets.

For the Global Asset Backed Securities Fund realised gains and losses on the sale of interest only mortgaged-backed securities are determined on a First In First Out (FIFO) basis of cost method and are recorded under “Net realised gain/(loss) on sales of investments” in the Statement of operations and changes in net assets.

j) Valuation of Repurchase agreements

Under a repurchase agreement, the Company purchases securities and agrees to re-sell them at a mutually agreed upon date and price. A repurchase agreement is collateralised by securities. Repurchase agreements are valued at cost with interest accrued from the date of purchase.

Repurchase agreements outstanding as at year end, if any, are included in the Statement of assets and liabilities. Net repurchase agreements income is included under “Bank interest” in the Statement of operations and changes in net assets.

k) Special Purpose Acquisition Companies (“SPACs”)

Certain Funds may invest in stock, warrants and other securities of special purpose acquisition companies or similar special purpose entities. A SPAC is typically a publicly traded company

that raises investment capital for the purpose of acquiring or merging with an existing company. Typically, the acquisition target is an existing private company that wants to trade publicly, which it accomplishes through an acquisition by, or combination with, a SPAC rather than by conducting a traditional initial public offering (“IPO”). A fund may acquire an interest in a SPAC in an IPO or a secondary market transaction. Unless and until an acquisition is completed, a SPAC generally invests its assets (less a portion retained to cover expenses) in U.S. government securities, money market securities and cash. A SPAC is a blank check company, meaning it does not have any operating history or ongoing business other than seeking to acquire an ongoing business hence, the value of their securities is particularly dependent on the ability of the entity’s management to identify and complete an attractive acquisition. The identity of the acquisition target is not known at the time of a SPAC’s initial public offering.

l) Private Investments in Public Equities (“PIPEs”)

A Fund may acquire equity securities of an issuer that are issued through a private investment in public equity transaction, including on a when-issued basis. PIPE transactions typically involve the purchase of securities directly from a publicly traded company or its affiliates in a private placement transaction including through a SPAC, typically at a discount to the market price of the company’s securities. The Fund’s PIPE investment represents an unfunded subscription agreement in a private investment in public equity. PIPEs are fair valued using the price of the publicly traded equity security as a baseline and deducting the percentage of discount realized on the original purchase unless it is believed that the issuance percentage discount no longer represents the difference in value between the publicly traded equity security price and the PIPE’s fair value. In these circumstances, the valuation will be determined prudently and in good faith pursuant to procedures established by the Board of Directors of the Company.

Shares in PIPEs generally are not registered with the SEC until after a certain time year from the date the private sale is completed. This restricted year can last many months. Until the public registration process is completed, PIPEs are restricted as to resale and a Fund cannot freely trade the securities.

Generally, such restrictions cause the PIPEs to be illiquid during this time. PIPEs may contain provisions that the issuer will pay specified financial penalties to the holder if the issuer does not publicly register the restricted equity securities within a specified year of time, but there is no assurance that the restricted equity securities will be publicly registered, or that the registration will remain in effect.

The unrealised gain/loss as at year end is recorded under “Unrealised gain/loss on Private Investment in Public Equity (PIPE)” in the Statement of assets and liabilities. The changes in such amounts are recorded under “Net change in unrealised appreciation/(depreciation) on Private Investment in Public

Notes to the financial statements (continued)

As at 31 December 2022

Equity (PIPE)” and the realised gain/loss under “Net realised gain/(loss) on Private Investment in Public Equity (PIPE)” in the Statement of operations and changes in net assets.

m) To Be Announced securities contracts (TBAs)

TBA contracts are forward contracts on agency mortgage pass-through securities issued by agencies such as Fannie Mae, Freddie Mac and Ginnie Mae. They are common trading practice in which a commitment to buy or sell a mortgage backed security for a fixed future proceed at a future date is given. The specific securities (i.e. specified mortgage pools) to be delivered or received are not identified at the trade date, but are “to be announced” on the notification date which is usually two days before the settlement date. The securities to be delivered must, however, meet specified criteria, including face value, coupon rate and maturity, and be within industry-accepted “good delivery” standards. TBAs are accounted for as derivatives when the settlement of the TBA trade is not expected to occur at the next regular settlement date or when a mechanism exists to settle the contract on a net basis. Amounts corresponding to payable due on settlement of TBA purchase is disclosed under “Payables on investments purchased” in the Statement of assets and liabilities. Negative positions in the Schedule of investments reflect the fund’s sale commitments of TBAs. The amount corresponding to the receivable due when the transaction is settled, is disclosed under “Receivables on investments sold” in the Statement of assets and liabilities. The realised gain/(loss) on TBAs and changes in unrealised appreciation/(depreciation) are disclosed in the Statement of operations and changes in net assets respectively under the headings “Net realised gain/(loss) on investments” and “Net change in unrealised appreciation/(depreciation) on investments”.

n) Translation of foreign currencies

Transactions in foreign currencies are translated into the currency of each Fund at the last available rate of exchange prevailing in a recognised market at the date of the transactions. Assets and liabilities denominated in foreign currencies are translated into the currency of each Fund at the last available rate of exchange prevailing in a recognised market at the date of the Statement of assets and liabilities.

The Combined statement of assets and liabilities is presented in US Dollars at the last available rate of exchange prevailing in a recognised market at the date of the Statement of assets and liabilities, while the combined Statement of operations and changes in net assets is presented in US Dollars at the average exchange rates ruling during the year.

The difference between opening net assets stated at exchange rates at the beginning of the year and their value at the end of the year is shown as “Translation difference” in the Statement of operations and changes in net assets.

The impact of translating the Statement of operations and changes in net assets at average exchange rates is included within the “Translation difference” in the Statement of operations and changes in net assets.

3 SECURITIES LENDING

Certain Funds may lend securities to qualified financial institutions, such as broker-dealers, to earn additional income. Any increase or decrease in the fair value of the securities loaned that might occur and any interest earned or dividends declared on those securities during the term of the loan would remain in the Fund. Funds that lend securities, receive securities as collateral in an amount equal to or exceeding 100% of the current fair value of the loaned securities. The collateral is marked to market daily, by the securities lending agent, to ensure that a minimum of 100% collateral coverage is maintained throughout the term of the loan. Securities lending income is generated as a result of securities on loan less compensation to the administrative agent. Net securities lending income is included in the Statement of operations and changes in net assets. See note 4(c) for related party disclosure on securities lending transactions, and “Appendix 8: Securities Financing Transactions” for further information on securities lending transactions.

The value of loaned securities, related collateral outstanding, identity of the counterparties, security lending income and associated operational costs and fees for the year ended 31 December 2022 are as follows:

Fund	Fund currency	Counterparty	Market value of securities on loan in Fund currency	Non cash collateral in Fund currency	Total collateral in Fund currency

4 RELATED PARTY TRANSACTIONS AND AFFILIATIONS

The Company has delegated to the Management Company MSIM Fund Management (Ireland) Limited under the overall supervision and control of the Board of Directors of the Company, its investment management services, central administration, registrar and transfer agency services as well as marketing, principal distribution and sales services, as more specifically detailed in the management company services agreement as well as in the prospectus of the Company.

MSIM Fund Management (Ireland) Limited is regulated by the Central Bank of Ireland to provide these services. The Management Company may delegate some of its tasks to other parties, as detailed below, subject to approval by the Company. The Management Company's liability to the Company for the performance of collective portfolio management and other delegated services has not been affected by such delegation.

The Management Company in turn delegates the investment management functions to Morgan Stanley Investment Management Limited known as the "Investment Adviser".

Under the terms of an investment advisory agreement, Morgan Stanley Investment Management Limited has been appointed as Investment Adviser with responsibility for providing discretionary asset management and investment advisory services to the Management company, such services to be provided in relation to all Funds. The Investment Adviser may delegate

Notes to the financial statements (continued)

As at 31 December 2022

any of its responsibilities to any other party subject to approval by the Board of Directors of the Company and the CSSF but the Investment Adviser shall remain responsible for the proper performance by such party of those responsibilities. A full list of sub-advisers can be found on pages 520 to 521.

Under the terms of the Management Company Services Agreement the Management Company is entitled to receive a Management Fee at the annual rates set out below. Under the Investment Advisory Agreements the Investment Advisers are entitled to receive a fee for their discretionary investment management and investment advisory services. Under the Distribution Agreement the Distributor is entitled to receive a fee for its distribution services. The fees of the Investment Adviser and the Distributor will be paid out of the Management Fee (except for distribution fees paid on class B as described in sub-section iv on page 496).

The annual Management Fee rates being charged as of 31 December 2022 are as follows and are as disclosed within the prospectus of the Company unless footnoted otherwise:

²³ As from 1 April 2022, the fee rate for Share class A, B and C was increased by 0.20%.

Notes to the financial statements (continued)

As at 31 December 2022

No Management Fee is payable in respect of Share Class Indicator N Shares.

In the case of any individual Fund or Class, the Management Company, the Investment Adviser(s) or/and Distributors may choose to waive or rebate all of their fees and charges or any portion thereof at their absolute discretion for an indefinite year, in order to reduce the impact such fee may have on the performance of the Fund or Class for instance where the net assets of the Fund or Class are of insufficient size.

Where the Funds invest into underlying investment funds that are managed by the Investment Adviser or its affiliates, the fees and charges of the underlying investment funds are rebated to the Funds to avoid duplicated Management Fees otherwise known as “double dipping”, with the rebate being included within Other income in the Statement of operations and changes in net assets.

The Funds are subject to the following:

- i) Management Fee at the levels described above. The Management Fee covers the fees of the principal distributor and the Investment Adviser.
- ii) A monthly Administration Charge payable to the Management Company at a maximum annual rate of 0.25% of the Funds’ aggregate average daily Net Asset Value attributable to all Classes of Shares of the Funds. The current fees are as follows:

Share Class Indicator	Administration Charge
A, B, C and F*	0.19%
I and J	0.14%
S	0.10%
N	0.10%
Z	0.10%

* Contingent administration fee waiver of 5bps applied to Global Brands Fund Class F has reduced their Administration Charge to 0.15%.

The Administration Charge will remain in force for an unlimited year and may be changed, subject to the maximum noted above, by the Company upon no less than one month’s prior written notice.

The Administration Charge will be utilised by the Company to pay the fees of the Administrator, the Transfer Agent, the Domiciliary Agent (affiliated party) and the Management Company (affiliated party). The Funds will also pay other expenses incurred in the operation of the Company out of the Administration Charge including, without limitation, formation expenses of new Funds, the fees of the Custodian, expenses for legal and auditing services, cost of any proposed listings, maintaining such listings, reporting and publishing expenses (including preparing, printing, advertising and distributing Shareholders’ reports and prospectuses), the remuneration of the Directors including all reasonable out-of-pocket expenses, registration fees and other expenses due to supervisory authorities in various jurisdictions, insurance, interest, and the costs of publication of the Net

Asset Value per Share, whether such publication is required for regulatory purposes or otherwise.

The Administration Charge for the year is disclosed in the Statement of operations and changes in net assets.

- iii) Specific Additional Costs in addition to the Administration Charge, including, without limitation, taxe d’abonnement, additional custody fees applicable to investment in emerging markets, hedging expenses and the costs relating to the subsidiaries. These Specific Additional Costs will remain in force for an unlimited year and may be changed by the Management Company upon no less than one month’s prior written notice.

These Specific Additional Costs are applicable as follows:

Share Class Indicator	Taxe d’abonnement
A, B, C, F and I	0.05%
J, N, S and Z	0.01%

Share Class Sub-Indicator	Hedging Expenses
H, H1 and H3	0.03%

Specific Additional Costs are made on the following Funds in addition to the Share Class costs above:

	Emerging Market Custody
China A-shares Fund, China Equity Fund	Up to 0.10%
Asia Opportunity Fund, Developing Opportunity Fund, NextGen Emerging Markets Fund, Emerging Leaders Equity Fund, Sustainable Emerging Markets Equity Fund, Indian Equity Fund, Latin American Equity Fund, Sustainable Asia Equity Fund	Up to 0.05%
Saudi Equity Fund	Up to 0.25%

- iv) A Distribution Fee (payable to the Management Company in relation to Share Class Indicator B shares only).

The Distributor is paid a distribution fee for the Equity Funds, Bond Funds, Asset Allocation Funds and Alternative Investment Funds, accrued daily and paid monthly, at the annual rate of 1.00% of the average daily Net Asset Value to Share Class Indicator B as compensation for providing distribution-related services to the Funds with respect to such Shares.

Where the Distributor and its affiliates invest on behalf of clients, or their clients invest directly into Share Class Indicator N Shares, such clients may pay, outside of the Fund, to the Distributor or its affiliates a base management fee, a performance fee or a mixture of both a base management fee and a performance fee.

- a) Morgan Stanley Investment Management Limited and the sub-advisers for the Company have entered into the following

Notes to the financial statements (continued)

As at 31 December 2022

types of transactions in which a connected person had a material interest:

- i) Transactions in relation to an investment in respect of which an affiliated firm benefited from a commission, fee, mark up or mark down; or
 - ii) Transactions in relation to a placing and/or a new issue in which the affiliated company was a member of the underwriting syndicate.
- All the transactions executed on behalf of the Company were entered into in the ordinary course of business and on normal commercial terms.
- b) The total aggregate value of the transactions of the Company effected through affiliated firms is USD 368,153,637; such transactions represent 0.45% of the total transactions. Total brokerage commission paid to affiliated firms is USD 65,068 at an average rate of commission of 0.02%.
 - c) The Company has entered into a securities lending contract with Morgan Stanley & Co. International Limited which is under normal commercial terms. The arrangement is exclusive in relation to certain securities.

The following Funds received securities lending income from the above named affiliates under an exclusive arrangement:

Fund Name	USD
Emerging Markets Corporate Debt Fund	364,128
Emerging Markets Debt Fund	16,334
Euro Bond Fund	65,070
Euro Corporate Bond – Duration Hedged Fund	61,288
Euro Corporate Bond Fund	459,997
European High Yield Bond Fund	359,890
Global Bond Fund	65,765
Global Fixed Income Opportunities Fund	357,407
Short Maturity Euro Bond Fund	240,260
	1,990,139

- d) The affiliations of the Board of Directors of the Company are as follows:

All the Directors of the Company, are also Directors of the Morgan Stanley Liquidity Funds.

Diane Hosie, a Director of the Company is also a Director of the Management Company MSIM Fund Management (Ireland) Limited (up to 31 January 2022). In addition Elaine Keenan, Chief Executive Officer and Director of the Management Company, Ruairi O’Healai and Zoe Parish are Managing Directors of Morgan Stanley Investment Management.

As at 31 December 2022, cross holdings in funds advised by the Investment advisers or an affiliate are as detailed in note 14 on page 505. Holdings in Morgan Stanley Liquidity funds are disclosed in the Statement of Investments.

As at 31 December 2022, the following Funds invested in the following investments, which are affiliates of the Investment Adviser:

Fund Name	Investments affiliated to the Investment Adviser
Global Asset Backed Securities Fund	MORGAN STANLEY ABS CAPITAL I INC TRUST 2003-NC8
Global Asset Backed Securities Fund	MORGAN STANLEY ABS CAPITAL I INC TRUST 2004-HE3
Global Asset Backed Securities Fund	MORGAN STANLEY ABS CAPITAL I INC TRUST 2004-HE8
Global Asset Backed Securities Fund	MORGAN STANLEY MORTGAGE LOAN TRUST 2004-7AR
Global Asset Backed Securities Fund	MORGAN STANLEY RESECURITIZATION TRUST 2015-R4
Global Fixed Income Opportunities Fund	MORGAN STANLEY RESECURITIZATION TRUST 2015-R4

The Company has entered into OTC swaps transactions to which Morgan Stanley acts as counterparty.

5 DIVIDEND POLICY

The Company offers Accumulating Share Classes, Distributing Share Classes and Discretionary Distributing Share Classes. The Company intends to declare dividends for the Distributing Share Classes and Discretionary Distributing Share Classes.

Approach to declaring dividends

Distributing Share Classes (Share Class Sub-Indicators “X” and “M”)

For the Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be equal to the net investment income attributable to such Classes (i.e. 100% of the net investment income).

For the Global Asset Backed Securities Fund, net investment income is considered to include net realised gains and losses from prepaid principal on mortgaged-backed and asset-backed securities for the purpose of the dividend policy.

For the Global Balanced Income Fund, net investment income is considered to include the premium received as a result of the Funds writing listed and OTC options for the purpose of the dividend policy.

For Global Brands Equity Income Fund, net investment income is considered to include income earned through receipt of premiums by taking exposure via one or more swaps to written options on equity securities and /or to indices for the purpose of the dividend policy.

Discretionary Distributing Share Classes (Share Class Sub-Indicators “R” and “RM”)

For the Discretionary Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be set at the discretion of the Board of Directors of the Company. The Discretionary Distributing Share Class may pay distributions from capital or may charge all or part of the Fund’s fees and expenses to the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal

Notes to the financial statements (continued)

As at 31 December 2022

of part of a Shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease of the Net Asset Value per Share. Where part or all of the fees and expenses of a Share Class are charged to the capital of that Share Class the result will be a reduction of the capital that the Share Class has available for investment in the future and capital may be eroded.

Further details on the Discretionary Distributing Share Classes will be included in the relevant key investor information document of the applicable Fund.

Frequency of Dividends

Equity Funds and Alternative Investment Funds – semi-annual dividend (Share Class Sub-Indicators “X” and “R”)

Both the Distributing Share Classes (Share Class Sub-Indicator “X”) and Discretionary Distributing Share Classes (Share Class Sub-Indicator “R”) aim to declare semi-annual dividends for Equity Funds (other than the Global Brands Equity Income Fund) and Alternative Investment Funds. Such dividends, if any, will be accrued on the last Dealing Day of June and December and declared on the next Dealing Day. The dividend declaration will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of July and January.

Bond Funds, Asset Allocation Funds and the Global Brands Equity Income Fund – quarterly dividend (Share Class Sub-Indicators “X” and “R”)

Both the Distributing Share Classes (Share Class Sub-Indicator “X”) and Discretionary Distributing Share Classes (Share Class Sub-Indicator “R”) aim to declare quarterly dividends for Bond Funds, Asset Allocation Funds and the Global Brands Equity Income Fund.

Such dividends, if any, will be accrued on the last Dealing Day of March, June, September and December and declared on the next Dealing Day. The dividend declaration, where issued, will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of January, April, July and October as applicable.

Monthly Distributing Share Class (Share Class Sub-Indicators “M” and “RM”)

Both the Distributing Share Classes (Share Class Sub-Indicator “M”) and Discretionary Distributing Share Classes (“Share Class Sub-Indicator “RM”) aim to declare monthly dividends. Such dividends, if any, will be accrued on the last Dealing Day of the month and declared on the next Dealing Day. The dividend declaration for these Distributing

Share Classes and Discretionary Distributing Share Classes, where issued, will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of the following month as applicable.

For the year ended 31 December 2022, the Fund paid dividends as follows:

Fund Name	Ccy	Share Class	Ex-Date	Pay Date	Record Date	Dividend per Share
Equity Funds						
Asian Property Fund	USD	IX	03/01/2022	06/01/2022	31/12/2021	0.159200

6 TAXATION

Under current law and practice, the Company is not liable to any Luxembourg income tax, or any Luxembourg capital gains tax on the realised capital appreciation of the assets of the Company nor are dividends paid by the Company liable to any Luxembourg withholding tax. The Company is, however, liable to annual subscription tax in Luxembourg ("taxe d'abonnement") calculated at the rate of 0.05% of the Net Asset Value of the funds. Furthermore, the Company has sought the benefit of a reduced annual tax rate of 0.01% for Share Classes where the whole of the Share Class is held by institutional investors as provided by Article 174 of the 2010 Law, likely those Shares with Share Class Indicators J, N, S or Z. This tax is payable quarterly on the basis of the net assets of the relevant Funds, calculated at the end of the quarter to which the tax relates. No stamp or other tax will

Notes to the financial statements (continued)

As at 31 December 2022

be payable in Luxembourg in connection with the issue of Shares of the Company, except a once and for all tax of EUR 1,239.47 which was paid upon incorporation.

Pursuant to Article 175 of the 2010 Law, subscription tax is not payable on the value of the assets of the Funds represented by investments in other Luxembourg undertakings for collective investment which are themselves subject to the subscription tax.

Subscription tax is calculated by reference to the net assets of the relevant Fund or Share Class at the end of each calendar quarter. Subscription tax will be paid from the tax d'abonnement Specific Additional Cost described in the prospectus. Any difference between the Specific Additional Costs collected and the tax payable will be paid by or credited to the Management Company.

Dividends, interest and capital gains on securities held by the Company may be subject to non-recoverable withholding tax or capital gains tax in the country of origin.

The below Funds had a provision for Indian Capital Gains Tax net of any refunds as at the year end, the amounts are included within the "Provision for foreign tax" on the Statement of Assets and Liabilities:

Fund Name	Fund currency	Provision at 31 December 2022 (in fund currency)
Asia Opportunity Fund	USD	7,825,782
Developing Opportunity Fund	USD	146,595
Emerging Leaders Equity Fund	USD	5,818,180
Global Opportunity Fund	USD	43,311,943
Sustainable Asia Equity Fund	USD	117,561
Sustainable Emerging Markets Equity Fund	USD	813,674

Please refer to the Company's prospectus for further information on taxation.

7 RATES OF EXCHANGE

8 SOFT COMMISSION ARRANGEMENTS

In compliance with the MiFID II requirements, research costs are borne by the Investment Adviser and paid for separately from transaction costs. Transaction costs are charged on an execution only basis. The only exception to this is the Morgan Stanley Investment Funds – Japanese Equity Fund, where the "unbundling" of research and dealing commissions is not possible due to the local Japanese regulatory requirements not allowing for separate payment of research costs.

9 STATEMENTS OF PORTFOLIO CHANGES

A statement giving the changes in the portfolio of investments for the year ended 31 December 2022 is available to shareholders, free of charge, on request from the Company's registered office, and also from the Paying Agents in countries where the company is registered to sell its Shares.

Please see list of Paying Agents on page 511.

10 OVERDRAFT FACILITY

The Company has access to a short-term credit extension facility with J.P. Morgan SE, Luxembourg Branch, primarily to facilitate the clearance of securities and foreign exchange transactions and in connection with abnormal redemption activity. Should such credit be extended, the Custodian shall be entitled to charge the Funds at rates to be agreed upon from time to time. In addition to any other remedies available, the Custodian shall be entitled

Notes to the financial statements (continued)

As at 31 December 2022

to a right of set-off against the property of the Company to satisfy the repayment of, or reimbursement for accrued interest thereon.

There is no cross liability between the funds of the Company therefore the Custodian only has a right of set-off of the pool of assets of the fund that is relative to the overdraft.

11 LIABILITY OF THE COMPANY

The Board of Directors of the Company shall maintain for each Fund a separate pool of assets. As between Shareholders, each pool of assets is invested for the exclusive benefit of the relevant Fund.

The assets of the Company have been segregated on a Fund by Fund basis with third party creditors only having recourse to the assets of the relevant Fund.

12 BROKER ACCOUNTS

All derivative instruments and time deposits, as listed within the Schedule of Investments, on pages 7 to 432, are transacted through third party brokers.

In addition these brokers hold the collateral described in the above mentioned statements as applicable. The Funds are exposed to counter-party risk in respect of all amounts including collateral due to them from such brokers.

Payments of income and settlement proceeds are at the risk of the Funds.

The collateral and margin accounts received and paid by the Fund is listed within the Schedule of Investments, on pages 7 to 432.

Margin account transactions with brokers are added or deducted from the Net Asset Value.

13 TRANSACTION COSTS

For the year ended 31 December 2022, the Fund incurred transaction costs namely, commission and taxes relating to purchases or sales of transferable securities, money market instruments, exchange traded derivatives or other eligible assets. They can include the bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges.

15 ANTI-DILUTION MEASURES

As investors enter or exit a fund, the potential purchase and sale of securities may incur trading costs such as bid/ask spreads, brokerage fees, transaction charges and taxes. These costs are charged to the fund and are borne by all remaining shareholders of the fund, an effect known as dilution which can impact the remaining shareholders’ returns on their investment in the fund.

In order to protect remaining shareholders from dilution, the Management Company may adjust the NAV of a Fund to reflect these estimated trading costs, a mechanism known as swing pricing.

When net investor activity in a Fund exceeds a certain threshold (“Swing Threshold”) on a given Dealing Day, the NAV is adjusted by a factor (“Swing Factor”), upwards in case of net subscriptions and downwards in case of net redemptions. In either case, the swung NAV applies to all transactions, regardless of direction, not the specific circumstances of each individual investor transaction.

For each Fund, the Swing Factor shall not exceed 2% of the NAV in normal market conditions, however, the Management Company may decide to temporarily increase this limit in exceptional circumstances (e.g. stressed or dislocated markets resulting in increased trading costs beyond the 2% cap) to protect Shareholders’ interests.

As at 31 December 2022, there was no swing recorded.

All Funds were swung during the year with the exception of the following Funds:

American Resilience Fund, Asia Opportunity Fund, Calvert Sustainable Climate Transition Fund, Calvert Sustainable Developed Europe Equity Select Fund, Calvert Sustainable Diversity, Equity and Inclusion Fund, Calvert Sustainable Emerging Markets Equity Select Fund, Calvert Sustainable US Equity Select Fund, China A-shares Fund, China Equity Fund, Europe Opportunity Fund, Global Brands Equity Income Fund, Global Brands Fund, Global Focus Property Fund, Global Infrastructure Fund, Global Infrastructure Unconstrained Fund, Global Opportunity Fund, Japanese Small Cap Equity Fund, NextGen Emerging Markets Fund, Sustainable Asia Equity Fund, US Advantage Fund, US Focus Property Fund,

Notes to the financial statements (continued)

As at 31 December 2022

US Growth Fund, US Permanence Fund, US Value Fund, Vitality Fund, Calvert Sustainable Global Green Bond Fund, Euro Strategic Bond Fund, European Fixed Income Opportunities Fund, Global Fixed Income Opportunities Fund, Short Duration US Government Income Fund, Short Maturity Euro Bond Fund, Sustainable Euro Strategic Bond Fund, Sustainable Global High Yield Bond Fund, Sustainable US High Yield Bond Fund, Global Balanced Defensive Fund, Global Balanced Fund, Global Balanced Risk Control Fund of Funds, Global Balanced Sustainable Fund and Multi-Asset Risk Control Fund.

16 INDEMNIFICATIONS

The Company has arrangements in place for the indemnification of the members of its Board of Directors, and of its service providers (the “Indemnified Parties”) in certain circumstances, which exclude the Indemnified Parties’ own negligence, wilful default, or fraud. The Company’s service providers include the Management Company, the Investment Advisers, the Sub-Investment Advisers, the Custodian, the Administrator and Paying Agent, the Distributor and the Registrar and Transfer Agent.

17 DIRECTORS’ REMUNERATION

The Directors of the Company are entitled to remuneration at an annual rate of EUR 65,000 per director. In addition the appointed Chairman receives EUR 10,000 per annum.

The Administration charge is utilised to pay the remuneration of the Directors including reasonable out-of-pocket expenses. Directors fees remain ultimately subject to approval by the Company’s shareholders.

18 EPIDEMICS/PANDEMICS/OUTBREAKS RISK

The performance of the Shares depends on the performance of the investments of the Funds, which could also be adversely affected by the effects of epidemics, pandemics or outbreaks of communicable diseases. In response to intensifying efforts to contain epidemics, pandemics or outbreaks of communicable diseases, governments around the world may take a number of actions, such as prohibiting residents’ freedom of movement, encouraging or ordering employees to work remotely from home, and banning public activities and events, among others. Any prolonged disruption of businesses could negatively impact financial conditions. The performance of the Shares could be adversely affected to the extent that any of these epidemics, pandemics or outbreaks harms the economy in general.

19 SUBSEQUENT EVENTS

Effective 7 February 2023, Morgan Stanley Investment Funds – Floating Rate ABS Fund was launched.

Effective 28 February 2023, Morgan Stanley Investment Funds – Global Credit Opportunities Fund was launched.

Effective 28 February 2023, Morgan Stanley Investment Funds – Short Maturity Euro Corporate Bond Fund was launched.

Effective 22 March 2023, Morgan Stanley Investment Funds – Multi-Asset Risk Control Fund was closed.

Independent Auditor's Report

To the Shareholders of
Morgan Stanley Investment Funds
6B, route de Trèves
L-2633 Senningerberg
Luxembourg

Opinion

We have audited the financial statements of Morgan Stanley Investment Funds (the "Company") and of each of its Funds, which comprise the statement of assets and liabilities and the schedule of investments as at 31 December 2022, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its Funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the financial statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's and each of its Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or any of its Funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent Auditor's Report (continued)

As at 31 December 2022

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSE, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's or any of its Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Company or any of its Funds (except for the Fund where a decision of an intention to close exists) to cease to continue as a going concern.
- In respect of the Fund where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Company's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Appendix 1: Fund expense ratios (unaudited)

As at 31 December 2022

The following figures show the total expenses charged to each Class of each Fund open as at 31 December 2022, calculated net of any fee waivers and expressed as a percentage of average net assets for the year. For further information in relation to the expenses charged to the Funds, please refer to pages 450 to 466. For details of changes to the Management Fee during the year, please refer to note 4. Reported expense ratios may differ from the on-going charges figures due to accounting adjustments and/or significant movement in the total net assets for each Share Class within the year.

Appendix 4: Hedged Share Classes (unaudited)

As at 31 December 2022

The Board of Directors of the Company may decide from time to time for some or all of the Funds to issue Currency Hedged Share Classes.

Currency Hedged Share Classes seek to reduce the currency exposure of the Shareholder to currencies other than the currency in which the Currency Hedged Share Class is denominated (the “Hedged Share Class Currency”). The hedging process will vary depending on the type of fund for which the Currency Hedged Share Class is issued and the hedging strategy adopted for all the Currency Hedged Share Classes in that particular Fund, as defined by the prospectus. The types of Currency Hedged Share Class are as follows:

NAV Hedged Share Classes (Share Class Sub-Indicator “H”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency to the Hedged Share Class Currency without reference to its Investment Currencies.

Portfolio Hedged Share Classes (Share Class Sub-Indicator “H1”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund’s Investment Currencies. This involves hedging the Fund’s Investment Currencies back to the Hedged Share Class Currency without reference to its Reference Currency.

Index Hedged Share Classes (Share Class Sub-Indicator “H2”) seek to reduce exposure to currency movements between the Hedged Share Class Currency and the currencies of a Fund’s benchmark index (“Index Currencies”). This involves hedging the Fund’s Index Currencies back to the Hedged Share Class Currency without reference to the Fund’s Reference Currency or its Investment Currency.

NAV Hedged (Non-deliverable Currency) Share Classes (Share Class Sub-Indicator “H3”) seek to reduce exposure to currency movements between a non-deliverable Hedged Share Class Currency and the Fund’s Reference Currency. This involves hedging the Fund’s Reference Currency back to the Hedged Share Class Currency without reference to its Investment Currencies. As the Hedged Share Class Currency is non-deliverable the Share Class will be denominated in a currency other than the Hedged Share Class Currency for the purposes of subscription and redemption.

There is no segregation of liabilities between the different share classes of the same Fund. As such, under certain conditions, there is a remote risk that transactions specific to a Hedged Share Class could result in liabilities which may exceed the assets of that Hedged Share Class. In such a scenario, any excess liabilities could adversely impact the Net Asset Value of other share classes within the same Fund, as the assets of other share classes would be exposed to the excess liabilities of the Hedged Share Class. The Management Company has put in place a number of measures and controls as part of its risk management framework in order to prevent such an event, hence the risk of such ‘cross contamination’ is considered by the Management Company to be extremely low.

The hedging strategies adopted at the year end are as follows:

Fund Name	Hedged Share Class(es)	Hedging Strategy
American Resilience Fund ¹	AH (EUR), BH (EUR), CH (EUR)	NAV Currency Hedged Share Classes
Asia Opportunity Fund	AH (EUR), BH (EUR), CH (EUR), IH (EUR), IH (GBP), JH (GBP), ZH (EUR), ZH (GBP), ZH3 (BRL)	NAV Currency Hedged and Non-deliverable Currency Hedged Share Classes

Appendix 6: Risk Measurement and Global Exposure (unaudited) As at 31 December 2022

As per ESMA/10 –788 “Guidelines on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS” on annual report disclosure requirements, the Global Exposure table below outlines the following information:

- Each Fund’s approach to measuring global exposure.
- Where the Fund is using relative VaR to measure global exposure the reference portfolio is provided.
- Lowest, average and highest relative VaR or absolute VaR for each Fund measuring global exposure on the VaR approach (note these numbers are actual VaR and relative VaR numbers and do not represent utilisation levels of the regulatory limit).
- Relevant regulatory limit for the Funds global exposure approach for Funds using VaR approach.
- Average leverage is given at the Fund level where the Fund uses the VaR approach to measure global exposure.
- Leverage is calculated using the sum of the notionals approach and the commitment approach.

Fund Name	Asset Class	Global Exposure Methodology	Reference Portfolio	Regulatory Limit				Expected Gross Leverage	Average Leverage (Sum of Notionals)
				Lowest	Average	Highest			
Absolute Return Fixed Income Fund	Fixed Income	Absolute VaR	-	20%	1.5%	2.2%	3.9%	160%	48%

Appendix 6: Risk Measurement and Global Exposure (unaudited) (continued) As at 31 December 2022

The Risk Criteria table below indicates the risk model type and inputs for the VaR calculation based on asset class, which is also displayed in the Global Exposure table above:

Asset Class	Calculation Model	Confidence Interval	Holding Period	Length of Data History
Alternatives / Asset Allocation	Parametric	99%	20 days	Weekly observations exponentially weighted with a 26-week (6 months) half-life using 2 years of data, changed in Q3 to exponentially weighted with a 52-week (1 year) half-life using 3 years of data
Equity	Parametric	99%	20 days	The MSCI Barra model uses daily observations with two different half-lives – 252 for volatilities and 504 for correlations.
Fixed Income	Parametric	99%	20 days	Monthly observations equally weighted using 5 years of data

Appendix 7: Remuneration Policy of the Management Company (unaudited)

As at 31 December 2022

UCITS 2022 Remuneration Disclosure by MSIM Fund Management (Ireland) Limited to Morgan Stanley Investment Funds

1. Legal background

This remuneration disclosure has been prepared as required by, and in accordance with, the guidance provided in (1) EU Commission Recommendation on remuneration policies in the financial services sector (2009/384 EC) dated 30 April 2004 ; (2) EU Directive 2009/65/EC (as amended by Directive 2014/91/EU) (“the **UCITS Directive**”); and (3) the European Securities and Markets Authority “Guidelines on sound remuneration policies under the UCITS Directive”, (ESMA/2016/575) dated 14 October 2016 (“the **Guidelines**”) and in particular with section 14.1 (headed “External Disclosure”).

The data used in the analysis for this disclosure relates to the financial year ending 31 December 2022 of Morgan Stanley (“the **Firm**”) and to the remuneration of staff of Morgan Stanley Fund Management (Ireland) Limited (“the **UCITS Management Company**”) and its senior management team and other members of its staff whose actions have a material impact on the risk profile of the UCITS it manages or on the UCITS Management Company itself (“**Identified Staff**”).

2. The “Identified Staff” for the purposes of this disclosure

The Guidelines define “Identified Staff” as follows:

- a) “responsible for heading the investment management, administration, marketing, and any employee receiving total remuneration that falls into the remuneration bracket of senior management and risk takers, whose professional activities have a material impact on the management company’s risk profile or the risk profiles of UCITS that it manages” (“**Group A**”); and
- b) “categories of staff of the entity(ies) to which investment management activities have been delegated by the management company and whose professional activities have a material impact on the UCITS’s risk profile or the risk profiles of UCITS that the UCITS management company manages” (“**Group B**”).

References in this disclosure letter to “Identified Staff” or to staff in Group A or Group B, should be construed accordingly.

Ten Identified Staff are employed or paid by the UCITS Management Company itself. All of the remaining Identified Staff are employees of other Morgan Stanley entities whose professional activities are considered to have a material impact on the risk profile of the UCITS managed by the UCITS Management Company, taking into consideration the internal organisation, nature, scope and complexity of the UCITS Management Company and the UCITS it manages.

The Identified Staff within Group A are staff who have been employed by or seconded to the UCITS Management Company and who are therefore subject to the Guidelines as adopted by the Central Bank of Ireland (CBI).

The Identified Staff in Group B are staff of one of the Morgan Stanley group entities to which the portfolio management of one or more of the UCITS Management Company’s Funds has been delegated pursuant to Article 13 of the UCITS Directive. They are not seconded to, or performing a function of, the UCITS Management Company. Accordingly they are not staff of the UCITS Management Company. Where appropriate they are subject to UCITS rules on remuneration.

3. Process for determining remuneration policies and principles

The UCITS Management Company, as an affiliate of Morgan Stanley, benefits from the resources available within the Firm and is subject to the remuneration policies and practices that are applied on a Firm-wide level, including the Global Incentive Compensation Discretion Policy and the Global Compensation Policy.

In determining, maintaining and implementing the remuneration policies and practices applicable to the UCITS Management Company, including Identified Staff, the UCITS Management Company is subject to the remuneration policies and practices that apply to all Morgan Stanley International Limited (MSI) group entities as well as those applying to Morgan Stanley globally and may consult, or receive guidance from, the Firm’s control functions and relevant remuneration committees to ensure consistency. Remuneration policy is designed to satisfy four key Firm-wide remuneration objectives: (i) deliver pay for sustainable performance, (ii) align remuneration with shareholders’ interests, (iii) attract and retain top talent, and (iv) mitigate excessive risk-taking.

In support of these objectives, annual compensation (i.e. remuneration) for the majority of the Firm’s employees, including Identified Staff, is comprised of two key elements: fixed remuneration and variable remuneration (variable incentive remuneration) that is discretionary based on, among other factors, Firm performance measured against risk-adjusted metrics and individual and business segment performance.

The committee that manages remuneration for the Firm is the Compensation, Management Development and Succession Committee (CMDS Committee) of the Morgan Stanley Board of Directors. As of 31 December 2022, it consisted of four directors, all of whom are

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2022

independent under the New York Stock Exchange listing standards. Each year, the CMDS Committee's mandate is to review the Firm-wide aggregate variable remuneration pool for variable incentive remuneration and to review and approve the design and structure of Morgan Stanley's Firm-wide deferred incentive remuneration programs, including the form of deferred incentive remuneration awards to be granted, the portion of variable incentive remuneration to be deferred, and the vesting, payment, cancellation and clawback provisions of deferred incentive remuneration awards. The CMDS Committee has adopted the Global Incentive Compensation Discretion Policy, which applies to all Firm entities worldwide and sets forth guidance for managers on the use of discretion and considerations for assessing risk management and outcomes when making variable incentive remuneration decisions, and considerations for assessing risk management and outcomes. It has also approved the Global Compensation Policy which covers compensation philosophy and objectives, framework and governance.

In addition, the Board of the UCITS Management Company has adopted a remuneration policy (the "MSIM Fund Management (Ireland) Limited Remuneration Policy") in compliance with UCITS and the Guidelines as adopted by the CBI.

The policy is also appropriate to the UCITS Management Company's size, internal organization and the nature, scope and complexity of its activities. As well as complying with all of the UCITS management company's legal obligations, the principles of the MSIM Fund Management (Ireland) Limited Remuneration.

Policy support the business strategy, objectives, values and long-term interests of its clients, including the Fund. In particular, the MSIM Fund Management (Ireland) Limited Remuneration Policy is designed to ensure that remuneration is consistent with and promotes sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the UCITS managed by the UCITS Management Company.

When determining its own remuneration decisions or influencing the decisions made by other Morgan Stanley entities, the UCITS Management Company takes fully into account and complies with (1) Irish, UK and EU legislation; (2) the MSIM Fund Management (Ireland) Limited Remuneration Policy and CBI requirements; and (3) the requirements of other remuneration policies set by the Firm. In doing so, it applies consistent principles with the objective of aligning the incentivisation of Identified Staff with business objectives, supporting the delivery of the UCITS Management Company's business plans and corporate values, avoiding conflicts of interest and enabling the right calibre of staff to be recruited. The UCITS Management Company always seeks to ensure, therefore, that the remuneration principles applied by it and the Firm are consistent with and promote sound and effective risk management and do not encourage risk-taking that is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS managed by the UCITS Management Company.

The following considerations are taken into account in the design, implementation and oversight of the UCITS Management Company's remuneration policies and practices:

- Overall corporate governance principles and structures as well as their interactions with the remuneration;
- The inputs provided by all control functions (i.e. human resources, risk management, compliance, internal audit, etc.), which will be properly involved in the design of the Remuneration Policy, as further described below; and
- The clear distinction between operating and control functions, the safeguards for preventing conflicts of interests and the internal reporting system.

4. Involvement of control functions in risk management and the remuneration of those control functions

The control functions of the Firm assist the UCITS Management Company in implementing its overall remuneration strategy, having regard to operational, liquidity, market and counterparty risks.

In particular:

- a. The Risk Management function helps to ensure that the structure and design of remuneration arrangements does not encourage risk taking that is inconsistent with the risk profile of the UCITS managed by the UCITS Management Company;
- b. The Human Resources and Compliance functions analyse how the remuneration structure affects the UCITS Management Company's compliance with legislation, regulations and internal policies;
- c. The Internal Audit function periodically carries out an independent audit of the design, implementation and effects of Morgan Stanley's remuneration policies;
- d. The EMEA Remuneration Oversight Committee (ERO) provides formal oversight of EMEA remuneration matters to ensure remuneration practices in EMEA are compliant with relevant UK and EU legislation and follow good practice standards. The

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2022

membership of the EROC is made up of the EMEA control function heads as well as the EMEA Chief Executive Officer. The EROC reviews activities of the UCITS Management Company that may lead to individual or collective adjustments of remuneration for its employees; and

- e. The MSI Remuneration Committee was established with effect from 1 January 2017. It is appointed by the Board of Directors of MSI to assist in discharging its obligations in relation to remuneration matters of MSI and its subsidiaries (the MSI Group) and identified material risk takers. Its remit includes reviewing the remuneration policies and practices of the UCITS Management Company in accordance with the UCITS Directive and the Guidelines.

The Control Functions, including Risk Management, Compliance, Finance, Internal Audit, and Human Resources, along with Legal, are independent from the businesses they monitor. Those engaged in control functions are remunerated in accordance with objectives linked to their functions. Their objectives are independent of the financial performance of the UCITS of the UCITS Management Company. Potential conflicts that may arise in relation to individual remuneration decisions are mitigated by the independent role of Human Resources in the year end remuneration process.

5. Design and structure of remuneration

Remuneration paid to Identified Staff is awarded in accordance with Morgan Stanley principles relating to remuneration. Annual remuneration is comprised of two key elements: fixed remuneration and variable remuneration. Staff eligibility for annual incentive compensation (variable remuneration) is discretionary and subject to a multi-dimensional performance measurement, which considers, as applicable, the performance of the individual, the UCITS Management Company, the business segment and the Firm.

Identified Staff receive a total annual remuneration package consisting of fixed pay that is comprised of base salary and, in certain circumstances, one or more allowances that are reviewed at least annually; and variable remuneration¹, payable partially as a cash bonus and partially in the form of deferred incentive remuneration awards. The amount of variable incentive remuneration is discretionary and is determined on the basis of, but not limited to, a variety of factors, including performance measured against risk-adjusted metrics and individual performance. It is possible that an individual could be awarded no variable incentive remuneration. Deferred incentive remuneration awards are typically subject to vesting over a multi-year period and are subject to cancellation until the payment date for competition, cause (i.e., any act or omission that constitutes a breach of obligation to the Company, including failure to comply with internal compliance, ethics or risk management standards, and failure or refusal to perform duties satisfactorily, including supervisory and management duties), disclosure of proprietary information, and solicitation of employees or clients. Awards are also subject to malus until the payment date if an employee's act or omission (including with respect to direct supervisory responsibilities) causes a restatement of the Firm's consolidated financial results, constitutes a violation of the Firm's global risk management principles, policies and standards, or causes a loss of revenue associated with a position on which the employee was paid and the employee operated outside of internal control policies.

The UCITS Management Company competes for access to talent globally with investment management firms, private equity firms, hedge funds, investment banks, brokerage firms and other companies offering financial services, and the UCITS Management Company's ability to sustain or improve its position in this highly competitive environment depends substantially on its ability to continue to attract and retain the most qualified individuals. In support of the UCITS Management Company's recruitment and retention objectives, the Firm continually monitors competitive pay levels and structures its incentive awards to include, among other things, vesting, deferred payment and cancellation provisions that protect the UCITS Management Company's interests and align the interests of Identified Staff with those of the UCITS' investors.

The Firm's Global Incentive Compensation Discretion Policy requires compensation managers to consider only legitimate, business related factors when exercising discretion in determining variable incentive compensation, including adherence to Morgan Stanley's core values, conduct, disciplinary actions in the current performance year, risk management and risk outcomes. The policy specifically provides that all managers must consider whether or not an individual managed risk appropriately and effectively managed and supervised the risk control practices of his or her reports during the performance year. Compensation managers are trained on the Global Incentive Compensation Discretion Policy and are required to certify that they have followed the requirements of that policy and have escalated situations potentially requiring attention.

¹ The Firm does not award variable remuneration to a non-executive director for their non-executive director role.

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2022

Other performance criteria that may be taken into account in deciding whether to award, and the amount of any variable incentive remuneration to award, includes (but is not limited to):

- business and market conditions;
- individual conduct, including but not limited to, adherence to Morgan Stanley's code of conduct and policies;
- contribution to the performance and profitability of the business unit, the UCITS Management Company and the Firm;
- contribution to the strategic objectives of the UCITS Management Company, business unit, the Firm and the team;
- revenue and profitability of funds managed by a portfolio manager;
- assets managed by a portfolio manager; and
- contribution to client objectives.

6. Quantitative remuneration disclosure²: scope of disclosure

We are required to disclose and include in this report certain aggregate remuneration details for (1) the entire staff of the UCITS Management Company³, (2) the UCITS Management Company's senior management team and other members of its staff whose actions have a material impact on the risk profile of the UCITS the UCITS Management Company manages or on the UCITS Management Company itself⁴, and (3) the staff of the delegate of the UCITS Management Company to whom investment management functions (including risk management) have been delegated.

We have included in our disclosure the relevant remuneration information details for all Identified Staff i.e. for those in Group A and Group B (defined above).

7. Quantitative remuneration disclosure: financial information

On the basis of (1) our own financial records for staff in Group A and (2) the financial information supplied to us (pursuant and subject to their respective sectoral and jurisdictional obligations, both legal and regulatory) by entities to which relevant investment management activities have been delegated (the "Delegate Companies"), the requisite remuneration information in respect of the 2022 financial year ending 31 December 2022, was as follows:

- a. The total fixed remuneration paid to all staff of the UCITS Management Company's was USD 3,270,000.
- b. The total variable remuneration (variable incentive compensation) paid to all staff of the UCITS Management Company was USD 8,120,000.
- c. The number of individuals included as UCITS Management Company's staff was 141.
- d. The total remuneration (fixed and variable combined) paid to senior management and other members of staff whose actions have a material impact on the risk profile of the UCITS or on the UCITS Management Company itself was USD 11,390,000.

8. Quantitative remuneration disclosure: rationale for apportionment

In calculating the "remuneration paid" to the staff in a) to d) above, we have, in accordance with the UCITS Directive and the Guidelines, adopted a proportionate approach and included a relevant proportion of staff's total remuneration. The apportionment method takes in to account a number of factors including, but not limited to; number of accounts managed by investment managers, number of accounts of the contracting entity, headcount of the Investment Management business as a proportion of the Institutional Securities Group and Investment Management Group overall headcount.

MSIM Fund Management (Ireland) Limited

January 2023

² Identified Staff and their associated remuneration are not allocated to individual UCITS so a breakdown by UCITS Fund does not exist and is not readily available.

³ Article 69 (3) (a) of the UCITS Directive.

⁴ Article 69 (3) (b) of the UCITS Directive and section 14 of the Guidelines.

Appendix 8: Securities Financing Transactions (unaudited)

As at 31 December 2022

The Company engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the Company's only involvement in and exposures related to securities financing transactions is its engagement on securities lending activities and Total Return Swaps for the year ended 31 December 2022 as detailed below:

SECURITIES LENDING

Global Data

Amount of securities on loan and amount of assets engaged in securities lending transactions

The following table represents the total value of assets engaged in securities lending as at the year end date. The total value of securities on loan as a proportion of the Funds' total lendable assets as at the year end date is also detailed below. Total lendable assets represents the aggregate value of asset types forming part of the Funds' securities lending programme.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of securities lending transactions as at the reporting date. The Company is protected from borrower default by an indemnification provided by the lending agent, J.P. Morgan SE. If a borrower defaults, the lending agent would sell the collateral and use the proceeds to purchase the security that was not returned in the market. If the proceeds from the sale of the collateral are not enough to purchase the security the lending agent is liable for the difference. Therefore it is the lending agent (J.P. Morgan SE) who has the liability.

As at 31 December 2022

Aggregate transaction data

Type and quality of collateral

Non-cash collateral received by each Fund in respect of securities lending transactions as at the reporting date is in the form of government bonds issued by the following countries: Austria, Belgium, Germany, Finland, France, UK, Netherlands and USA.

All of the Funds' securities collateral have a credit rating of investment grade. Quality of collateral has been interpreted as pertaining to bond instruments, which have been assessed and reported in accordance with whether they are considered investment grade, below investment grade or not-rated. These designations are derived from the credit rating issued to the security or its issuer by at least one globally recognised credit rating agency, such as Standard & Poor's and Moody's. Bond instruments with a credit rating between 'AAA' and 'BBB' are deemed as investment grade. Credit ratings for bonds below these designations are considered below investment grade.

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point and therefore have a maturity tenor of one day.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section “Top Ten Counterparties” on page 539.

Settlement and clearing

The Company’s securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Re-use of collateral

Non-cash collateral received by a Fund may not be sold, re-invested or pledged. As the collateral in receipt for securities lending is entirely in the form of securities, there is no reuse of securities lending collateral.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2022

Safekeeping of collateral

Collateral received

J.P. Morgan SE, Luxembourg Branch, as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan SE, Luxembourg Branch is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Return and cost

The total income earned from securities lending transactions is split between the relevant Funds and the securities lending agent. Details of this split are disclosed in note 3 to the financial statements on pages 493 to 494. Income earned during the year by the Funds from securities lending transactions is disclosed in the statement of operations and changes in net assets on pages 450 to 466.

TOTAL RETURN SWAPS

Global Data

Amount of assets engaged in Total Return Swaps

The following table represents the total value engaged in Total Return Swaps as at year end:

Fund Name	Fund Currency	Unrealised Gain and Loss in Fund Currency (in absolute value)	% of Total Net Asset Value
Global Brands Equity Income Fund	USD	779,373	0.15
Global Multi-Asset Opportunities Fund	EUR	50,422	0.89

Concentration Data

Ten largest collateral issuers

There are no collaterals received in respect of total return swap contracts. Therefore the ten largest collateral issuers disclosure is not applicable.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of the total return swaps as at the reporting date. It also includes all counterparties in respect of the total return swaps at the year end date.

Counterparties	Incorporation Country	Unrealised Gain and Loss in Fund Currency (in absolute value)	
		Global Brands Equity Income Fund	Global Multi-Asset Opportunities Fund
		USD	EUR
Barclays Bank PLC	United Kingdom	–	33,074
BNP Paribas	France	–	17,348
Morgan Stanley & Co. International PLC	United States of America	779,373	–

Aggregate transaction data

Type and quality of collateral and currency of collateral

This disclosure is required for collateral received only where there is a counterparty risk.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2022

At the time of writing, it is not possible to identify the value of cash collateral specific to the different types of OTC derivatives where multiple types of OTC derivatives are traded with the same counterparty. This is a consequence of counterparties calculating and recording cash collateral based on the aggregated position of all OTC derivatives traded between the counterparty and its client. This calculation methodology is compliant with the International Swaps and Derivatives Associations, Inc. Master Agreement (“ISDA Master Agreement”) in place and is considered standard market practice within the industry. As a result, it is not practically possible to disclose cash collateral values specific to individual positions held by the Funds in total return swaps. Any cash collateral disclosures provided below are in respect of all OTC derivative transactions entered into by the Funds under the ISDA Master Agreement, not just total return swaps.

Maturity tenor of total return swaps transactions

The following table provides an analysis of the maturity tenor in respect of the total return swaps as at the year end date:

Maturity	Unrealised Gain and Loss in Fund Currency (in absolute value)	
	Global Brands Equity Income Fund	Global Multi-Asset Opportunities Fund
	USD	EUR
1 day	-	-
2 to 6 days	-	-
1 to 4 weeks	-	-
1 to 3 months	-	-
3 to 12 months	779,373	50,422
more than 1 year	-	-
open maturity	-	-

The above maturity tenor analysis has been based on the contractual maturity date.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section “Top ten counterparties” on page 539.

Settlement and clearing

OTC derivative transactions are entered into by the Funds under an ISDA Master Agreement, a bilateral agreement between the Funds and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

Re-use of collateral

Cash collateral received in respect of OTC derivative transactions was invested from time to time for certain Funds as foreseen with the Company’s prospectus. The performance returns from the re-use of cash collateral are not available.

The returns below for Morgan Stanley Liquidity Funds, a UCITS advised by an affiliate of the Investment Adviser, represent a reasonable estimate of returns received from the re-investment of cash collateral for the year ended 31 December 2022:

Morgan Stanley Liquidity Funds (MSLF) Sub-Fund	Net Return
US Dollar Liquidity Fund	1.867%
US Dollar Treasury Liquidity Fund	1.609%
Euro Liquidity Fund	(0.003)%

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2022

Safekeeping of collateral

Collateral received

J.P. Morgan SE, Luxembourg Branch is responsible for the safekeeping of the collaterals received in respect of total return swaps as at the reporting date. The Custodian J.P. Morgan SE, Luxembourg Branch is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

<i>COLLATERAL VALUE (in Fund Currency)</i>			
		Global Brands Equity Income Fund	Global Multi-Asset Opportunities Fund
Safekeeping of collateral	Type	USD	EUR

	(31,414)	(11,269)
Net Return	7,605,210	(876,092)

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: American Resilience Fund

Legal entity identifier: 5493007IAYGIHAZG5H09

Reference period: 15 December 2022 to 31 December 2022

This Fund was launched on 15 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.25% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	49.25%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The companies that were classified as sustainable investments according to the SFDR rules met a set of tests including evidence of having positive contribution to environmental or social objectives which the Fund defines as being positively aligned with the UN Sustainable Development Goals ("SDGs"). The UN SDGs include environmental (e.g., Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. In order to be classified as sustainable investments, the Fund's investments had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and WellBeing SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs.

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the relevant principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicator were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not classify as sustainable investments:

- issuers that failed to comply with the themes and values promoted by the UN Global Compact or the OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles); and
- issuers which lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles).

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund’s investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital, or materially adversely impacted by the activities of the issuer).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Microsoft Corp.	Information Technology	7.73%	United States of America
Visa, Inc. 'A'	Information Technology	5.59%	United States of America
Thermo Fisher Scientific, Inc.	Health Care	4.99%	United States of America
Accenture plc 'A'	Information Technology	4.96%	United States of America
Danaher Corp.	Health Care	4.87%	United States of America
Philip Morris International, Inc.	Consumer Staples	4.43%	United States of America
Intercontinental Exchange, Inc.	Financials	4.19%	United States of America
Automatic Data Processing, Inc.	Information Technology	3.56%	United States of America
Becton Dickinson and Co.	Health Care	3.53%	United States of America
Otis Worldwide Corp.	Industrials	3.22%	United States of America
Procter & Gamble Co. (The)	Consumer Staples	3.19%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 50.26%

What was the proportion of sustainability-related investments?

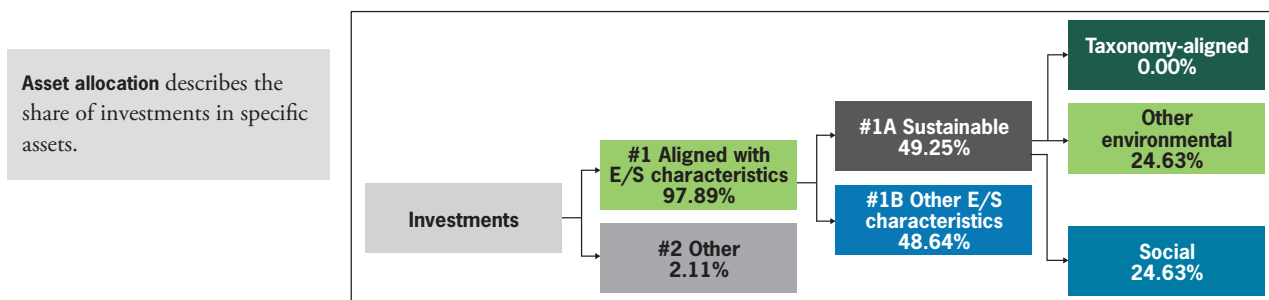

97.89% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

49.25% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	39.81%
Health Care	27.92%
Consumer Staples	12.55%
Industrials	6.90%
Financials	5.70%
Consumer Discretionary	2.62%
Communication Services	2.45%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. Therefore, none of the Fund's assets that were invested in companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

24.63% of the Fund’s assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

What was the share of socially sustainable investments?

24.63% of the Fund’s assets were invested in companies classified as sustainable investments with a social objective.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.11% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund’s environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company’s returns on operating capital and engagement with management plays a vital role in this. It informs them whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asia Opportunity Fund

Legal entity identifier: 549300A6F3VVR9QM8333

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, are screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments are in violation of the Fund's Restriction Screening Policy.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts ("PAI") on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund's adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.62%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
HDFC Bank Ltd.	Financials	8.11%	India
Meituan, Reg. S 'B'	Consumer Discretionary	6.49%	China
ICICI Bank Ltd., ADR	Financials	6.17%	India
Trip.com Group Ltd., ADR	Consumer Discretionary	5.46%	China
Haidilao International Holding Ltd., Reg. S	Consumer Discretionary	5.38%	China
Coupang, Inc.	Consumer Discretionary	4.86%	Republic of Korea
IndusInd Bank Ltd.	Financials	4.48%	India
Kuaishou Technology, Reg. S	Communication Services	4.00%	China
Kweichow Moutai Co. Ltd. 'A'	Consumer Staples	3.87%	China
KE Holdings, Inc., ADR	Real Estate	3.80%	China

What was the proportion of sustainability-related investments?

97.67% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

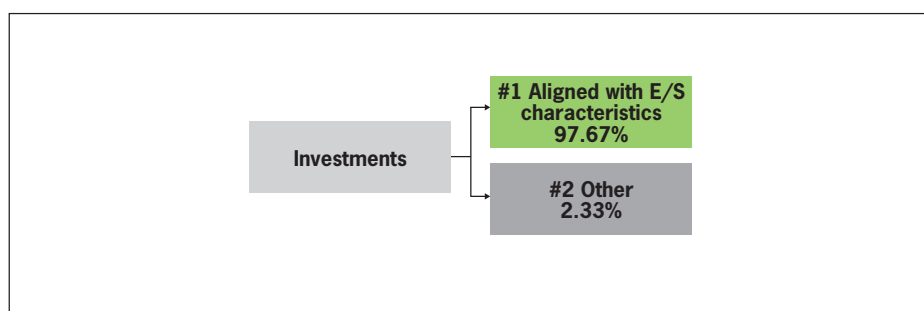

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer discretionary	27.27%
Financials	26.98%
Consumer staples	13.96%
Communication services	12.36%
Information technology	5.71%
Real estate	5.46%
Industrials	2.86%
Materials	2.84%
Others	0.23%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.05%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.33% of the Fund’s investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Asian Property Fund

Legal entity identifier: BZF8P9Z4J7SD7DK07X90

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 51.03%

Security	Sector	% Assets	Country
Sun Hung Kai Properties Ltd.	Diversified	8.11%	Hong Kong
Mitsui Fudosan Co. Ltd.	Diversified	6.99%	Japan
Mitsubishi Estate Co. Ltd.	Diversified	6.52%	Japan
CK Asset Holdings Ltd.	Diversified	5.47%	Hong Kong
Link REIT, REIT	Diversified	5.41%	Hong Kong
Wharf Real Estate Investment Co. Ltd.	Diversified	5.02%	Hong Kong
CapitaLand Integrated Commercial Trust, REIT	Diversified	4.72%	Singapore
Region RE Ltd., REIT	Retail	4.72%	Australia
Nippon Building Fund, Inc., REIT	Office	4.07%	Japan

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

99.46% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Diversified	59.58%
Retail	16.18%
Office	9.57%
Industrial	6.47%
Lodging/Resorts	4.10%
Self Storage	3.48%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.54% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Adviser constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Product name: Calvert Sustainable Climate Aligned Fund

Legal entity identifier: 549300Q2RHPRD81Y4C87

Reference period: 08 April 2022 to 31 December 2022

This Fund launched on 08 April 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective 98.58%:**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies located in developed markets that are involved in economic activities that address climate transition and/or are those that the Investment Adviser assess to be contributing to the long-term de-carbonisation objectives of the Paris Agreement.

In addition, the Fund maintained a carbon footprint of at least 50% less than the MSCI World Index. The goal is to reduce the emissions year-on-year to reach net zero at portfolio level by 2050 or earlier.

In light of the above, this Fund has a reduction in carbon emissions as its objective. In pursuing this objective this Fund does not track or otherwise align with the methodology of an EU Climate Transition Benchmark or an EU Paris-Aligned Benchmark. The Investment Adviser, however, ensured that the continued effort of reducing carbon emissions was ensured in view of achieving the objectives of the Paris Agreement through the application of the characteristics described above.

The Fund's carbon reduction objective was aligned with the Paris Agreement and the Fund contributed towards the objectives of the Paris Agreement by maintaining a carbon footprint 50% lower than the benchmark, overweighting climate solution providers and aiming to achieve net zero at portfolio level by 2050 or earlier. These binding features contributed towards the objectives of the Paris Agreement including its long-term temperature goal, climate adaptation and climate mitigation.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	98.81%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by tonnes of CO2 per \$1million enterprise value (including scope 1 and 2 emissions, and only including scope 3 emissions for certain sectors for which, in the view of the Investment Adviser, scope 3 emissions are likely to constitute a material factor in overall carbon emissions) The carbon footprint of the MSCI World Index was 393.74 Therefore, the carbon footprint threshold 50% lower than that of the MSCI World Index, and the actual carbon footprint of the Fund, were:	196.87	118.23
Portfolio holdings which demonstrated environmental and/or climate leadership or improvement in accordance with the Investment Adviser's proprietary methodology. The percentage of investee companies which the Investment Adviser aimed to be categorised as meeting its criteria and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	98.58%
Reduction in emissions year-on-year to reach net zero at portfolio level by 2050 or earlier. For this purpose, the Fund considers scope 1 and 2 GHG emissions and scope 3 GHG emissions for all sectors currently required to be considered by the EU CTBs and UC PABs. The decarbonization trajectory per annum at overall portfolio which the Investment Adviser aimed to meet and the actual decarbonization trajectory of the fund were: Note: As the Fund launched in 2022, the Fund will begin reporting on its year-on-year reduction in emissions from next year	-7.00%	N/A
Exclusions:		
% of investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available. In cases where PAI suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Apple, Inc.	Information Technology	4.06%	United States of America
Schneider Electric SE	Industrials	3.94%	France
Microsoft Corp.	Information Technology	3.66%	United States of America
General Mills, Inc.	Consumer Staples	1.94%	United States of America
AES Corp. (The)	Utilities	1.54%	United States of America
Mizuho Financial Group, Inc.	Financials	1.39%	Japan
Toronto-Dominion Bank (The)	Financials	1.37%	Canada
Parker-Hannifin Corp.	Industrials	1.35%	United States of America
Evonik Industries AG	Materials	1.24%	Germany
Prudential Financial, Inc.	Financials	1.24%	United States of America
Sun Life Financial, Inc.	Financials	1.10%	Canada
Thomson Reuters Corp.	Industrials	1.05%	Canada
BCE, Inc.	Communication Services	1.04%	Canada
AIA Group Ltd.	Financials	1.01%	Hong Kong
Resona Holdings, Inc.	Financials	1.00%	Japan

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 26.93%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.58% of the Fund comprised sustainable investments with an environmental objective. The Fund's remaining assets were held in cash and hedging instruments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund's overarching environmental sustainable investment objective, through the Calvert Principles, the Fund's methodology for evaluating investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Investment Adviser then selects sustainable investments for inclusion in the Fund based on their contribution to the environmental sustainable investment objective of the Fund.

In view of this methodology and as this Fund has an environmental objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question as environmentally focussed sustainable investments for reporting purposes. However, please note that the sustainable investments may also be making a contribution to social factors.

The carbon tilt is applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have a higher carbon footprint than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	23.94%
Financials	16.03%
Health Care	15.73%
Industrials	12.62%
Consumer Discretionary	7.97%
Communication Services	7.63%
Utilities	5.25%
Consumer Staples	4.20%
Materials	3.16%
Real Estate	2.20%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.92%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

98.58% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

1.42% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged with its investee companies on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund's sustainability indicators, such as the Calvert Principles, or that breached the Fund's do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Climate Transition Fund

Legal entity identifier: 549300XY4TIZJ6K41B80

Reference period: 27 July 2022 to 31 December 2022

The Fund launched on 27 July 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|--|---|
| <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective 93.95%:</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that help to mitigate or adapt to climate change and that qualify as sustainable investments. The Fund achieved its climate change mitigation and adaptation objective by investing in companies which qualified as sustainable investments and: (a) whose business models either had a current, direct impact on lowering carbon emissions; or (b) which were investing significant capital in Property, Plant, and Equipment (PP&E), technology, and processes that will help facilitate lower carbon emissions in the future.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	93.95%
% of the Fund's portfolio which the Investment Adviser aimed to be climate change-focused companies, and the actual percentage of the Fund's portfolio which met these criteria were:	90.00%	93.95%
Exclusions:		
% of Fund investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available. In cases where PAI data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.26%

Security	Sector	% Assets	Country
Xcel Energy, Inc.	Utilities	5.36%	United States of America
Hydro One Ltd., Reg. S	Utilities	5.34%	Canada
GFL Environmental, Inc.	Industrials	5.33%	Canada
Eversource Energy	Utilities	5.28%	United States of America
Iberdrola SA	Utilities	5.20%	Spain
NextEra Energy, Inc.	Utilities	4.58%	United States of America
Sempra Energy	Utilities	4.57%	United States of America
Republic Services, Inc.	Industrials	4.41%	United States of America
Terna - Rete Elettrica Nazionale	Utilities	4.16%	Italy
SolarEdge Technologies, Inc.	Information Technology	4.04%	United States of America
National Grid plc	Utilities	3.99%	United Kingdom

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

93.95% of the Fund’s investments were sustainable investments.

93.95% of the Fund comprised sustainable investments with an environmental objective.

The Fund’s remaining assets were held in cash and hedging instruments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund’s overarching environmental sustainable investment objective, through the Calvert Principles, the Fund’s methodology for evaluating investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Investment Adviser then selects sustainable investments for inclusion in the Fund based on their contribution to the environmental sustainable investment objective of the Fund.

In view of this methodology and as this Fund has an environmental objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question as environmentally focussed sustainable investments for reporting purposes. However, please note that the sustainable investments may also be making a contribution to social factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Utilities	50.21%
Industrials	24.41%
Information Technology	6.66%
Materials	6.23%
Consumer Discretionary	3.75%
Financials	2.58%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	38.13%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers which derive any revenue from fossil fuels such as ownership of fossil fuel reserves, distribution of fossil fuels and power generation using fossil fuels. Given the Fund's sustainable investment objective is to invest in companies that help to mitigate or adapt to climate change, it has exposure to heavy emitting and capital intensive industries that are critical players in the climate transition such as utilities and power infrastructure companies. During the reference period, some of the investee companies had some power generation and revenues related to fossil fuels, however the Investment Adviser only invested in them if: i) they invested significant capital in Property, Plant and Equipment, technology and processes that can help facilitate a lower carbon emissions future; 2) the Investment Adviser believed their overall decarbonization strategy was credible; and 3) they were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment.

The Investment Adviser regularly monitors all investee companies (including those with fossil fuel exposure) to ensure that they continue to meet the criteria required to be classified as a sustainable investment. According to the data sources used by the Investment Adviser, during the reference period the Fund had minimal exposure to investee companies which generated revenue from ownership of fossil fuel reserves.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

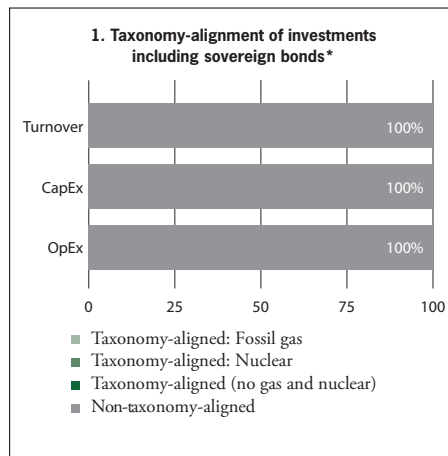

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

93.95% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

6.05% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund's sustainability indicators, such as the Calvert Principles, or that breached the Fund's do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Developed Europe Equity Select Fund

Legal entity identifier: 549300UT4CY7ZR786J23

Reference period: 08 April 2022 to 31 December 2022

The Fund launched on 08 April 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|--|---|
| <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective 53.84%:</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI Europe index and higher levels of board gender diversity at the portfolio-level than the MSCI Europe index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.72%
Carbon footprint at least 50% lower than that of the MSCI Europe Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI Europe Index was 114.77. Therefore, the carbon footprint threshold 50% lower than that of the MSCI Europe Index, and the actual carbon footprint of the Fund were:	57.39	41.04
Higher level of board gender diversity at the portfolio-level than the MSCI Europe Index, measured by average number of women at board level). The gender diversity value of the MSCI Europe Index and that of the Fund were:	5.11	5.45
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.72%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where the PAI data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 39.11%

Security	Sector	% Assets	Country
Novartis AG	Health Care	3.93%	Switzerland
L'Oreal SA	Consumer Staples	3.72%	France
AXA SA	Financials	3.18%	France
Roche Holding AG	Health Care	3.05%	Switzerland
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	3.04%	France
AstraZeneca plc	Health Care	2.92%	United Kingdom
Novo Nordisk A/S 'B'	Health Care	2.84%	Denmark
ASML Holding NV	Information Technology	2.80%	Netherlands
SAP SE	Information Technology	2.28%	Germany
Boliden AB	Materials	2.17%	Sweden
Muenchener Rueckversicherungs-Gesellschaft AG	Financials	1.99%	Germany
Intesa Sanpaolo SpA	Financials	1.89%	Italy
Schneider Electric SE	Industrials	1.87%	France
Koninklijke Ahold Delhaize NV	Consumer Staples	1.74%	Netherlands
Essity AB 'B'	Consumer Staples	1.69%	Sweden

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

99.72% of the Fund's investments were sustainable investments.

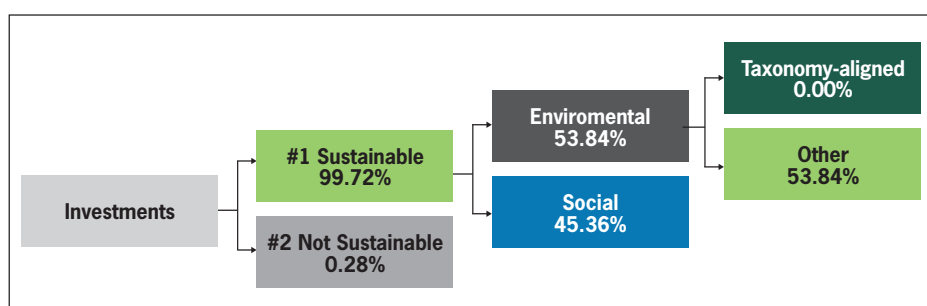

53.84% of the Fund comprised sustainable investments with an environmental objective.

45.36% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt are both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	20.38%
Health Care	17.01%
Consumer Discretionary	12.99%
Industrials	12.58%
Information Technology	9.53%
Consumer Staples	9.36%
Materials	6.85%
Communication Services	4.90%
Utilities	4.41%
Real Estate	1.88%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.70%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

53.84% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

45.36% of the Fund’s investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

0.28% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund’s sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund’s sustainability indicators, such as the Calvert Principles, or that breached the Fund’s do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Developed Markets Equity Select Fund

Legal entity identifier: 54930037M4G3K40KMR44

Reference period: 08 April 2022 to 31 December 2022

The Fund launched on 08 April 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- | <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No |
|--|---|
| <p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective 50.17%:</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <p><input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 48.66%</p> | <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p> |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI World index and higher levels of board gender diversity at the portfolio-level than the MSCI World index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	98.95%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI World Index was 140.39. Therefore, the carbon footprint threshold 50% lower than that of the MSCI World Index, and the actual carbon footprint of the Fund were:	70.20	53.56
Higher level of board gender diversity at the portfolio-level than the MSCI World Index, measured by average number of women at board level). The gender diversity value of the MSCI World Index and that of the Fund were:	4.00	4.31
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	98.83%
Exclusions:		
% Fund exposure to investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where the PAI data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Apple, Inc.	Information Technology	4.28%	United States of America
Microsoft Corp.	Information Technology	3.66%	United States of America
Alphabet, Inc. 'A'	Communication Services	2.25%	United States of America
General Mills, Inc.	Consumer Staples	1.49%	United States of America
Merck & Co., Inc.	Health Care	1.26%	United States of America
Novartis AG	Health Care	1.07%	Switzerland
Starbucks Corp.	Consumer Discretionary	0.99%	United States of America
Humana, Inc.	Health Care	0.98%	United States of America
Visa, Inc. 'A'	Information Technology	0.94%	United States of America
NVIDIA Corp.	Information Technology	0.92%	United States of America
MetLife, Inc.	Financials	0.90%	United States of America
Estee Lauder Cos., Inc. (The) 'A'	Consumer Staples	0.86%	United States of America
Novo Nordisk A/S 'B'	Health Care	0.84%	Denmark
Home Depot, Inc. (The)	Consumer Discretionary	0.83%	United States of America
Marsh & McLennan Cos., Inc.	Financials	0.82%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 22.09%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.83% of the Fund’s investments were sustainable investments.

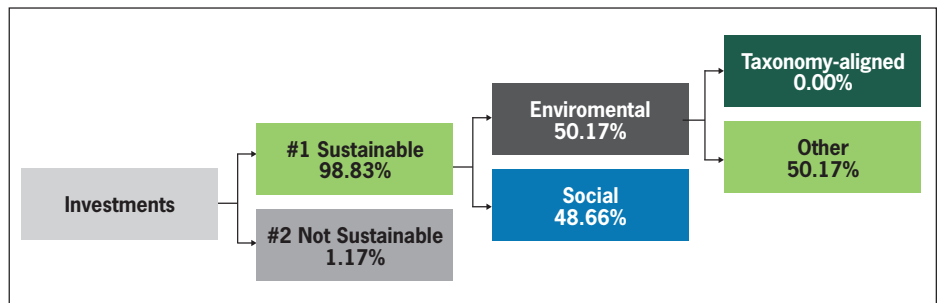

50.17% of the Fund comprised sustainable investments with an environmental objective.

48.66% of the Fund comprised sustainable investments with a social objective.

The Fund’s remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments assesses the investment’s overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt are both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	22.46%
Financials	18.13%
Health Care	13.49%
Consumer Discretionary	9.70%
Industrials	9.07%
Communication Services	8.46%
Consumer Staples	6.82%
Materials	4.63%
Real Estate	3.13%
Utilities	3.06%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.58%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

50.17% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

48.66% of the Fund’s investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

1.17% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund’s sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund’s sustainability indicators, such as the Calvert Principles, or that breached the Fund’s do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Diversity, Equity and Inclusion Fund

Legal entity identifier: 549300LM8EX1C25T5840

Reference period: 08 April 2022 to 31 December 2022

This Fund launched on 08 April 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Yes

No

- It made **sustainable investments with an environmental objective** ___%:
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective: 99.55%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that demonstrated leadership or meaningful improvement in having a diverse workforce and an equal and inclusive work culture.

In addition to this primary objective, the Fund ensured that its investee companies maintained higher levels of board gender and ethnic diversity considered at the portfolio level as compared to the MSCI World Index. During the reference period, the Fund attained its sustainable investment objective by investing in companies that demonstrated leadership or meaningful improvement in having a diverse workforce and an equal and inclusive work culture.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.55%
Portfolio holdings which had evidence of DEI leadership or improvement. Measured by % of Fund investee companies categorized as diversity leaders or diversity improvers (and not diversity neutral or diversity laggards). The percentage of investee companies which the Investment Adviser aimed to be diversity leaders/diversity improvers, and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	99.55%
Higher levels of gender diversity than that of the MSCI World Index. Measured by the average number of women at board level. The gender diversity value of the MSCI World Index and that of the Fund were:	3.51	4.40
Higher levels of ethnic diversity than that of the MSCI World Index. Measured by average percentage of underrepresented ethnicities at board level. The ethnic diversity values of the MSCI World Index and that of the fund were:	20.12	25.99
Exclusions:		
% Fund exposure to investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% of investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available. In cases where PAI data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Apple, Inc.	Information Technology	7.02%	United States of America
Microsoft Corp.	Information Technology	6.00%	United States of America
Alphabet, Inc. 'A'	Communication Services	3.36%	United States of America
NVIDIA Corp.	Information Technology	1.25%	United States of America
Visa, Inc. 'A'	Information Technology	1.18%	United States of America
Home Depot, Inc. (The)	Consumer Discretionary	1.15%	United States of America
Merck & Co., Inc.	Health Care	1.06%	United States of America
Pfizer, Inc.	Health Care	1.06%	United States of America
Eli Lilly & Co.	Health Care	1.04%	United States of America
Mastercard, Inc. 'A'	Information Technology	1.02%	United States of America
Novo Nordisk A/S 'B'	Health Care	0.93%	Denmark
LVMH Moët Hennessy Louis Vuitton SE	Consumer Discretionary	0.88%	France
Broadcom, Inc.	Information Technology	0.87%	United States of America
AstraZeneca plc	Health Care	0.81%	United Kingdom
Cisco Systems, Inc.	Information Technology	0.80%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 28.43%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

99.55% of the Fund's investments were sustainable investments.

None of the Fund's sustainable investments had an environmental objective during the reference period.

99.55% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund's overarching social sustainable investment objective, through the Calvert Principles, the Fund's methodology for evaluating investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Investment Adviser then selects sustainable investments for inclusion in the Fund based on their contribution to the social sustainable investment objective of the Fund.

In view of this methodology and as this Fund has a social objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question and in the question below ("What was the share of socially sustainable investments?") as socially focused sustainable investments for reporting purposes. However, please note that the sustainable investments may also be making a contribution to environmental factors.

The diversity commitments to be better than the MSCI World Index are applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have a lower weighted average number of women or underrepresented ethnicities at the board level than the portfolio level average of target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.03%
Financials	16.66%
Health Care	15.71%
Industrials	10.71%
Consumer Discretionary	9.93%
Communication Services	8.93%
Consumer Staples	5.51%
Materials	2.23%
Utilities	1.53%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.99%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

What was the share of socially sustainable investments?

99.55% of the Fund's investments were sustainable investments with a social objective.

As noted above, this Fund has social objective, so for SFDR purposes the Investment Adviser has reported all sustainable investments as social sustainable investments in this question. However, please note that the sustainable investments may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.48% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund's sustainability indicators, such as the Calvert Principles, or that breached the Fund's do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

| <p><input checked="" type="checkbox"/> It made sustainable investments with a social objective: 46.63%</p> | <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p> |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI Emerging Markets index and higher levels of board gender diversity at the portfolio-level than the MSCI Emerging Markets index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	91.65%
Carbon footprint at least 50% lower than that of the MSCI EM Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the MSCI EM Index was 326.53. Therefore, the carbon footprint threshold 50% lower than that of the MSCI EM Index, and the actual carbon footprint of the Fund were:	163.27	114.63
Higher level of board gender diversity at the portfolio-level than the MSCI Index, measured by average number of women at board level). The gender diversity value of the MSCI EM Index and that of the Fund were:	1.87	2.25
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	91.69%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where the PAI data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 32.10%

Security	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	6.86%	Taiwan
HDFC Bank Ltd., ADR	Financials	2.05%	India
Huatai Securities , Reg. S 'H'	Financials	2.02%	China
Yum China Holdings, Inc.	Consumer Discretionary	2.00%	China
Shandong Weigao Group Medical Polymer 'H'	Health Care	1.97%	China
China International Capital Corp. Ltd., Reg. S 'H'	Financials	1.95%	China
Trip.com Group Ltd., ADR	Consumer Discretionary	1.91%	China
Qingdao Port International , Reg. S 'H'	Industrials	1.89%	China
Kingdee International Software Group	Information Technology	1.77%	China
Wal-Mart de Mexico SAB de CV	Consumer Staples	1.72%	Mexico
3SBio, Inc., Reg. S	Health Care	1.68%	China
Aldar Properties PJSC	Real Estate	1.61%	United Arab Emirates

SK Hynix, Inc.	Information Technology	1.53%	South Korea

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

91.69% of the Fund’s investments were sustainable investments.

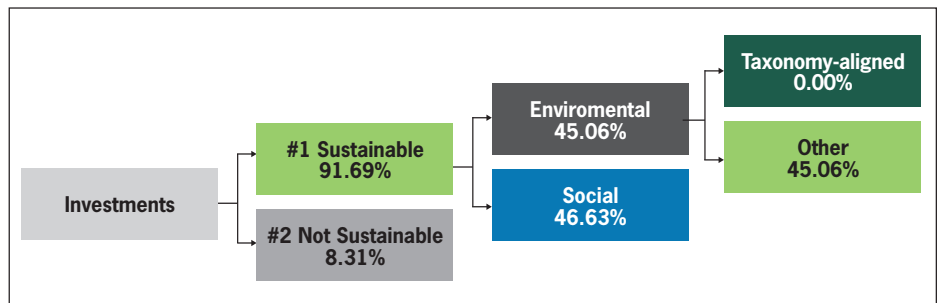

45.06% of the Fund comprised sustainable investments with an environmental objective.

46.63% of the Fund comprised sustainable investments with a social objective.

The Fund’s remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments assesses the investment’s overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt are both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	19.99%
Information Technology	18.94%
Consumer Discretionary	13.43%
Communication Services	10.94%
Health Care	8.73%
Consumer Staples	7.10%
Materials	4.78%
Industrials	4.07%
Real Estate	2.62%
Utilities	1.14%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	1.36%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund’s sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

45.06% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

46.63% of the Fund’s investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

8.31% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund’s sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund’s sustainability indicators, such as the Calvert Principles, or that breached the Fund’s do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable US Equity Select Fund

Legal entity identifier: 549300LM3S8HT563GM12

Reference period: 08 April 2022 to 31 December 2022

The Fund launched on 08 April 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective 54.05%:**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: 45.50%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were either: (i) involved in economic activities that addressed global environmental or societal challenges in areas such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, in addition to demonstrating accountable governance and transparent operations; or (ii) leaders in managing environmental or social risks and opportunities, and in each case that were determined to be sustainable investments by the Investment Adviser.

In addition to this primary objective, the Fund maintained a carbon profile lower than the Russell 1000 index and higher levels of board gender diversity at the portfolio-level than the Russell 1000 index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.55%
Carbon footprint at least 50% lower than that of the Russell 1000 Index. Measured by weighted average carbon intensity, defined as tonnes of CO ₂ per \$1million revenue (excluding Scope 3 emissions) The carbon footprint of the Russell 1000 Index was 145.32 Therefore, the carbon footprint threshold 50% lower than that of the Russell 1000 Index, and the actual carbon footprint of the Fund were:	72.66	58.99
Higher level of board gender diversity at the portfolio-level than the Russell 1000 index, measured by average number of women at board level). The gender diversity value of the Russell 1000 index and that of the Fund were:	3.86	4.16
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.55%
Exclusions:		
% investee companies involved with:		
Severe ESG controversies without material remediation and improvement	0.00%	0.00%
Controversial weapons	0.00%	0.00%
Civilian firearms	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Gambling	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- applying the Calvert Principles to determine an eligible investment universe that limits exposure to companies performing poorly on ESG matters;
- testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact (“PAI”) indicators (see the response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?” below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?” below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules and which are relevant to the investment. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

In cases where the PAI data suggested that an investment was causing significant harm, the Investment Adviser conducted desktop research to better understand and assess potential negative impacts indicated by third party or proprietary data. This independent analysis led to some instances where the Investment Adviser concluded that an issuer was not causing significant harm, taking into account elements such as vendor data timeliness/accuracy, company responses to address issues flagged as potentially harmful, or feedback received through the Investment Adviser’s active engagement activities with the issuer. In such cases, the Investment Adviser proceeded with the investment, the rationale for the determination of harm was documented and the investment was kept under review.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Microsoft Corp.	Information Technology	6.73%	United States of America
Apple, Inc.	Information Technology	6.23%	United States of America
Alphabet, Inc. 'A'	Communication Services	3.59%	United States of America
Merck & Co., Inc.	Health Care	2.88%	United States of America
General Mills, Inc.	Consumer Staples	1.52%	United States of America
Home Depot, Inc. (The)	Consumer Discretionary	1.50%	United States of America
Amgen, Inc.	Health Care	1.48%	United States of America
MetLife, Inc.	Financials	1.45%	United States of America
Eaton Corp. plc	Industrials	1.35%	United States of America
BlackRock, Inc.	Financials	1.34%	United States of America
Gilead Sciences, Inc.	Health Care	1.20%	United States of America
NVIDIA Corp.	Information Technology	1.19%	United States of America
Visa, Inc. 'A'	Information Technology	1.16%	United States of America
Verizon Communications, Inc.	Communication Services	1.13%	United States of America
Truist Financial Corp.	Financials	1.13%	United States of America

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 33.88%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

99.55% of the Fund's investments were sustainable investments.

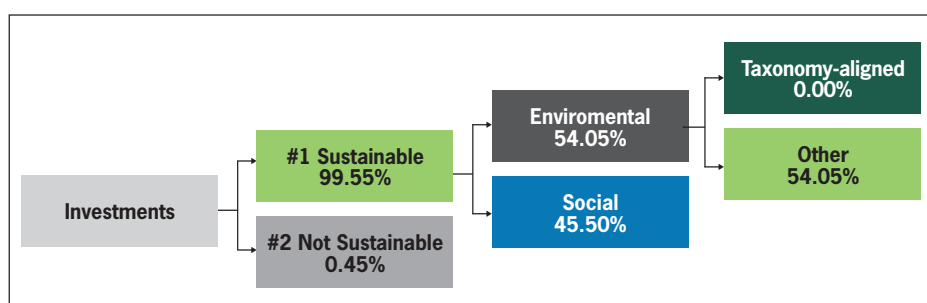

54.05% of the Fund comprised sustainable investments with an environmental objective.

45.50% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt are both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.63%
Financials	16.57%
Health Care	11.77%
Consumer Discretionary	11.17%
Industrials	9.14%
Communication Services	7.24%
Real Estate	4.68%
Consumer Staples	4.59%
Utilities	2.90%
Materials	2.80%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.54%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

54.05% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

45.50% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

0.45% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund’s sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund. The Investment Adviser also monitored any existing holdings in the Fund, and promptly sold any investments that no longer met the Fund’s sustainability indicators, such as the Calvert Principles, or that breached the Fund’s do no significant harm criteria, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Counterpoint Global Fund

Legal entity identifier: 549300J08YVX2S8XG475

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 41.19%

Security	Sector	% Assets	Country
Cloudflare, Inc. 'A'	Information Technology	8.30%	United States of America
Snowflake, Inc. 'A'	Information Technology	4.80%	United States of America
Royalty Pharma plc 'A'	Health Care	3.38%	United States of America
Shopify, Inc. 'A'	Information Technology	2.54%	Canada
Uber Technologies, Inc.	Industrials	2.35%	United States of America
HDFC Bank Ltd., ADR	Financials	2.34%	India
MercadoLibre, Inc.	Consumer Discretionary	2.12%	United States of America
Adyen NV, Reg. S	Information Technology	2.07%	Netherlands
Bill.com Holdings, Inc.	Information Technology	2.04%	United States of America
Cricut, Inc. 'A'	Consumer Discretionary	1.93%	United States of America
Coupang, Inc.	Consumer Discretionary	1.91%	United States of America
Global-e Online Ltd.	Consumer Discretionary	1.90%	Israel
agilon health, Inc.	Health Care	1.87%	United States of America
ASML Holding NV, NYRS	Information Technology	1.84%	Netherlands
Victoria plc	Consumer Discretionary	1.80%	United Kingdom

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

94.71% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	36.30%
Consumer Discretionary	21.95%
Health Care	11.11%
Industrials	8.30%
Communication Services	7.78%
Financials	5.64%
Consumer Staples	1.38%
Materials	1.33%
Real Estate	0.56%
Utilities	0.20%
Mutual Funds	0.08%
Energy	0.04%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.83%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

5.29% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Developing Opportunity Fund**

Legal entity identifier: **549300LLOEXEQPRYTK93**

Reference period: **16 May 2022 to 31 December 2022**

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, are screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments are in violation of the Fund’s Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.93%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
HDFC Bank Ltd.	Financials	8.55%	India
ICICI Bank Ltd., ADR	Financials	6.51%	India
MercadoLibre, Inc.	Consumer Discretionary	6.07%	United States of America
Meituan, Reg. S 'B'	Consumer Discretionary	5.65%	China
IndusInd Bank Ltd.	Financials	4.98%	India
Trip.com Group Ltd., ADR	Consumer Discretionary	4.90%	China
Coupang, Inc.	Consumer Discretionary	4.67%	Republic of Korea
Globant SA	Information Technology	4.30%	Argentina
Haidilao International Holding Ltd., Reg. S	Consumer Discretionary	4.03%	China
Taiwan Semiconductor Manufacturing Co. Ltd.	Information Technology	3.27%	Taiwan

What was the proportion of sustainability-related investments?

97.54% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

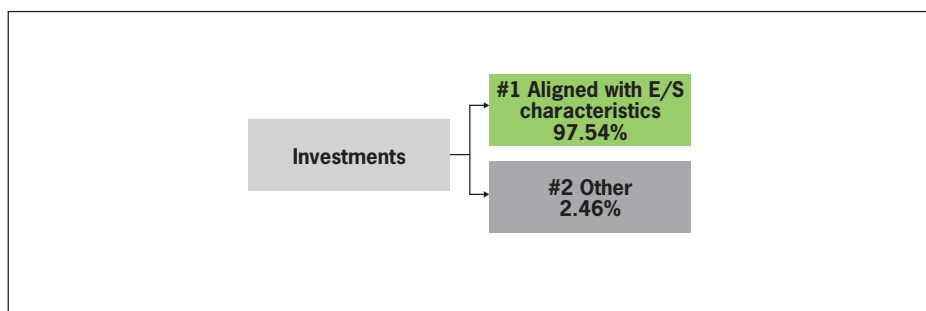

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer discretionary	29.01%
Financials	28.27%
Communication services	10.59%
Information technology	8.79%
Consumer staples	8.36%
Industrials	4.90%
Real estate	4.31%
Materials	3.15%
Others	0.16%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.27%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.46% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Leaders Equity Fund

Legal entity identifier: 549300RVZ11RNS16PV05

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, firstly, the Fund promoted the environmental characteristic of contributing towards climate change mitigation by seeking to achieve a lower carbon footprint than the MSCI Emerging Markets (Net) Index in aggregate at the portfolio level.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environment and to human health and wellbeing, such as tobacco and weapons, by applying binding exclusions. Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Sector-based exclusions:		
% of the Fund’s exposure to issuers involved in the manufacturing or production of which derive revenue from:	0.00%	0.00%
Tobacco (directly manufacture or >5% revenue)	0.00%	0.00%
Adult entertainment (directly produce or own a majority stake (>50%))	0.00%	0.00%
Manufacture of civilian firearms	0.00%	0.00%
Controversial Weapons (manufacture, or are a majority owner, or majority owned by)	0.00%	0.00%
Coal (>10% revenue from mining and extraction of thermal coal, or >10% revenue from coal-fired power)	0.00%	0.00%
Oil Sands (>5% revenue from extraction or production)	0.00%	0.00%
Arctic oil (>5% revenue from oil extraction or production in the Arctic region)	0.00	0.00
Gambling (>5% revenue)		
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI Emerging Markets (Net) Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	322.60	58.15
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above [and additional issuers based on indicators such as MSCI ESG ratings/scores or consideration of certain GICS sectors. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.30%*

* Calculated based on the number of stocks in MSCI EM Index.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered some of the principal adverse impacts (“PAI”) on sustainability factors through the Fund’s exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction and thermal coal power generation. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 56.13%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Li Ning Co. Ltd.	Textiles, Apparel & Luxury Goods	7.52%	China
MercadoLibre, Inc.	Internet & Direct Marketing Retail	7.35%	United States of America
Bajaj Finance Ltd.	Consumer Finance	6.39%	India
Shenzhou International Group Holdings Ltd.	Textiles, Apparel & Luxury Goods	6.11%	China
ICICI Bank Ltd.	Banks	5.49%	India
AU Small Finance Bank Ltd., Reg. S	Banks	5.12%	India
Globant SA	IT Services	4.87%	Argentina
Chailease Holding Co. Ltd.	Diversified Financial Services	4.84%	Taiwan
Proya Cosmetics Co. Ltd. 'A'	Personal Products	4.31%	China
Voltronic Power Technology Corp.	Electrical Equipment	4.13%	Taiwan

What was the proportion of sustainability-related investments?

92.28% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

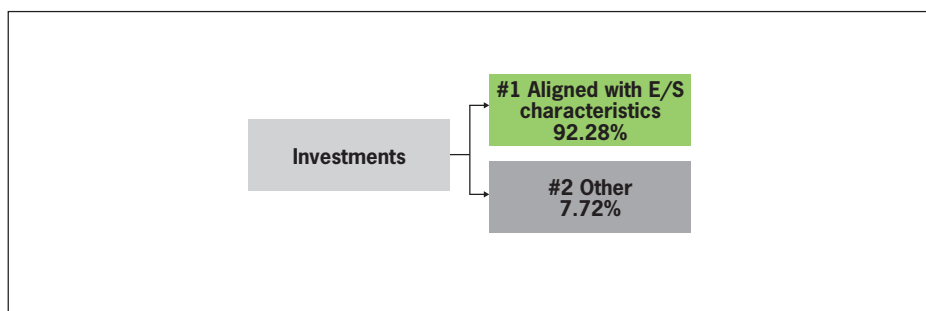

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Emerging Markets (Net) Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	30.76%
Financials	29.01%
Information Technology	15.05%
Industrials	6.81%
Consumer Staples	5.87%
Materials	4.24%
Health Care	0.55%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited) As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

7.72% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. This is comprised of cash held for ancillary liquidity, which were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the promoted environmental and social characteristics were met through the application of exclusions and maintaining a lower carbon footprint than the index at the portfolio level. To ensure the attainment of these promoted environmental and social characteristics, automated tools/screens and portfolio surveillance tools were used by the Portfolio Surveillance team. In addition, the Investment Adviser performed periodic manual desk reviews to ensure compliance.

In evaluating environmental and social risks, the Investment Adviser also engaged with companies on issues most relevant to their businesses. For example, the Investment Adviser engaged companies on their use of carbon and renewable energy, and their decarbonization plans. The investment team also discussed social issues around a company's labor force, community, supply chain and diversity at the management level.

The Investment Adviser also continues to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. In particular, the Investment Adviser engaged with companies on board composition, especially independence and gender diversity. Boards need to have a range of skills, opinions and experiences for optimal decision making and shareholder representation. Specifically, gender diversity acts as a proxy for stakeholders to evaluate whether the vetting and decision-making process on the board is thorough. When there is a lack of diversity represented at the board or management level, this can act as a red flag. During the year, the Investment Adviser engaged with a cosmetics company that has a majority female customer base yet there were no women on the board. In this instance, the Investment Adviser expects the conversations will be long-term and ongoing as the company does not have board elections until 2024. The Investment Adviser also engaged with company managements on the issue of gender pay gap. In many cases, the first step of these conversations is merely obtaining of the data, as complex subsidiary structures within emerging markets can make this particularly hard to determine.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Europe Opportunity Fund

Legal entity identifier: 54930039WYT5E8WI3793

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

As at 31 December 2022 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, are screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments are in violation of the Fund’s Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 58.83%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
DSV A/S	Industrials	9.67%	Denmark
Moncler SpA	Consumer Discretionary	8.18%	Italy
Hermes International	Consumer Discretionary	7.56%	France
Evolution AB, Reg. S	Consumer Discretionary	5.58%	Sweden
Kuehne + Nagel International AG	Industrials	4.93%	Switzerland
Davide Campari-Milano NV	Consumer Staples	4.73%	Italy
Adyen NV, Reg. S	Information Technology	4.62%	Netherlands
Abcam plc, ADR	Health Care	4.57%	United Kingdom
ASML Holding NV	Information Technology	4.52%	Netherlands
Rightmove plc	Communication Services	4.47%	United Kingdom

What was the proportion of sustainability-related investments?

98.04% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

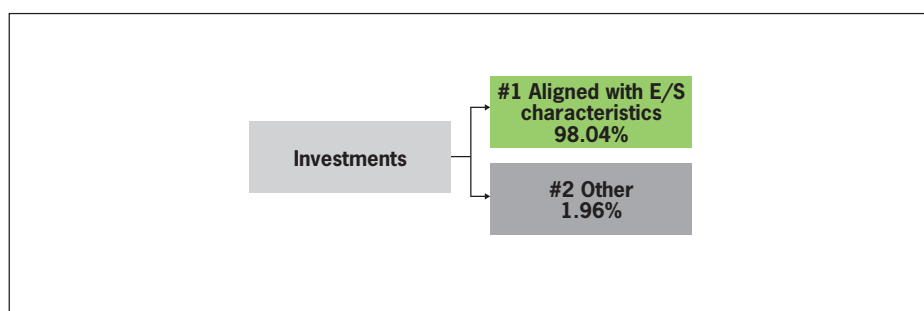

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer discretionary	33.49%
Consumer staples	20.63%
Industrials	16.44%
Health Care	9.39%
Information technology	9.14%
Communication services	8.95%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.96% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Property Fund

Legal entity identifier: TE6MWN7B3THSZYQWH072

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.94%

Security	Sector	% Assets	Country
Segro plc	Industrial	7.73%	United Kingdom
PSP Swiss Property AG	Diversified	6.45%	Switzerland
Vonovia SE	Residential	5.91%	Germany
Merlin Properties Socimi SA	Diversified	5.51%	Spain
Warehouses De Pauw CVA	Industrial	4.84%	Belgium
Inmobiliaria Colonial Socimi SA	Office	4.33%	Spain
Klepierre SA	Retail	3.92%	France
Aedifica SA	Healthcare	3.62%	Belgium
Gecina SA	Office	3.57%	France
Empiric Student Property plc	Residential	3.57%	United Kingdom
Catena AB	Industrial	3.49%	Sweden

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.69% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Office	21.32%
Residential	18.14%
Industrial	18.01%
Diversified	15.36%
Retail	11.47%
Industrial/Office Mixed	5.90%
Healthcare	4.85%
Self Storage	3.46%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.31% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Adviser constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Brands Equity Income Fund

Legal entity identifier: 549300NOAL4YUQM4WM15

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63.19% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Portfolio Value
Environmental Characteristics Exclusions		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	63.19%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The companies that were classified as sustainable investments according to the SFDR rules met a set of tests including evidence of having positive contribution to environmental or social objectives which the Fund defines as being positively aligned with the UN Sustainable Development Goals ("SDGs"). The UN SDGs include environmental (e.g., Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. In order to be classified as sustainable investments, the Fund's investments had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and WellBeing SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs.

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the relevant principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicator were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not classify as sustainable investments:

- issuers that failed to comply with the themes and values promoted by the UN Global Compact or the OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles); and
- issuers which lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles).

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund’s investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital, or materially adversely impacted by the activities of the issuer).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 51.46%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Microsoft Corp.	Information Technology	8.69%	United States of America
Philip Morris International, Inc.	Consumer Staples	7.49%	United States of America
Visa, Inc. 'A'	Information Technology	6.16%	United States of America
Reckitt Benckiser Group plc	Consumer Staples	5.74%	United Kingdom
Danaher Corp.	Health Care	5.28%	United States of America
SAP SE	Information Technology	5.06%	Germany
Thermo Fisher Scientific, Inc.	Health Care	4.58%	United States of America
Accenture plc 'A'	Information Technology	4.51%	United States of America
Intercontinental Exchange, Inc.	Financials	3.95%	United States of America

What was the proportion of sustainability-related investments?

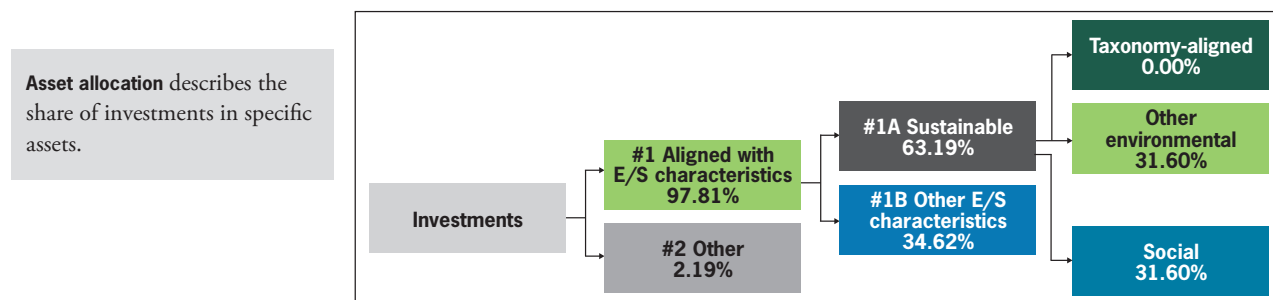

97.81% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

63.19% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for classifying companies as sustainable investments includes an assessment based on alignment with the UN SDGs, which includes both environmental and social factors (as relevant) as set out above. The Fund does not classify its sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has therefore equally divided the proportion of the Fund's assets invested in companies classified as sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	31.15%
Consumer Staples	26.30%
Health Care	22.25%
Industrials	8.12%
Financials	5.18%
Consumer Discretionary	3.94%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. Therefore, none of the Fund's assets that were invested in companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.60% of the Fund’s assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

What was the share of socially sustainable investments?

31.60% of the Fund’s assets were invested in companies classified as sustainable investments with a social objective.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.19% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and money market instruments for ancillary liquidity as well as profits or losses through the swaps to options on equity indices. They were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund’s environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company’s returns on operating capital and engagement with management plays a vital role in this. It informs them whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Brands Fund

Legal entity identifier: ZGTXPGVP03JQIVJJ255

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 63.30% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Portfolio Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	63.30%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The companies that were classified as sustainable investments according to the SFDR rules met a set of tests including evidence of having positive contribution to environmental or social objectives which the Fund defines as being positively aligned with the UN Sustainable Development Goals ("SDGs"). The UN SDGs include environmental (e.g., Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. In order to be classified as sustainable investments, the Fund's investments had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and WellBeing SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs.

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the relevant principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicator were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not classify as sustainable investments:

- issuers that failed to comply with the themes and values promoted by the UN Global Compact or the OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles); and
- issuers which lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles).

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund’s investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital, or materially adversely impacted by the activities of the issuer).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 51.71%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Microsoft Corp.	Information Technology	8.74%	United States of America
Philip Morris International, Inc.	Consumer Staples	7.54%	United States of America
Visa, Inc. 'A'	Information Technology	6.19%	United States of America
Reckitt Benckiser Group plc	Consumer Staples	5.77%	United Kingdom
Danaher Corp.	Health Care	5.31%	United States of America
SAP SE	Information Technology	5.09%	Germany
Thermo Fisher Scientific, Inc.	Health Care	4.61%	United States of America
Accenture plc 'A'	Information Technology	4.50%	United States of America
Intercontinental Exchange, Inc.	Financials	3.96%	United States of America

What was the proportion of sustainability-related investments?

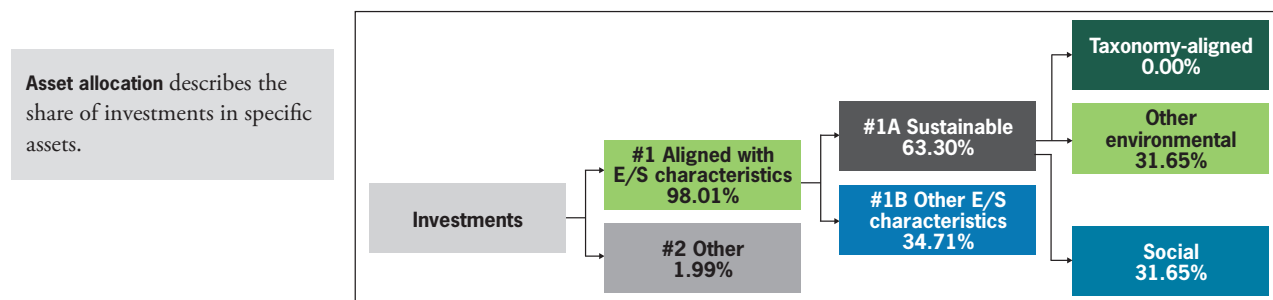

98.01% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

63.30% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for classifying companies as sustainable investments includes an assessment based on alignment with the UN SDGs, which includes both environmental and social factors (as relevant) as set out above. The Fund does not classify its sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has therefore equally divided the proportion of the Fund's assets invested in companies classified as sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	31.27%
Consumer Staples	26.46%
Health Care	22.40%
Industrials	8.17%
Financials	5.20%
Consumer Discretionary	3.96%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. Therefore, none of the Fund's assets that were invested in companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.65% of the Fund’s assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

What was the share of socially sustainable investments?

31.65% of the Fund’s assets were invested in companies classified as sustainable investments with a social objective.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.99% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund’s environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company’s returns on operating capital and engagement with management plays a vital role in this. It informs them whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Endurance Fund

Legal entity identifier: 549300M2W4IZFV5OHT61

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 54.25%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Victoria plc	Consumer Discretionary	11.51%	United Kingdom
Cricut, Inc. 'A'	Consumer Discretionary	8.97%	United States of America
Floor & Decor Holdings, Inc. 'A'	Consumer Discretionary	7.26%	United States of America
Appian Corp. 'A'	Information Technology	6.45%	United States of America
Global-e Online Ltd.	Consumer Discretionary	5.57%	Israel
Bill.com Holdings, Inc.	Information Technology	4.89%	United States of America
Babcock International Group plc	Industrials	4.85%	United Kingdom
Royalty Pharma plc 'A'	Health Care	4.75%	United States of America

What was the proportion of sustainability-related investments?

99.76% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

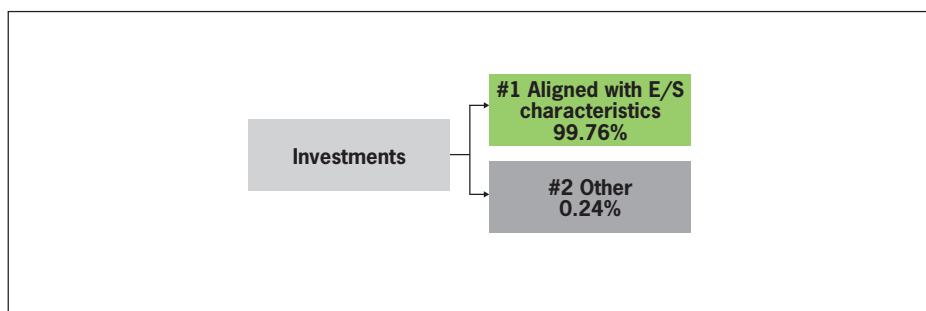

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	40.58%
Information Technology	36.18%
Health Care	7.91%
Communication Services	7.58%
Industrials	4.85%
Real Estate	2.66%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.24% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilized its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organizing framework helped the investment team categorize and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Focus Property Fund

Legal entity identifier: 549300RK04JPURNNL036

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 51.93%

Security	Sector	% Assets	Country
Public Storage, REIT	Real Estate	6.63%	United States of America
American Tower Corp., REIT	Real Estate	6.52%	United States of America
Prologis, Inc., REIT	Real Estate	6.28%	United States of America
Welltower, Inc., REIT	Real Estate	4.10%	United States of America
Mid-America Apartment Communities, Inc., REIT	Real Estate	3.88%	United States of America
VICI Properties, Inc., REIT	Real Estate	3.66%	United States of America
SBA Communications Corp., REIT 'A'	Real Estate	3.46%	United States of America
Simon Property Group, Inc., REIT	Real Estate	3.37%	United States of America
Sun Communities, Inc., REIT	Real Estate	3.10%	United States of America
American Homes 4 Rent, REIT 'A'	Real Estate	2.77%	United States of America
Iron Mountain, Inc., REIT	Real Estate	2.76%	United States of America
UDR, Inc., REIT	Real Estate	2.72%	United States of America
Mitsui Fudosan Co. Ltd.	Real Estate	2.68%	Japan

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.16% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Real Estate	96.05%
Consumer Services	1.40%
Health Care Equipment & Services	0.57%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.84% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Adviser constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Infrastructure Fund

Legal entity identifier: 549300FWCN1WWNKTBN70

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning or operating gambling activity; and	0.00%	0.00%
Owning or operating adult entertainment	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

What were the top investments of this financial product?

Security	Sector	% Assets	Country
China Gas Holdings Ltd.	Oil & gas storage & transportation	8.71%	China
GFL Environmental, Inc.	Others	7.58%	Canada
American Tower Corp., REIT	Communications	5.83%	United States of America
Infrastrutture Wireless Italiane SpA, Reg. S	Communications	4.76%	Italy
National Grid plc	Electricity transmission & distribution	3.92%	United Kingdom
Vinci SA	Diversified	3.83%	France
Sempra Energy	Oil & gas storage & transportation	3.80%	United States of America
Morgan Stanley Liquidity Funds US Dollar Treasury Liquidity Fund - MS Reserve, FRN	Cash and equivalents	3.76%	Luxembourg
Enbridge, Inc.	Oil & gas storage & transportation	3.61%	Canada
SBA Communications Corp., REIT 'A'	Communications	3.12%	United States of America
Eversource Energy	Electricity transmission & distribution	2.88%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is 51.80%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

96.90% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Oil & gas storage & transportation	33.26%
Communications	17.82%
Others	14.37%
Electricity transmission & distribution	9.39%
Diversified	6.87%
Water	5.46%
Airports	4.38%
Toll roads	2.58%
Renewables	0.34%
Railroads	0.09%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	52.47%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.10% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Advisers's constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Insight Fund

Legal entity identifier: 549300HWFDYTO3S36V14

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 53.15%

Security	Sector	% Assets	Country
MercadoLibre, Inc.	Consumer Discretionary	6.70%	United States of America
Royalty Pharma plc 'A'	Health Care	6.68%	United States of America
ASML Holding NV, NYRS	Information Technology	6.47%	Netherlands
Snowflake, Inc. 'A'	Information Technology	6.22%	United States of America

Grab Holdings Ltd. 'A'	Industrials	5.27%	Singapore
Shopify, Inc. 'A'	Information Technology	5.06%	Canada
Cloudflare, Inc. 'A'	Information Technology	4.92%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

95.81% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	36.40%
Health Care	18.09%
Consumer Discretionary	18.02%
Communication Services	11.61%
Industrials	8.90%
Financials	2.38%
Materials	0.41%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

4.19% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Opportunity Fund

Legal entity identifier: 5493000BFE8KBAX1S309

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, are screened against the Fund’s Restriction Screening Policy. During the reference period, 0% of the Fund’s investments are in violation of the Fund’s Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (“PAI”) on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund’s adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 53.83%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Uber Technologies, Inc.	Industrials	7.95%	United States of America
HDFC Bank Ltd.	Financials	7.81%	India
DSV A/S	Industrials	6.87%	Denmark
ServiceNow, Inc.	Information Technology	6.81%	United States of America
MercadoLibre, Inc.	Consumer Discretionary	4.77%	United States of America
Moncler SpA	Consumer Discretionary	4.33%	Italy
Coupang, Inc.	Consumer Discretionary	4.15%	Republic of Korea
Adobe, Inc.	Information Technology	3.79%	United States of America
Walt Disney Co. (The)	Communication Services	3.78%	United States of America
ICICI Bank Ltd.	Financials	3.57%	India

What was the proportion of sustainability-related investments?

98.31% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

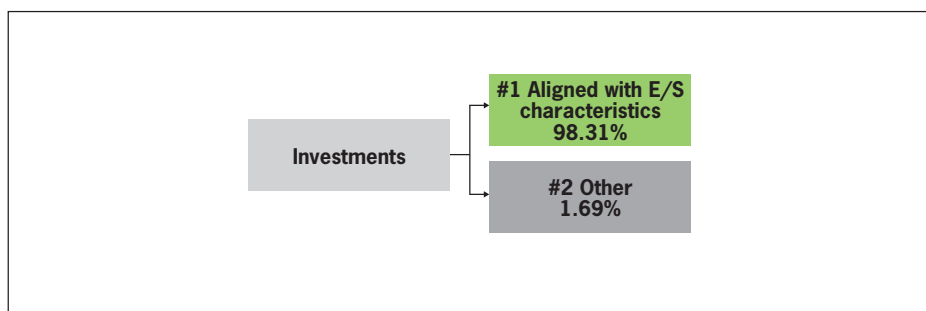

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Communication services	11.03%
Consumer discretionary	28.64%
Financials	12.61%
Industrials	16.75%
Information technology	29.28%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.69% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Permanence Fund

Legal entity identifier: 549300BNIZDA1BSKNE57

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 51.71%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
ASML Holding NV, NYRS	Information Technology	5.94%	Netherlands
HDFC Bank Ltd., ADR	Financials	5.36%	India
Constellation Software, Inc.	Information Technology	5.26%	Canada
Topicus.com, Inc.	Information Technology	4.98%	Canada
Intercontinental Exchange, Inc.	Financials	4.98%	United States of America
Rentokil Initial plc	Industrials	4.89%	United Kingdom
Royalty Pharma plc 'A'	Health Care	4.89%	United States of America
Amazon.com, Inc.	Consumer Discretionary	4.51%	United States of America
Cloudflare, Inc. 'A'	Information Technology	3.72%	United States of America
Sherwin-Williams Co. (The)	Materials	3.61%	United States of America
ServiceNow, Inc.	Information Technology	3.57%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

97.99% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	27.31%
Consumer Discretionary	18.27%
Financials	14.91%
Industrials	14.16%
Health Care	8.49%
Materials	6.51%
Communication Services	3.60%
Consumer Staples	3.16%
Mutual Funds	0.76%
Real Estate	0.50%
Energy	0.32%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.38%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.01% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Property Fund

Legal entity identifier: XBU1PE3KMQXHFDLPA33

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 50.05%

Security	Sector	% Assets	Country
Prologis, Inc., REIT	Industrial	7.42%	United States of America
Public Storage, REIT	Self Storage	7.09%	United States of America
Equinix, Inc., REIT	Data Centers	4.37%	United States of America
Welltower, Inc., REIT	Healthcare	3.90%	United States of America
Agree Realty Corp., REIT	Retail	3.51%	United States of America
Mid-America Apartment Communities, Inc., REIT	Residential	3.42%	United States of America
VICI Properties, Inc., REIT	Specialty	3.35%	United States of America
Simon Property Group, Inc., REIT	Retail	2.94%	United States of America
American Homes 4 Rent, REIT 'A'	Residential	2.83%	United States of America
Sun Communities, Inc., REIT	Residential	2.60%	United States of America
Digital Realty Trust, Inc., REIT	Data Centers	2.32%	United States of America
Sun Hung Kai Properties Ltd.	Diversified	2.19%	Hong Kong
Equity Residential, REIT	Residential	2.15%	United States of America
Brixmor Property Group, Inc., REIT	Retail	1.96%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

97.99% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Retail	18.24%
Diversified	15.42%
Residential	15.20%
Industrial	12.82%
Self Storage	8.32%
Data Centers	8.05%
Healthcare	7.92%
Office	4.49%
Specialty	3.35%
Lodging/Resorts	2.70%
Industrial/Office Mixed	0.56%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.01% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the investment team for the Fund generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The investment team's constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the investment team assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Quality Fund

Legal entity identifier: 549300KY7ZHUESLHQ60

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.91% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies with any tie to fossil fuels; and (ii) companies in certain other energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Portfolio Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	59.91%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The companies that were classified as sustainable investments according to the SFDR rules met a set of tests including evidence of having positive contribution to environmental or social objectives which the Fund defines as being positively aligned with the UN Sustainable Development Goals ("SDGs"). The UN SDGs include environmental (e.g., Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. In order to be classified as sustainable investments, the Fund's investments had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and WellBeing SDG), or through business practices such as policies, actions and targets aimed at alignment with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a company as having positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs.

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the relevant principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicator were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not classify as sustainable investments:

- issuers that failed to comply with the themes and values promoted by the UN Global Compact or the OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles); and
- issuers which lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles).

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund’s investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital, or materially adversely impacted by the activities of the issuer).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Microsoft Corp.	Information Technology	6.27%	United States of America
Visa, Inc. 'A'	Information Technology	5.47%	United States of America
Philip Morris International, Inc.	Consumer Staples	4.92%	United States of America
SAP SE	Information Technology	4.53%	Germany
Accenture plc 'A'	Information Technology	4.37%	United States of America
Danaher Corp.	Health Care	4.03%	United States of America
Thermo Fisher Scientific, Inc.	Health Care	3.93%	United States of America
Reckitt Benckiser Group plc	Consumer Staples	3.46%	United Kingdom
Becton Dickinson and Co.	Health Care	3.24%	United States of America
Intercontinental Exchange, Inc.	Financials	3.18%	United States of America
Abbott Laboratories	Health Care	3.09%	United States of America
Constellation Software, Inc.	Information Technology	2.80%	Canada
Baxter International, Inc.	Health Care	2.67%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 51.96%

What was the proportion of sustainability-related investments?

98.36% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

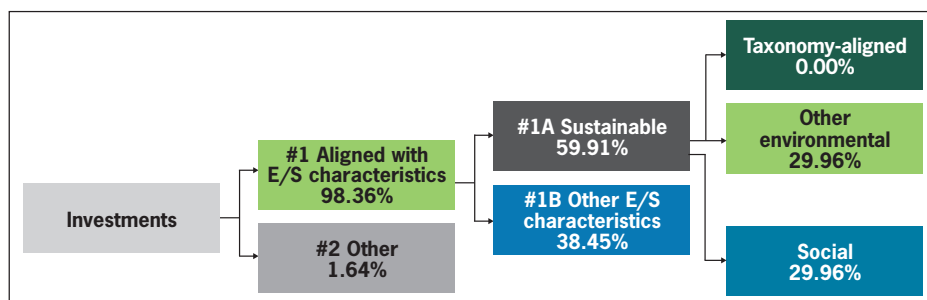

59.91% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for classifying companies as sustainable investments includes an assessment based on alignment with the UN SDGs, which includes both environmental and social factors (as relevant) as set out above. The Fund does not classify its sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has therefore equally divided the proportion of the Fund's assets invested in companies classified as sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	35.79%
Health Care	22.69%
Consumer Staples	16.94%
Financials	8.53%
Industrials	8.27%
Consumer Discretionary	3.69%
Communication Services	2.23%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. Therefore, none of the Fund's assets that were invested in companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

29.96% of the Fund’s assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

What was the share of socially sustainable investments?

29.96% of the Fund’s assets were invested in companies classified as sustainable investments with a social objective.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.64% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund’s environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company’s returns on operating capital and engagement with management plays a vital role in this. It informs them whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Sustain Fund

Legal entity identifier: 549300QP5BPQ4JSACK62

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.56% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of seeking to achieve a greenhouse gas (GHG) emissions intensity for the portfolio that is significantly lower than that of the reference universe by applying a GHG emissions intensity tilt and environmental exclusions to the portfolio. The reference universe is defined, only for the purposes of comparing GHG emissions intensity, as the MSCI AC World Index.

The Fund also considered social characteristics by avoiding investments in certain sectors with the potential to cause harm to human health and wellbeing by applying binding exclusions.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests, which included evaluating investee companies' (each, a "Company", together the "Companies") net positive alignment with the UN Sustainable Development Goals (SDGs).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Portfolio Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
Have any tie to fossil fuels	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Do not have GHG emissions intensity estimates available and/or which cannot be estimated (in the Investment Team's discretion)	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
Tobacco (>5% revenue)	0.00%	0.00%
Alcohol (>10% revenue)	0.00%	0.00%
Adult entertainment (>10% revenue)	0.00%	0.00%
Gambling (>10% revenues)	0.00%	0.00%
% of the Fund invested in companies which:		
Have any tie to controversial weapons	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: Brewers, Casinos & Gaming, Distillers & Vintners, or Tobacco	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	20.00%	62.56%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability Indicator	2022 MSCI AC World Index GHG Emissions Intensity	2022 Indicator Threshold (50% of 2022 MSCI AC World Index GHG Emissions intensity)	2022 Portfolio GHG Emissions Intensity
GHG Emission intensity:			
The Investment Adviser seeks to achieve a GHG emissions intensity for the portfolio that is significantly lower (here defined as at least 50% lower as measured by metric tonnes of GHG per \$1m of company sales using Scope 1 and 2 emissions) than that of the reference universe. The reference universe is defined, only for the purposes of comparing GHG emissions intensity, as the MSCI AC World Index.	182.65	91.32	23.13*

* This means the portfolio's GHG emissions intensity was 87.33% lower than the GHG emissions intensity of the MSCI AC World Index.

Sustainability Indicator	Reference Universe Reduction Threshold	2022 Reference Universe Reduction Value
Reference universe reduction		
The Investment Adviser committed to at least a 20% reduction in the reference universe through applying the following environmental exclusions: <ol style="list-style-type: none"> 1. Companies with any tie to fossil fuels; 2. Companies that has been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), metals and mining; 3. Companies for which GHG emissions intensity estimates are not available and/or cannot be estimated (in the Investment Team's discretion); and 4. The remaining companies are then ranked according to their GHG emissions intensity estimates, and those with the highest intensity are excluded from the reference universe, with the view to ensuring that these binding criteria should collectively result in a reduction of the reference universe by at least 20% in a significantly engaging manner <p>The total aimed % reduction in the reference universe, and the actual total % reduction in the reference universe were:</p>	20.00%	20.13%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The companies that were classified as sustainable investments according to the SFDR rules met a set of tests including evidence of having positive contribution to environmental or social objectives which the Fund defines as being positively aligned with the UN Sustainable Development Goals ("SDGs"). The UN SDGs include environmental (e.g., Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. In order to be classified as sustainable investments, the Fund's investments had a net positive alignment across the UN SDGs, either through their products and services (e.g. a health care company's essential medical products may be positively aligned with the Good Health and Well Being SDG), or through business practices such as policies, actions and targets aimed at aligning with one or more of the SDGs (e.g. a company with robust carbon reduction plans may align with the Climate Action SDG by reducing its own emissions, switching to renewable energy or by seeking emission reductions in its value chain by engaging with suppliers and/or through product design).

The Investment Adviser classified a company as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria assessed using third-party data: 1) having a net positive aggregate alignment score across all the SDGs (i.e. scores measuring positive alignment to individual SDGs have to, in total, be greater than the total of any negative alignment scores), 2) having sufficient positive alignment (in the Investment Adviser's view) with at least one individual SDG and 3) not having any material mis-alignments on any of the SDGs.

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal analysis (having regard to its engagements with the company or other data sources), the Investment Adviser treated an investment as passing its sustainable investment criteria, contrary to the position indicated by the third-party SDG alignment score. The Investment Adviser did this when, for example, it considered the third-party SDG alignment data to be out of date or incorrect based on the Investment Adviser's own engagement efforts or research.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the relevant principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund gained data to assess the relevant PAI indicators from third-party providers as well as internal research.

To determine whether significant harm was caused, initial thresholds for each of the relevant mandatory PAI indicator were set.

Where data was not available, the investment was deemed to fail the initial test and was not regarded as a sustainable investment.

However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the issuer, and therefore did not provide data on that PAI indicator, the investment was deemed to pass the initial test on the basis that the investment’s activities are unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

Additionally, in certain instances, the outcome of the initial test was supplemented (as appropriate) by the Investment Adviser’s internal qualitative assessments on significant harm (having regard to other data sources and/or its engagements with the investment) on one or more PAIs.

As part of its long-term investment approach, the investment team also sought to engage with company management teams and boards to encourage companies towards better ESG practices.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not classify as sustainable investments:

- issuers that failed to comply with the themes and values promoted by the UN Global Compact or the OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles); and
- issuers which lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by the UN Global Compact principles and OECD Guidelines for Multinational Enterprises (which incorporate the ILO Fundamental Principles).

In each case, this assessment was based on information obtained from third-party data providers and/or internal assessments.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

All the relevant mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

PAIs were also considered with respect to the other investments of the Fund in the following manner:

- the environmental and social characteristics promoted by the Fund incorporate consideration of the following PAIs through binding exclusions:
- PAI indicator (3): GHG intensity of investee companies (through restrictions based on Scope 1 and 2 GHG intensity);
- PAI indicator (4): Exposure to companies active in the fossil fuel sector;
- PAI indicator (14): Exposure to controversial weapons (using third-party data with a methodology that complies with the SFDR definition);
- engagement and stewardship with issuers across all relevant mandatory PAI indicators in the SFDR rules (except on controversial weapons as they are excluded) on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be materially relevant to the long-term sustainability of high returns on capital, or materially adversely impacted by the activities of the issuer).

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Microsoft Corp.	Information Technology	6.99%	United States of America
Visa, Inc. 'A'	Information Technology	6.09%	United States of America
SAP SE	Information Technology	5.01%	Germany
Accenture plc 'A'	Information Technology	4.85%	United States of America
Danaher Corp.	Health Care	4.45%	United States of America
Thermo Fisher Scientific, Inc.	Health Care	4.36%	United States of America
Reckitt Benckiser Group plc	Consumer Staples	3.86%	United Kingdom
Becton Dickinson and Co.	Health Care	3.58%	United States of America
Intercontinental Exchange, Inc.	Financials	3.55%	United States of America
Abbott Laboratories	Health Care	3.45%	United States of America
Constellation Software, Inc.	Information Technology	3.10%	Canada
Baxter International, Inc.	Health Care	2.95%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.24%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

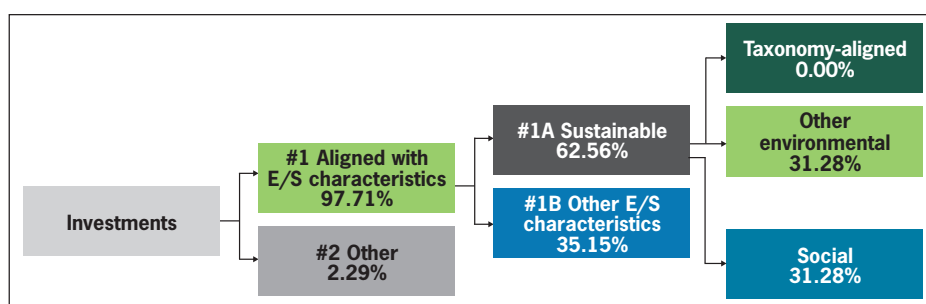

What was the proportion of sustainability-related investments?

97.71% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

62.56% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for classifying companies as sustainable investments includes an assessment based on alignment with the UN SDGs, which includes both environmental and social factors (as relevant) as set out above. The Fund does not classify its sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has therefore equally divided the proportion of the Fund's assets invested in companies classified as sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	39.77%
Health Care	25.14%
Consumer Staples	9.76%
Financials	9.47%
Industrials	9.25%
Communication Services	2.47%
Consumer Discretionary	1.56%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes “other” assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. Therefore, none of the Fund’s assets that were invested in companies classified as sustainable investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

31.28% of the Fund’s assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

What was the share of socially sustainable investments?

31.28% of the Fund’s assets were invested in companies classified as sustainable investments with a social objective.

As noted above in response to the question “What was the asset allocation?”, the Fund does not classify its sustainable investments as having either an environmental or social objective. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s assets invested in companies classified as sustainable investments into environmental and social categories.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.29% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund’s environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns. The investment process is focused on understanding the long-term viability of a company’s returns on operating capital and engagement with management plays a vital role in this. It informs them whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies and boards on material ESG risks and opportunities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Japanese Equity Fund

Legal entity identifier: 549300Q8BUGJZ05GQE69

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the fund met its environmental and/or social characteristics through the following:

ESG tilt:

The Fund promoted environmental and social characteristics by maintaining a higher ESG score at portfolio level than the MSCI Japan Index, according to a proprietary ESG scoring methodology developed by the Investment Adviser¹.

The Investment Adviser monitored the attainment of the environmental and social characteristics promoted by the Fund by monitoring the Fund's ESG score against that of the MSCI Japan Index. The proprietary ESG scoring methodology developed by the Investment Adviser is based on external ESG data provided by third party vendors as well as the Investment Adviser's qualitative evaluation of investee companies. To determine the customized ESG score for a company, an industry-adjusted score, provided by a third-party data provider as determined by the Investment Adviser, is used as a quantitative base to reflect the company's ESG performance relative to the standards and performance of the company's industry peers. The Investment Adviser then adjusts this score based on their own qualitative assessment and expectations of how a company's ESG activities may improve corporate value, considering the following criteria:

- Attitude to Engagement;
- ESG Commitment;
- ESG Disclosure;
- Business Strategy including ESG;
- Business Risks from an ESG viewpoint; and
- Expectation for change.

The ESG scores of the Fund's investments are then aggregated at the portfolio level and monitored daily against the ESG score for the MSCI Japan Index, which may be subject to similar adjustment by the Investment Adviser based on its own qualitative assessment as described above.

Exclusions:

The Fund promoted:

- the environmental characteristic of contributing towards climate change mitigation by excluding companies involved in thermal coal mining and generation; and
- the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

The Fund also contributed to environmental and social themes by avoiding investments in issuers which experienced severe ESG controversies (and no appropriate remedial action had taken place), or which failed to adhere to certain international norms.

Further detail on the nature of these exclusions is set out in response to the question 'How did the sustainability indicators perform?'.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

¹ Unless otherwise noted, references to the Investment Adviser refer to the Investment Adviser of the Fund and/or any Sub-Investment Advisers engaged for management of the Fund (as appropriate).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
ESG Tilt:		
Portfolio level ESG score which is higher than MSCI Japan Index (shown in the Indicator Threshold column)	7.15	7.19
Exclusions:		
% Fund exposure to investee companies deriving revenue from:		
Thermal coal mining and/or thermal coal power generation (>10% revenue)	0.00%	0.00%
Supply of key products necessary for production of tobacco products & tobacco manufacturing (>5% revenue)	0.00%	0.00%
Adult entertainment (>5% revenue)	0.00%	0.00%
Civilian firearms production (>5% revenue)	0.00%	0.00%
Gambling (>5% revenue)	0.00%	0.00%
% of the Fund exposure to investee companies which:		
Manufacture whole weapon systems, intended use components, or are a majority owner of, or majority owned by, controversial weapons company, including cluster munitions	0.00%	0.00%
% Fund exposure to investee companies which breach International norms:		
Experienced ESG controversies without remedial action	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

- The Fund excluded companies which receive a certain percentage of their revenue from thermal coal mining and generation. The Fund therefore partly considers PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded companies which have committed violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (“OECD”) Guidelines for Multinational Enterprises. The Fund therefore considers PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- The Fund excluded companies which have any exposure to controversial weapons. The Fund therefore considered the PAI indicator 14: exposure to controversial weapons.

In addition, the Investment Adviser also engaged with companies on the following PAIs on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer):

- PAI indicator 1: GHG emissions;
- PAI indicator 2: carbon footprint;
- PAI indicator 3: GHG intensity of investee companies;
- PAI indicator 5: share of non-renewable energy consumption and production;
- PAI indicator 6: energy consumption intensity per high impact climate sector; and
- PAI indicator 13: board gender diversity.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 50.30%

Security	Sector	% Assets	Country
Daiichi Sankyo Co. Ltd.	Health Care	5.47%	Japan
Hitachi Ltd.	Industrials	5.35%	Japan
Toyota Motor Corp.	Consumer Discretionary	5.22%	Japan
Mitsubishi Corp.	Industrials	4.95%	Japan
Mitsubishi UFJ Financial Group, Inc.	Financials	4.91%	Japan
Sony Group Corp.	Consumer Discretionary	4.73%	Japan

Resona Holdings, Inc.	Financials	3.50%	Japan
Nippon Telegraph & Telephone Corp.	Communication Services	3.17%	Japan
West Holdings Corp.	Utilities	3.08%	Japan
Mitsubishi Heavy Industries Ltd.	Industrials	2.92%	Japan
Ajinomoto Co., Inc.	Consumer Staples	2.79%	Japan

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.14% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	32.99%
Financials	18.90%
Consumer Discretionary	11.85%
Materials	8.13%
Health Care	5.47%
Utilities	5.17%
Consumer Staples	5.12%
Information Technology	4.13%
Communication Services	3.17%
Energy	1.95%
Real Estate	1.40%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	13.60%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. This indicator is therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.86% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Sub-Investment Adviser conducted engagements through dialogue on Business Strategy, Business Structures, Capital Structures, Corporate Governance, Proposals for General Meetings of Shareholders, and ESG issues.

The team focused on “Material ESG issues” which are common to all sectors as well as important issues that are material to individual companies. The Sub-Investment Adviser also conducted stewardship activities such as “Purpose-based dialogues” with companies in order to contribute to the enhancement of corporate value and sustainable growth of investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: NextGen Emerging Markets Fund

Legal entity identifier: 5493005T095BBNXCKP66

Reference period: 16 May 2022 to 31 December 2022

This Fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, firstly the Fund promoted the environmental characteristic of contributing towards climate change mitigation by seeking to achieve a lower carbon footprint than the MSCI Frontier Emerging Markets Index in aggregate at the portfolio level.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and to human health and well-being, such as tobacco and weapons, by applying binding exclusions. Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Sector-based exclusions based on the universe as defined in the prospectus:		
% of the Fund's exposure to issuers whose core business as defined by more than 10% revenues from:		
Fossil fuels	0.00%	0.00%
Thermal coal mining extraction	0.00%	0.00%
Thermal coal-based power generation	0.00%	0.00%
Adult entertainment	0.00%	0.00%
Tobacco	0.00%	0.00%
% of the Fund's exposure to issuers which derive more than 5% revenue from:		
Arctic oil and gas	0.00%	0.00%
Oil sands	0.00%	0.00%
Gambling	0.00%	0.00%
% of the Fund invested in issuers with any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the universe's highest carbon emitters, defined as:		
The top 20 emitters by absolute emissions	0.00%	0.00%
The top 40 emitters by emissions intensity	0.00%	0.00%
% of the Fund invested in state-owned enterprises in universe, defined by enterprises with >=35% state ownership, excluding the sectors of financials, healthcare and communication services:	0.00%	0.00%
% of the Fund invested in the following sectors, as defined by MSCI Global Industry Classification System:		
Utilities sector (excluding renewables & water)	0.00%	0.00%
Construction materials	0.00%	0.00%
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:		
Committed violations of the UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
An unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint		
Carbon Footprint lower than that of the MSCI Frontier Emerging Markets Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	536.20	65.50

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.00%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered some of the principal adverse impacts (“PAI”) on sustainability factors through the Fund’s exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across, all relevant mandatory PAI indicators in the SFDR rules on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 52.30%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
FPT Corp.	Information Technology	5.42%	Vietnam
LPP SA	Consumer Discretionary	5.32%	Poland
LiveChat Software SA	Information Technology	5.31%	Poland
11 bit studios SA	Communication Services	5.27%	Poland
Bank Mandiri Persero Tbk. PT	Financials	4.66%	Indonesia
Capitec Bank Holdings Ltd.	Financials	4.63%	South Africa
Industri Jamu Dan Farmasi Sido Muncul Tbk. PT	Consumer Staples	4.58%	Indonesia
Vietnam Dairy Products JSC	Consumer Staples	4.42%	Vietnam
Mobile World Investment Corp	Consumer Discretionary	4.29%	Vietnam
EPAM Systems	Information Technology	4.28%	United States of America
Mercadolibre Inc	Consumer Discretionary	4.12%	United States of America

What was the proportion of sustainability-related investments?

91.21% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

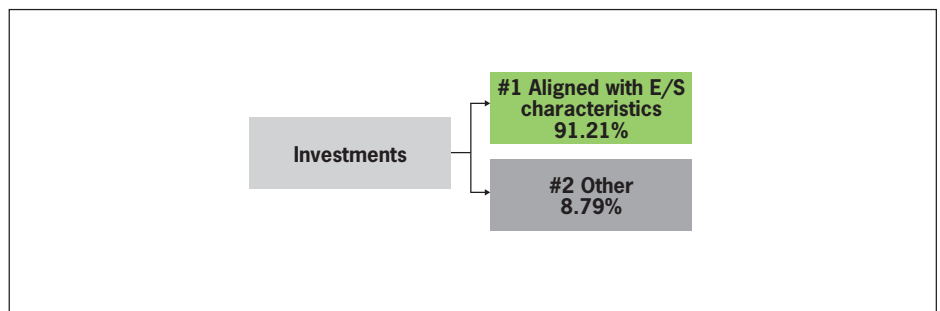

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Frontier Emerging Markets Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.07%
Consumer Discretionary	15.74%
Financials	11.75%
Consumer Staples	10.18%
Communication Services	9.23%
Materials	8.75%
Energy	4.31%
Health Care	3.18%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

8.79% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. This is comprised of cash held for ancillary liquidity, which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During 2022, MSIM’s Emerging Markets Investment Adviser met with 69 companies to discuss environmental and social sustainability issues. The Investment Adviser have been engaging with companies on these issues since 2016 but over time, they have refined their focus, which has led to more material and thematic discussions that often span multiple years. One of the team’s priority sustainability themes during 2022 was decarbonization, so the team encouraged company managements to articulate detailed decarbonization plans with both long and short-term targets that are high-quality, technologically feasible and integrated within their business strategy. The team leveraged resources like Transition Pathway Initiative (TPI) and Climate Action 100+ to guide large emitters to adopt a long-term plan that’s both economically viable and aligned with global climate commitments. This is all part of a process as it takes time for these conversations to lead to tangible results, and often even longer to see an actual reduction in emissions.

The Investment Adviser believes that the path to net zero can only be achieved through a combination of economic incentives and the influence of external stakeholder pressures. Above all, addressing climate change requires collective action across all sectors, as physical and transition risks can affect all companies. The Investment Adviser spent several months assessing decarbonization pathways, monitoring the different stages in the journey for the highest emitters and the progress we would expect.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

During the reference period, the Investment Adviser also notably increased their engagements with investee companies on social issues specifically focused on labor management, employee safety and human rights risks within the supply chains of companies that are susceptible to forced labor. For financial companies and fast-moving consumer goods and healthcare companies, the majority of engagements centered on the theme of access and affordability.

The Investment Adviser continues to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. In particular, the Investment Adviser engaged with companies on board composition, especially independence and gender diversity. Boards need to have a range of skills, opinions and experiences for optimal decision making and shareholder representation. Specifically, gender diversity acts as a proxy for stakeholders to evaluate whether the vetting and decision-making process on the board is thorough. When there is a lack of diversity represented at the board or management level, this can act as a red flag. For instance, the Investment Adviser started to engage during the year with a cosmetics company that has a majority female customer base yet there were no women on the board. In this instance, the Investment Adviser expects the conversations will be long-term and ongoing as the company does not have board elections until 2024. The Investment Adviser also engaged with company managements on the issue of gender pay gap. In many cases, the first step of these conversations is merely obtaining of the data, as complex subsidiary structures within emerging markets can make this particularly hard to determine.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Asia Equity Fund

Legal entity identifier: 3YN85S5L733W17SQIB18

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.81% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted environmental and social characteristics in the following ways.

Firstly, a proportion of the Fund's portfolio was thematically aligned towards sustainable development in one of the Investment Adviser's chosen environmental and social sub-themes, which were:

- responsible energy;
- sustainable production and circular economy;
- decent work and innovation; and
- access, affordability, and sustainable economic growth.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and social characteristics described above by applying binding exclusions.

Thirdly, having regard to the low carbon aims of the Paris Agreement the Fund promoted the environmental characteristic of maintaining a lower carbon footprint than the MSCI Emerging Markets Index in aggregate at the portfolio level.

Finally, the Fund invested 43% of its portfolio in sustainable investments.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Thematic alignment to sustainable development:		
As stated above, the Investment Adviser aimed to ensure that a minimum of 40% of the Fund's assets were invested in chosen environmental and social sub-themes. The relevant criteria varied by sub-theme and are listed below. The %s of the Fund invested in each of the below sub-themes were:		
Responsible Energy Transition	n/a	14.83%
Sustainable Production & Circular Economy	n/a	19.07%
Improved Access, Affordability & Sustainable Economic Growth	n/a	36.91%
Decent Work & Innovation	n/a	10.68%
Total: Thematic alignment to sustainable development (>40% of portfolio)	40.00%	81.49%
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers which derive revenue from:		
Thermal coal mining or extraction (10% revenue)	0.00%	0.00%
Thermal coal based power generation (10% revenue)	0.00%	0.00%
Fossil fuels (10% revenue)	0.00%	0.00%
Oil sands (5% revenue)	0.00%	0.00%
Arctic oil (5% revenue)	0.00%	0.00%
Arctic gas (5% revenue)	0.00%	0.00%
Gambling (5% revenue)	0.00%	0.00%
Adult entertainment (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for tobacco (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for alcohol (10% revenue)	0.00%	0.00%
% of the Fund's exposure to issuers which have any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the MSCI EM index's highest carbon emitters, defined as:		
The top 80 emitters by emissions intensity	0.00%	0.00%
The top 20 emitters by absolute emissions	0.00%	0.00%
% of the Fund invested in state-owned enterprises. Defined by enterprises with >=35% state ownership, excluding financials, communication services and healthcare sectors		
	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:	0.00%	0.00%
committed violations of the of UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
an unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions.	285.20	88.40
Sustainable Investments:		
% of the Fund that are sustainable investments	20.00%	42.81%
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.50%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to at least one of the environmental or social sub-themes listed above. The Investment Adviser used metrics to ensure that the sustainable investments contribute to at least one of these themes, for example:

- by considering quantifiable positive metrics such as aligned revenues (being revenues from activities aligned with a theme, e.g. revenues from renewable energy generation in the case of the responsible energy theme) and aligned business activities; and
- other relevant metrics such as customer composition, Transitions Performance Index ("TPI") scores, above average wages, employee retention rates, research and development spend, international sales or private label sales (as indicators of investment in local economic growth and quality employment opportunities), diversity metrics such as women in the workforce or management, and operational metrics relating to inclusion or access to financial services communications or healthcare.

Each metric had a threshold or benchmark that the company met in order to be considered aligned with a sustainability theme, e.g. at least 20% for aligned revenues or above country or industry averages on other metrics. Further detail regarding the relevant metrics for each sub-theme is set out under "How did the sustainability indicators perform?" above.

The Investment Adviser obtained data on these metrics from company reporting and third-party sources.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the do no significant harm test for sustainable investments, the Fund assessed the mandatory PAI indicators that are (i) relevant to the investment, and (ii) deemed material to a particular issuer, based on third-party data providers’ assessment of materiality.

Companies with two missing PAI indicator data points were not considered sustainable investments due to lack of data.

For each mandatory PAI the Fund set thresholds specific to that PAI to determine whether significant harm was caused.

PAI indicators were sourced from company reported data, third-party data and the investment team’s engagements with company management. The Investment Adviser used third-party information, and supplemented individual data points based on company engagements or company websites in certain cases.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's investments were screened for minimum social safeguards, before going through the PAI screen described above.

The Investment Adviser used third party data sources to undertake minimum social safeguards screening. The screening undertaken included identification of companies which are subject to UNGC and OECD controversy and compliance flags, as well as flags for compliance with international norms. In addition, the Fund excluded investments in issuers that fail to comply with the UN Global Compact, or the OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above. The portion of the Fund that is not made of sustainable investments considered certain PAI through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across all relevant mandatory PAI indicators in the SFDR rules on a materiality basis, meaning if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 49.81%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Samsung Electronics Co. Ltd.	Information Technology	5.92%	South Korea
ICICI Bank Ltd.	Financials	4.93%	India
Delta Electronics, Inc.	Information Technology	4.04%	Taiwan
Taiwan Semiconductor Manufacturing Co. Ltd.	Information Technology	3.62%	Taiwan
Mahindra & Mahindra Ltd.	Consumer Discretionary	3.41%	India
Taiwan Semiconductor Manufacturing Co. Ltd., ADR	Information Technology	3.27%	Taiwan
HDFC Bank Ltd., ADR	Financials	3.10%	India
AIA Group Ltd.	Financials	3.01%	Hong Kong
Bank Rakyat Indonesia Persero Tbk. PT	Financials	3.01%	Indonesia
Tencent Holdings Ltd.	Communication Services	2.95%	China
Housing Development Finance Corp. Ltd.	Financials	2.88%	India
DBS Group Holdings Ltd.	Financials	2.83%	Singapore
Reliance Industries Ltd.	Energy	2.63%	India
Airtac International Group	Industrials	2.16%	Taiwan
Bank Central Asia Tbk. PT	Financials	2.05%	Indonesia

What was the proportion of sustainability-related investments?

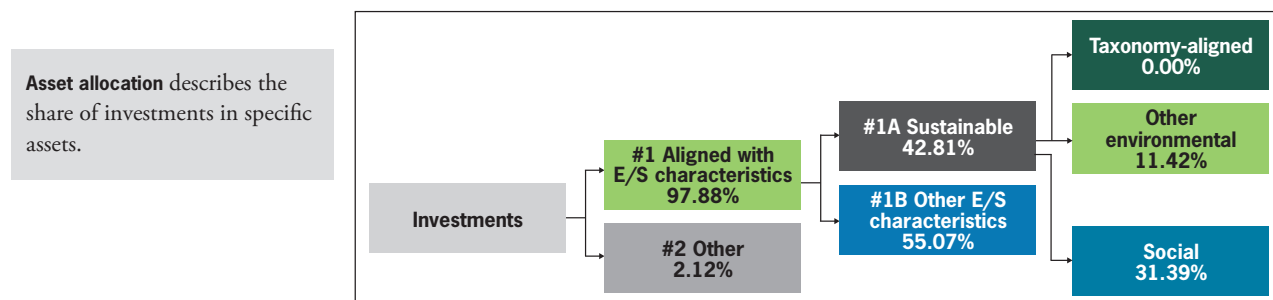

97.88% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

42.81% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social objectives respectively.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	35.39%
Information Technology	28.61%
Consumer Discretionary	11.05%
Industrials	5.53%
Consumer Staples	5.28%
Communication Services	4.25%
Materials	3.21%
Energy	2.63%
Health Care	2.43%
Real Estate	0.96%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

11.42% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

31.39% of the Fund’s investments were sustainable investments with a social objective during the reference period.

As noted above, this Fund has categorised investments as having either environmental or social objectives for the purposes of this report. However, please note that the sustainable investments with a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.12% of the Fund’s investments were comprised of (i) companies with no sustainable theme or where a dedicated company engagement to supplement data points has not yet been completed, (ii) hedging instruments and/or (iii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During 2022, MSIM’s Emerging Markets Investment Adviser met with 69 companies to discuss environmental and social sustainability issues. The Investment Adviser have been engaging with companies on these issues since 2016 but over time, they have refined their focus, which has led to more material and thematic discussions that often span multiple years. One of the team’s priority sustainability themes during 2022 was decarbonization, so the team encouraged company managements to articulate detailed decarbonization plans with both long and short-term targets that are high-quality, technologically feasible and integrated within their business strategy. The team leveraged resources like Transition Pathway Initiative (TPI) and Climate Action 100+ to guide large emitters to adopt a long-term plan that’s both economically viable and aligned with global climate commitments. This is all part of a process as it takes time for these conversations to lead to tangible results, and often even longer to see an actual reduction in emissions.

The Investment Adviser believes that the path to net zero can only be achieved through a combination of economic incentives and the influence of external stakeholder pressures. Above all, addressing climate change requires collective action across all sectors, as physical and transition risks can affect all companies. The Investment Adviser spent several months assessing decarbonization pathways, monitoring the different stages in the journey for the highest emitters and the progress we would expect.

During the reference period, the Investment Adviser also notably increased their engagements with investee companies on social issues specifically focused on labor management, employee safety and human rights risks within the supply chains of companies that are susceptible to forced labor. For financial companies and fast-moving consumer goods and healthcare companies, the majority of engagements centered on the theme of access and affordability.

The Investment Adviser continues to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. In particular, the Investment Adviser engaged with companies on board composition, especially independence and gender diversity. Boards need to have a range of skills, opinions and experiences for optimal decision making and shareholder representation. Specifically, gender diversity acts as a proxy for stakeholders to evaluate whether the vetting and decision-making process on the board is thorough. When there is a lack of diversity represented at the board or management level, this can act as a red flag. For instance, the Investment Adviser started to engage during the year with a cosmetics company that has a majority female customer base yet there were no women on the board. In this instance, the Investment Adviser expects the conversations will be long-term and ongoing as the company does not have board elections until 2024. The Investment Adviser also engaged with company managements on the issue of gender pay gap. In many cases, the first step of these conversations is merely obtaining of the data, as complex subsidiary structures within emerging markets can make this particularly hard to determine.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Emerging Markets Equity Fund

Legal entity identifier: T65E8GUF6U708NUAP89

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.84% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted environmental and social characteristics in the following ways.

Firstly, a proportion of the Fund's portfolio was thematically aligned towards sustainable development in one of the Investment Adviser's chosen environmental and social sub-themes, which were:

- responsible energy;
- sustainable production and circular economy;
- decent work and innovation; and
- access, affordability, and sustainable economic growth.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and social characteristics described above by applying binding exclusions.

Thirdly, having regard to the low carbon aims of the Paris Agreement the Fund promoted the environmental characteristic of maintaining a lower carbon footprint than the MSCI Emerging Markets Index in aggregate at the portfolio level.

Finally, the Fund invested 43% of its portfolio in sustainable investments.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Thematic alignment to sustainable development:		
As stated above, the Investment Adviser aimed to ensure that a minimum of 40% of the Fund's assets were invested in chosen environmental and social sub-themes. The relevant criteria varied by sub-theme and are listed below. The %s of the Fund invested in each of the below sub-themes were:		
Responsible Energy Transition	n/a	17.39%
Sustainable Production & Circular Economy	n/a	26.07%
Improved Access, Affordability & Sustainable Economic Growth	n/a	29.69%
Decent Work & Innovation	n/a	9.73%
Total: Thematic alignment to sustainable development (>40% of portfolio)	40.00%	82.88%
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers which derive revenue from:		
Thermal coal mining or extraction (10% revenue)	0.00%	0.00%
Thermal coal based power generation (10% revenue)	0.00%	0.00%
Fossil fuels (10% revenue)	0.00%	0.00%
Oil sands (5% revenue)	0.00%	0.00%
Arctic oil (5% revenue)	0.00%	0.00%
Arctic gas (5% revenue)	0.00%	0.00%
Gambling (5% revenue)	0.00%	0.00%
Adult entertainment (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for tobacco (10% revenue)	0.00%	0.00%
Producing, supplying or offering retail services for alcohol (10% revenue)	0.00%	0.00%
% of the Fund's exposure to issuers which have any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the MSCI EM index's highest carbon emitters, defined as:		
The top 80 emitters by emissions intensity	0.00%	0.00%
The top 20 emitters by absolute emissions	0.00%	0.00%
% of the Fund invested in state-owned enterprises. Defined by enterprises with >=35% state ownership, excluding financials, communication services and healthcare sectors		
	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:	0.00%	0.00%
committed violations of the of UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
an unremediated "Red" ESG controversy	0.00%	0.00%
Lower Carbon Footprint:		
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions.	322.60	130.50
Sustainable Investments:		
% of the Fund that are sustainable investments	20.00%	43.84%
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.90%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to at least one of the environmental or social sub-themes listed above. The Investment Adviser used metrics to ensure that the sustainable investments contribute to at least one of these themes, for example:

- by considering quantifiable positive metrics such as aligned revenues (being revenues from activities aligned with a theme, e.g. revenues from renewable energy generation in the case of the responsible energy theme) and aligned business activities; and
- other relevant metrics such as customer composition, Transitions Performance Index ("TPI") scores, above average wages, employee retention rates, research and development spend, international sales or private label sales (as indicators of investment in local economic growth and quality employment opportunities), diversity metrics such as women in the workforce or management, and operational metrics relating to inclusion or access to financial services communications or healthcare.

Each metric had a threshold or benchmark that the company met in order to be considered aligned with a sustainability theme, e.g. at least 20% for aligned revenues or above country or industry averages on other metrics. Further detail regarding the relevant metrics for each sub-theme is set out under "How did the sustainability indicators perform?" above.

The Investment Adviser obtained data on these metrics from company reporting and third-party sources.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the do no significant harm test for sustainable investments, the Fund assessed the mandatory PAI indicators that are (i) relevant to the investment, and (ii) deemed material to a particular issuer, based on third-party data providers’ assessment of materiality.

Companies with two missing PAI indicator data points were not considered sustainable investments due to lack of data.

For each mandatory PAI the Fund set thresholds specific to that PAI to determine whether significant harm was caused.

PAI indicators were sourced from company reported data, third-party data and the investment team’s engagements with company management. The Investment Adviser used third-party information, and supplemented individual data points based on company engagements or company websites in certain cases.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's investments were screened for minimum social safeguards, before going through the PAI screen described above.

The Investment Adviser used third party data sources to undertake minimum social safeguards screening. The screening undertaken included identification of companies which are subject to UNGC and OECD controversy and compliance flags, as well as flags for compliance with international norms. In addition, the Fund excluded investments in issuers that fail to comply with the UN Global Compact, or the OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above. The portion of the Fund that is not made of sustainable investments considered certain PAI through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across all relevant mandatory PAI indicators in the SFDR rules on a materiality basis, meaning if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 42.18%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Samsung Electronics Co. Ltd.	Information Technology	4.92%	South Korea
Taiwan Semiconductor Manufacturing Co. Ltd.	Information Technology	3.92%	Taiwan
Tencent Holdings Ltd.	Communication Services	3.27%	China
Taiwan Semiconductor Manufacturing Co. Ltd., ADR	Information Technology	3.22%	Taiwan
Reliance Industries Ltd.	Energy	3.03%	India
ICICI Bank Ltd.	Financials	3.00%	India
Grupo Financiero Banorte SAB de CV 'O'	Financials	2.87%	Mexico
Wal-Mart de Mexico SAB de CV	Consumer Staples	2.81%	Mexico
HDFC Bank Ltd., ADR	Financials	2.52%	India
Anglo American plc	Materials	2.40%	South Africa
Delta Electronics, Inc.	Information Technology	2.39%	Taiwan
Mondi plc	Materials	2.20%	United Kingdom
Itau Unibanco Holding SA Preference	Financials	2.12%	Brazil
Capitec Bank Holdings Ltd.	Financials	1.77%	South Africa
Airtac International Group	Industrials	1.74%	Taiwan

What was the proportion of sustainability-related investments?

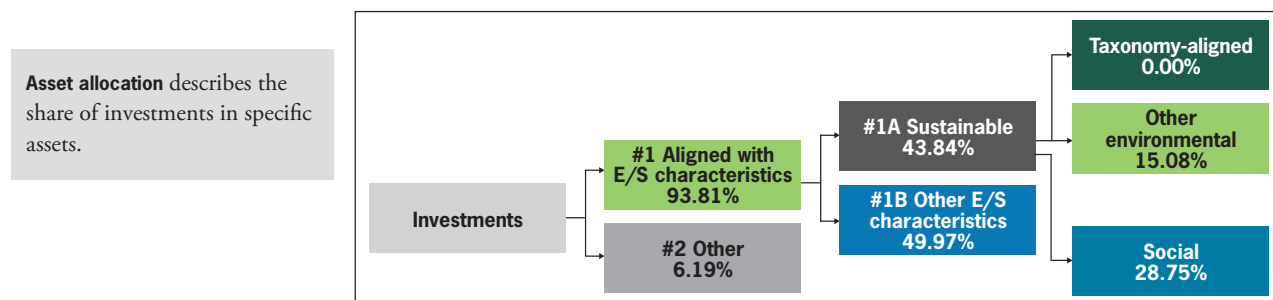

93.81% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

43.84% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Emerging Markets Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social objectives respectively.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	27.10%
Information Technology	21.91%
Materials	13.58%
Consumer Discretionary	13.54%
Consumer Staples	7.01%
Industrials	4.31%
Communication Services	3.27%
Energy	3.03%
Health Care	2.66%
Real Estate	0.68%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.30%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund’s sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.08% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

28.75% of the Fund’s investments were sustainable investments with a social objective during the reference period.

As noted above, this Fund has categorised investments as having either environmental or social objectives for the purposes of this report. However, please note that the sustainable investments with a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

6.19% of the Fund’s investments were comprised of (i) companies with no sustainable theme or where a dedicated company engagement to supplement data points has not yet been completed, (ii) hedging instruments and/or (iii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During 2022, MSIM’s Emerging Markets Investment Adviser met with 69 companies to discuss environmental and social sustainability issues. The Investment Adviser have been engaging with companies on these issues since 2016 but over time, they have refined their focus, which has led to more material and thematic discussions that often span multiple years. One of the team’s priority sustainability themes during 2022 was decarbonization, so the team encouraged company managements to articulate detailed decarbonization plans with both long and short-term targets that are high-quality, technologically feasible and integrated within their business strategy. The team leveraged resources like Transition Pathway Initiative (TPI) and Climate Action 100+ to guide large emitters to adopt a long-term plan that’s both economically viable and aligned with global climate commitments. This is all part of a process as it takes time for these conversations to lead to tangible results, and often even longer to see an actual reduction in emissions.

The Investment Adviser believes that the path to net zero can only be achieved through a combination of economic incentives and the influence of external stakeholder pressures. Above all, addressing climate change requires collective action across all sectors, as physical and transition risks can affect all companies. The Investment Adviser spent several months assessing decarbonization pathways, monitoring the different stages in the journey for the highest emitters and the progress we would expect.

During the reference period, the Investment Adviser also notably increased their engagements with investee companies on social issues specifically focused on labor management, employee safety and human rights risks within the supply chains of companies that are susceptible to forced labor. For financial companies and fast-moving consumer goods and healthcare companies, the majority of engagements centered on the theme of access and affordability.

The Investment Adviser continues to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. In particular, the Investment Adviser engaged with companies on board composition, especially independence and gender diversity. Boards need to have a range of skills, opinions and experiences for optimal decision making and shareholder representation. Specifically, gender diversity acts as a proxy for stakeholders to evaluate whether the vetting and decision-making process on the board is thorough. When there is a lack of diversity represented at the board or management level, this can act as a red flag. For instance, the Investment Adviser started to engage during the year with a cosmetics company that has a majority female customer base yet there were no women on the board. In this instance, the Investment Adviser expects the conversations will be long-term and ongoing as the company does not have board elections until 2024. The Investment Adviser also engaged with company managements on the issue of gender pay gap. In many cases, the first step of these conversations is merely obtaining of the data, as complex subsidiary structures within emerging markets can make this particularly hard to determine.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Advantage Fund

Legal entity identifier: 2NPF4LYIICQVCUT1Q64

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.96%

Security	Sector	% Assets	Country
Snowflake, Inc. 'A'	Information Technology	7.30%	United States of America
Uber Technologies, Inc.	Industrials	7.09%	United States of America
Royalty Pharma plc 'A'	Health Care	6.91%	United States of America
ASML Holding NV, NYRS	Information Technology	6.43%	Netherlands
Shopify, Inc. 'A'	Information Technology	5.60%	Canada
Trade Desk, Inc. (The) 'A'	Communication Services	5.50%	United States of America
Cloudflare, Inc. 'A'	Information Technology	5.24%	United States of America
Amazon.com, Inc.	Consumer Discretionary	4.48%	United States of America
Datadog, Inc. 'A'	Information Technology	4.41%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

95.98% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	37.07%
Consumer Discretionary	17.66%
Communication Services	15.66%
Health Care	12.78%
Industrials	9.32%
Materials	1.82%
Financials	1.67%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

4.02% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Focus Property Fund

Legal entity identifier: 5493001SWQDPM7UXE392

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 53.04%

Security	Sector	% Assets	Country
Prologis, Inc., REIT	Real Estate	9.80%	United States of America
American Tower Corp., REIT	Real Estate	9.16%	United States of America
Welltower, Inc., REIT	Real Estate	6.77%	United States of America
Public Storage, REIT	Real Estate	6.63%	United States of America
SBA Communications Corp., REIT 'A'	Real Estate	6.06%	United States of America
Sun Communities, Inc., REIT	Real Estate	5.12%	United States of America
Equinix, Inc., REIT	Real Estate	4.77%	United States of America
Mid-America Apartment Communities, Inc., REIT	Real Estate	4.73%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.41% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Real Estate	97.37%
Consumer Discretionary	0.95%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.59% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Adviser constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Growth Fund

Legal entity identifier: 3G53TROTP001D767EJ04

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 54.27%

Security	Sector	% Assets	Country
Snowflake, Inc. 'A'	Information Technology	8.05%	United States of America
Royalty Pharma plc 'A'	Health Care	7.20%	United States of America
Uber Technologies, Inc.	Industrials	6.56%	United States of America
Shopify, Inc. 'A'	Information Technology	6.21%	Canada
Trade Desk, Inc. (The) 'A'	Communication Services	6.05%	United States of America
Cloudflare, Inc. 'A'	Information Technology	5.89%	United States of America
Bill.com Holdings, Inc.	Information Technology	5.27%	United States of America
Datadog, Inc. 'A'	Information Technology	4.68%	United States of America
DoorDash, Inc. 'A'	Consumer Discretionary	4.36%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

96.18% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	40.19%
Health Care	17.81%
Consumer Discretionary	14.98%
Communication Services	13.73%
Industrials	8.63%
Financials	0.46%
Materials	0.38%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.82% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Insight Fund

Legal entity identifier: 549300ZCDS88ZDMP4R16

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Adviser:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 53.02%

Security	Sector	% Assets	Country
Snowflake, Inc. 'A'	Information Technology	7.92%	United States of America
Royalty Pharma plc 'A'	Health Care	6.88%	United States of America
Uber Technologies, Inc.	Industrials	6.31%	United States of America
Shopify, Inc. 'A'	Information Technology	6.06%	Canada
Trade Desk, Inc. (The) 'A'	Communication Services	5.82%	United States of America
Cloudflare, Inc. 'A'	Information Technology	5.69%	United States of America
Bill.com Holdings, Inc.	Information Technology	5.26%	United States of America
Datadog, Inc. 'A'	Information Technology	4.67%	United States of America
agilon health, Inc.	Health Care	4.41%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

96.80% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	39.94%
Health Care	20.93%
Communication Services	13.41%
Consumer Discretionary	13.36%
Industrials	8.28%
Financials	0.45%
Materials	0.37%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.20% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Permanence Fund

Legal entity identifier: 549300CFSTRXR2DCA135

Reference period: 16 May 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 16 May 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.21%

Security	Sector	% Assets	Country
ASML Holding NV, NYRS	Information Technology	5.94%	Netherlands
Amazon.com, Inc.	Consumer Discretionary	5.55%	United States of America
Constellation Software, Inc.	Information Technology	5.23%	Canada
Cloudflare, Inc. 'A'	Information Technology	5.12%	United States of America
Sherwin-Williams Co. (The)	Materials	4.98%	United States of America
Intercontinental Exchange, Inc.	Financials	4.96%	United States of America
ServiceNow, Inc.	Information Technology	4.93%	United States of America
Axon Enterprise, Inc.	Industrials	4.72%	United States of America
Floor & Decor Holdings, Inc. 'A'	Consumer Discretionary	4.32%	United States of America
Royalty Pharma plc 'A'	Health Care	3.34%	United States of America
Salesforce, Inc.	Information Technology	3.12%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.53% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	30.90%
Consumer Discretionary	21.17%
Industrials	11.11%
Health Care	10.60%
Financials	9.58%
Materials	7.20%
Consumer Staples	3.86%
Communication Services	3.43%
Real Estate	0.36%
Energy	0.32%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.84%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.47% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Property Fund

Legal entity identifier: HVED7LWVFTE5K53NJP05

Reference period: 12 December 2022 to 31 December 2022

This fund's classification as Article 8 under SFDR became effective on 12 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund met its social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing or be damaging to social cohesion. The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Owning, manufacturing or production of tobacco	0.00%	0.00%
Owning, manufacturing or production of coal mining	0.00%	0.00%
Owning, manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Owning, manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies deriving >10% revenue which breach International norms:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under “How did the sustainability indicators perform?” above, the Fund did not knowingly invest companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.62%

Security	Sector	% Assets	Country
Prologis, Inc., REIT	Industrial	9.62%	United States of America
Public Storage, REIT	Self storage	7.78%	United States of America
Equinix, Inc., REIT	Data centers	7.10%	United States of America
Welltower, Inc., REIT	Health care	5.36%	United States of America
VICI Properties, Inc., REIT	Specialty	5.36%	United States of America
Mid-America Apartment Communities, Inc., REIT	Residential	4.72%	United States of America
Simon Property Group, Inc., REIT	Retail	4.65%	United States of America
Equity Residential, REIT	Residential	4.06%	United States of America
Digital Realty Trust, Inc., REIT	Data centers	3.97%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.84% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Residential	19.82%
Retail	19.16%
Industrial	13.73%
Self storage	11.18%
Data centers	11.07%
Health care	9.72%
Specialty	9.12%
Lodging/resorts	2.36%
Office	0.66%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.16% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, in order to manage ESG-related risks and opportunities, the Investment Adviser generally engaged with company management at regular intervals, including engaging in active dialogues where the Fund held significant positions in a company and issues were viewed as material. The Investment Adviser constructive dialogue sought to drive positive change, improve sustainability and enhance long-term value creation. As part of this ESG engagement, the Investment Adviser assessed how the company's ESG risks and initiatives contributed to operating performance, and through conversation evaluated a range of environmental, social and governance topics.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Vitality Fund**

Legal entity identifier: **5493007UKKJN3WEI4Y14**

Reference period: **31 March 2022 to 31 December 2022**

The Fund was launched on 31 March 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|---|--|
| <input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective: ___% | <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts (“PAI”) indicators on sustainability factors through the Fund’s exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

PAI indicator (1): Greenhouse gas emissions (GHG).

PAI indicator (3): GHG intensity.

PAI indicator (5): Non-Renewable energy consumption and production; and

PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 52.23%

Security	Sector	% Assets	Country
UnitedHealth Group, Inc.	Health Care	5.40%	United States of America
Thermo Fisher Scientific, Inc.	Health Care	5.16%	United States of America
Eli Lilly & Co.	Health Care	5.15%	United States of America
Argenx SE, ADR	Health Care	4.38%	Belgium

Illumina, Inc.	Health Care	2.76%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

96.13% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Health Care	94.35%
Consumer Discretionary	1.78%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.87% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Calvert Sustainable Global Green Bond Fund

Legal entity identifier: 549300Q43ZZQCDYRE581

Reference period: 10 August 2022 to 31 December 2022

The Fund launched on 10 August 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective 91.69%:**

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It made **sustainable investments with a social objective: 6.40%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the sustainable objectives of this financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in certain types of bonds, which included the following instruments:

- bonds that were labelled “Green” by the issuer, whose proceeds were targeted to environmentally beneficial projects
- Sustainability Bonds, with a proportion of the proceeds targeted to environmentally beneficial projects; and
- Sustainability-linked Bonds, with environmental key performance indicators and targets.

All of the bonds above are referred to as “Green Bonds” in this disclosure.

On an ancillary basis, and as further described in the section “What was the asset allocation?” below, the Fund also invested in bonds which were deemed by the Investment Adviser to make a significant social positive contribution based on the Investment Adviser’s proprietary sustainability bond assessment framework.

All of the above bonds, except one holding, were labelled as green, sustainability, sustainability-linked or social bonds by external labelling regimes.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
% of the Fund’s portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund’s portfolio which was compliant with the Calvert Principles were:	90.00%	98.09%
Fund investments deemed eligible according to its Sustainable Bond Assessment framework, by receiving a score of at least three (on a scale of one to five, where five is best). The percentage of Fund investments which the Investment Adviser aimed to be deemed eligible according to its Sustainable Bond Evaluation Framework, and the actual percentage of Fund investments which met these criteria were:	90.00%	98.09%
Exclusions:		
% Fund exposure to corporate issuers deriving revenue from:		
manufacturing or production of controversial weapons	0.00%	0.00%
manufacturing or production of civilian firearms	0.00%	0.00%
manufacturing or production of tobacco	0.00%	0.00%
% Fund exposure to corporate issuers deriving more than 10% of revenue from:		
distribution or retail of tobacco	0.00%	0.00%
gambling	0.00%	0.00%
adult entertainment	0.00%	0.00%
% Fund exposure to corporate issuers which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund's sustainable investments did not cause significant harm to any environmental or social objective by avoiding investments in issuers that violated minimum social safeguards and by excluding issuers which breached thresholds set for the principal adverse impact ("PAI") indicators which the Investment Adviser is required to consider by the Sustainable Finance Disclosure Regulation ("SFDR") rules, and which are relevant to the investment.

This assessment was conducted using in-house proprietary as well as third-party research on the sustainability characteristics of the Fund's holdings.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser accounted for the PAI indicators through the application of the Calvert Principles which, considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour. In addition, the Investment Adviser tested all investments against the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules and which are relevant to the investment.

The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third-party and proprietary data for each PAI indicator. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was conducted at security level in whole or in part (for example, PAI indicators directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level), with respect to the assets underlying a securitised investment or taking into account the activities of the originator.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and as failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio.

Through the application of the Calvert Principles by the Investment Adviser as appropriate for the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, the Calvert Principles considered whether issuers:

- demonstrated poor management of environmental risks or contributed significantly to local or global environmental problems;
- demonstrated a pattern of employing forced, compulsory or child labor;
- exhibited a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibited a pattern and practice of violating the rights and protections of Indigenous Peoples.

In addition, investments were screened using third party data regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, the Investment Adviser conducted additional desktop research to verify the issuer's non-compliance. If the Investment Adviser determined that the issuer was appropriate for inclusion in the Fund notwithstanding the results of the third party screen (for example because of historical instances of non-compliance which have since been remediated in the Investment Adviser's view), the Investment Adviser documented its rationale for inclusion.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Bundesrepublik Deutschland, Reg. S 0% 15/08/2030	Treasuries	6.18%	Germany

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 43.79%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.09% of the Fund’s investments were sustainable investments.

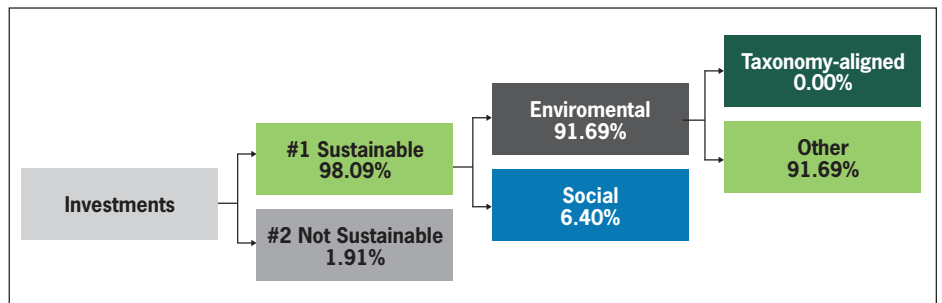

91.69% of the Fund comprised sustainable investments with an environmental objective.

6.40% of the Fund comprised sustainable investments with a social objective.

The Fund’s remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments assesses the investment’s overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social factors respectively.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	28.48%
Supranationals & Agencies	19.30%
Treasuries	16.82%
Utilities	11.39%
Real Estate	8.12%
Securitized	8.10%
Consumer Discretionary	1.04%
Industrials	0.96%
Communication Services	0.93%
Information Technology	0.49%
Health Care	0.36%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.97%

The investments in this Fund include primarily green and sustainability use of proceeds bonds, which contribute to environmental projects that help reduce GHG emissions associated with fossil fuels. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures only one issuer of a sustainability-linked bond, which derives some revenue from such activities as part of their business. However, we note that the bond is associated with a commitment from the issuer to reduce its GHG emissions.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund’s sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

91.69% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

6.40% of the Fund's investments were sustainable investments with a social objective.

As noted above, some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

1.91% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in companies that do not meet the Calvert Principles or that are involved in excluded activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Corporate Debt Fund

Legal entity identifier: 5493007BB7NIVVCOWZ40

Reference period: 1 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.79% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	10.00%	31.79%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

“The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Azure Power Energy Ltd., Reg. S 3.575% 19/08/2026	Energy	1.56%	India
Petroleos Mexicanos 5.95% 28/01/2031	Sovereign	1.18%	Mexico
Gohl Capital Ltd., Reg. S 4.25% 24/01/2027	Consumer Discretionary	1.13%	Malaysia

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 15.70%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

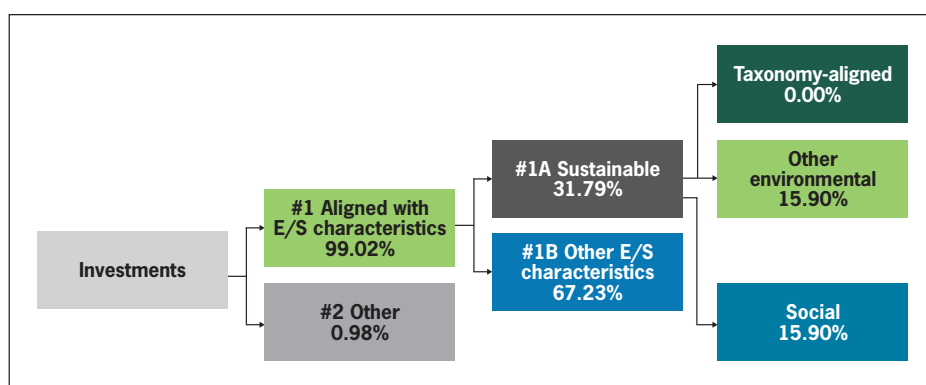

What was the proportion of sustainability-related investments?

99.02% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

31.79% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	27.01%
Sovereign	14.09%
Energy	13.29%
Consumer Discretionary	7.58%
Materials	6.87%
Utilities	6.85%
Consumer Staples	5.18%
Real Estate	5.05%
Communication Services	4.98%
Industrials	4.59%
Health Care	0.49%
Information Technology	0.36%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	22.53%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

15.90% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

15.90% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.98% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Debt Fund

Legal entity identifier: LTF85HOHIJ7QD9N5L226

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.03%

As of year-end, a Fund holding representing 0.03% asset value in a derivative instrument providing indirect exposure to a country that does not satisfy the Fund's social characteristic of excluding investments in the bottom-10% ranked countries on social violations. Given this investment is a derivative instrument, it is classified under the "#2 Other" category, and as such it is not subject to the environmental and social criteria applied to the Fund. Notwithstanding this, the Investment Adviser is disclosing this holding in the spirit of transparency, and in line with the Fund's non-binding aim not to invest in derivatives associated with underlying assets, currencies or interest rates related to countries that would otherwise be subject to the social violations, the Investment Adviser will look to sell the investment as soon as it considers it reasonable to do so, keeping in mind the best interests of the Fund's shareholders.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on an indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 19.29%

Security	Sector	% Assets	Country
Suriname Government Bond, Reg. S 9.25% 26/10/2026	Sovereign	2.03%	Suriname
Petroleos Mexicanos 6.7% 16/02/2032	Supranationals & Agencies	1.80%	Mexico

Serbia Government Bond, Reg. S 1.5% 26/06/2029	Sovereign	0.95%	Serbia

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

97.59% of the Fund’s investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation (“SFDR”).

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereign	50.41%
Supranationals & Agencies	13.43%
Industrials	4.97%
Energy	3.35%
Materials	3.17%
Utilities	3.13%
Consumer Staples	2.99%
Communication Services	2.86%
Financials	1.78%
Real Estate	1.53%
Health Care	0.76%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	11.65%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.41% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. The Fund, nevertheless, did not invest in derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund. Any exceptions have been disclosed under “How did the sustainability indicators perform?” above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected bond issuers on their sovereign governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Domestic Debt Fund

Legal entity identifier: XJIRZ4JB5DNAES39H039

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.00%

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on an indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 50.42%

Security	Sector	% Assets	Country
Brazil Notas do Tesouro Nacional 10% 01/01/2025	Sovereign	7.28%	Brazil
Brazil Government Bond 10% 01/01/2027	Sovereign	5.31%	Brazil
China Government Bond 3.13% 21/11/2029	Sovereign	5.21%	China
South Africa Government Bond 9% 31/01/2040	Sovereign	4.97%	South Africa
South Africa Government Bond 8.75% 31/01/2044	Sovereign	4.91%	South Africa
China Government Bond 2.68% 21/05/2030	Sovereign	4.41%	China
Mexican Bonos 8.5% 31/05/2029	Sovereign	3.72%	Mexico
Mexican Bonos 7.5% 03/06/2027	Sovereign	3.71%	Mexico
Serbia Treasury 4.5% 20/08/2032	Sovereign	2.36%	Serbia
Czech Republic Government Bond 2% 13/10/2033	Sovereign	2.29%	Czech Republic
Indonesia Government Bond 6.5% 15/02/2031	Sovereign	2.24%	Indonesia
Thailand Government Bond 1% 17/06/2027	Sovereign	2.07%	Thailand
Poland Government Bond 2.5% 25/07/2027	Sovereign	1.94%	Poland

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

98.33% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Sovereign	95.12%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.70% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. The Fund, nevertheless, did not invest in derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected bond issuers on their sovereign governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Emerging Markets Fixed Income Opportunities Fund

Legal entity identifier: 549300Y6JEXZ00JBV556

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations	0.00%	0.00%

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on an indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 28.73%

Security	Sector	% Assets	Country
South Africa Government Bond 9% 31/01/2040	Sovereign	4.32%	South Africa
Mexican Bonos 7.5% 03/06/2027	Sovereign	3.26%	Mexico
Peru Bonos De Tesoreria 6.15% 12/08/2032	Sovereign	3.12%	Peru
Indonesia Government Bond 7.125% 15/06/2043	Sovereign	3.02%	Indonesia
Uruguay Government Inflation Linked Bond, FRN 3.875% 02/07/2040	Sovereign	1.92%	Uruguay
Suriname Government Bond, Reg. S 9.25% 26/10/2026	Sovereign	1.78%	Suriname
Serbia Treasury 4.5% 20/08/2032	Sovereign	1.54%	Serbia
Mong Duong Finance Holdings BV, Reg. S 5.125% 07/05/2029	Utilities	1.39%	Vietnam
Egypt Government Bond, Reg. S 8.875% 29/05/2050	Sovereign	1.33%	Egypt
Benin Government Bond, Reg. S 4.95% 22/01/2035	Supranationals & Agencies	1.29%	Benin
Petroleos Mexicanos 6.95% 28/01/2060	Supranationals & Agencies	1.24%	Mexico

Gabon Government Bond, Reg. S 6.625% 06/02/2031	Sovereign	1.12%	Gabon
Dominican Republic Government Bond, Reg. S 9.75% 05/06/2026	Sovereign	1.10%	Dominican Republic
Digicel International Finance Ltd., Reg. S 8.75% 25/05/2024	Communication Services	1.07%	Jamaica

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

93.29% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Sovereign	48.87%
Supranationals & Agencies	6.28%
Industrials	5.66%
Financials	5.16%
Energy	3.38%
Communication Services	3.36%
Materials	3.18%
Utilities	2.89%
Consumer Staples	2.06%
Real Estate	1.44%
Consumer Discretionary	0.80%
Health Care	0.77%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.12%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

- Yes
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

6.71% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. The Fund, nevertheless, did not invest in derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected bond issuers on their sovereign governance practices, as well as on other material sustainability issues related to the Sustainable Development Goals, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Bond Fund

Legal entity identifier: GUL4X2DG7SIORG2PJB64

Reference period: 1 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52.67% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.30%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	52.67%

As of year-end, a Fund holding representing 0.3% asset value did not meet the exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from thermal coal mining and extraction. This occurred after the investment was made, and was due to an increase in coal prices during, as a result of the 2022 global energy crisis, which increased the issuer's revenue from this activity to above 5%, despite no acquisition of new coal assets. The Investment Adviser took action by selling the holding in Q1 2023, within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 25.22%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

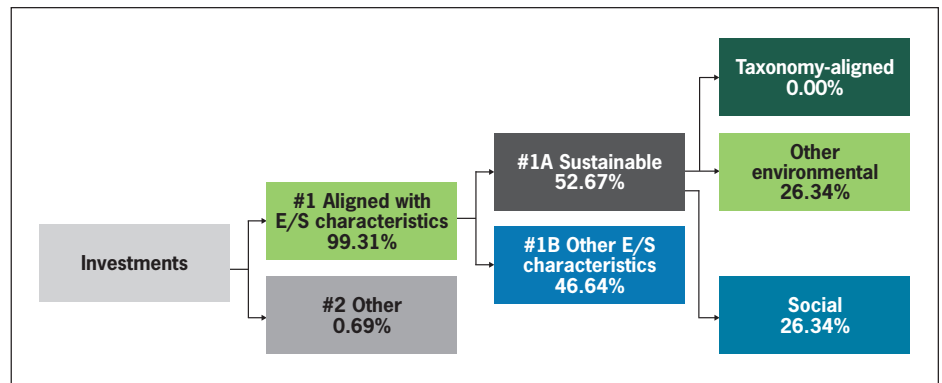

What was the proportion of sustainability-related investments?

99.31% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

52.67% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Supranationals & Agencies	30.55%
Treasuries	18.89%
Securitised	16.85%
Financials	11.34%
Sovereign	10.37%
Energy	1.22%
Real Estate	1.12%
Consumer Staples	0.65%
Communication Services	0.55%
Industrials	0.54%
Utilities	0.44%
Materials	0.42%
Health Care	0.37%
Consumer Discretionary	0.15%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.38%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.34% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

26.34% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.69% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, one of the Fund’s investments did not meet the environmental or social characteristics of the Fund during the reference period and during its period in breach, it was included in the “other” category, since it was not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, “How did the sustainability indicators perform?” for further details.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund’s that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Bond Fund

Legal entity identifier: 28WYH088EMGB02JCXS87

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.32% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were some minor exceptions to the Fund’s attainment of its environmental and social characteristics, which are explained in more detail below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.42%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	50.32%

As of year-end, a Fund holding representing 0.4% asset value did not meet the exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from thermal coal mining and extraction. This occurred after the investment was made, and was due to an increase in coal prices, as a result of the 2022 global energy crisis, which increased the issuer’s revenue from this activity to above 5%, despite no acquisition of new coal assets. The Investment Adviser took action by selling the holding in Q1 2023, within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 13.56%

Security	Sector	% Assets	Country
Lloyds Banking Group plc, Reg. S, FRN 1.75% 07/09/2028	Financials	1.17%	United Kingdom

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

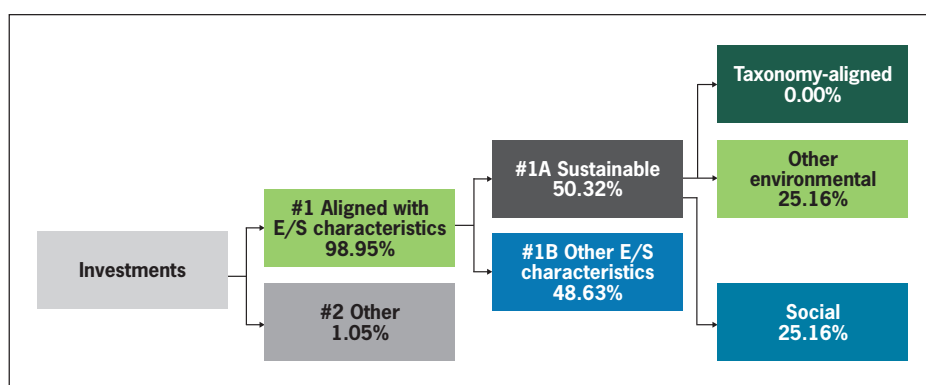

What was the proportion of sustainability-related investments?

98.95% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

50.32% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	41.52%
Supranationals & Agencies	9.41%
Real Estate	8.76%
Utilities	8.27%
Energy	5.53%
Health Care	4.69%
Communication Services	4.56%
Consumer Staples	3.13%
Industrials	2.64%
Materials	2.19%
Consumer Discretionary	1.42%
Information Technology	0.96%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	15.06%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.16% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

25.16% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.05% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, one of the Fund’s investments did not meet the environmental or social characteristics of the Fund during the reference period and during its period in breach, it was included in the “other” category, since it was not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, “How did the sustainability indicators perform?” for further details.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Corporate Bond – Duration Hedged Fund

Legal entity identifier: 549300AEOIVRQNYMMX43

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.65% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were some minor exceptions to the Fund’s attainment of certain environmental and social characteristics, which are explained in more detail below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.55%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	50.65%

As of year-end, a Fund holding representing 0.55% asset value did not meet the exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from thermal coal mining and extraction. This occurred after the investment was made, and was due to an increase in coal prices during, as a result of the 2022 global energy crisis, which increased the issuer’s revenue from this activity to above 5%, despite no acquisition of new coal assets. The Investment Adviser took action by selling the holding in Q1 2023, within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 16.23%

Security	Sector	% Assets	Country
Lloyds Banking Group plc, Reg. S, FRN 1.75% 07/09/2028	Financials	1.96%	United Kingdom
CaixaBank SA, Reg. S, FRN 2.25% 17/04/2030	Financials	1.28%	Spain
NN Group NV, Reg. S, FRN 4.625% 08/04/2044	Financials	1.19%	Netherlands
Upjohn Finance BV, Reg. S 1.362% 23/06/2027	Health Care	1.18%	United States of America
DP World Ltd., Reg. S 2.375% 25/09/2026	Industrials	1.15%	United Arab Emirates
NTPC Ltd., Reg. S 2.75% 01/02/2027	Utilities	1.08%	India
Iberdrola International BV, Reg. S, FRN 1.875% Perpetual	Utilities	1.08%	Spain
Volkswagen International Finance NV, Reg. S 4.125% 16/11/2038	Financials	1.03%	Germany
Intesa Sanpaolo SpA, Reg. S 1.75% 04/07/2029	Financials	1.03%	Italy
ASR Nederland NV, Reg. S, FRN 5% Perpetual	Financials	1.01%	Netherlands
AT&T, Inc. 2.45% 15/03/2035	Communication Services	0.99%	United States of America
NGG Finance plc, Reg. S, FRN 1.625% 05/12/2079	Utilities	0.84%	United Kingdom
State Grid Europe Development 2014 plc, Reg. S 2.45% 26/01/2027	Utilities	0.81%	China
AXA SA, Reg. S, FRN 3.25% 28/05/2049	Financials	0.80%	France
ING Groep NV, Reg. S, FRN 1% 13/11/2030	Financials	0.80%	Netherlands

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

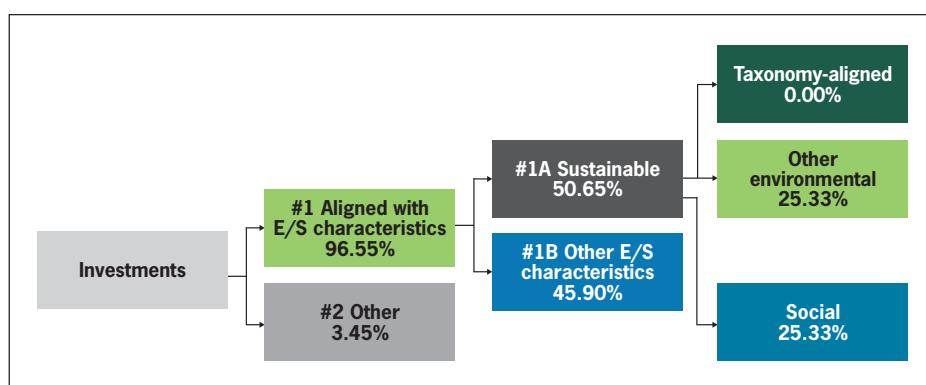

What was the proportion of sustainability-related investments?

96.55% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

50.65% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	40.18%
Utilities	14.97%
Real Estate	10.19%
Energy	6.24%
Communication Services	4.94%
Health Care	4.41%
Industrials	3.71%
Materials	2.92%
Consumer Staples	2.48%
Consumer Discretionary	1.30%
Information Technology	0.66%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	16.87%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

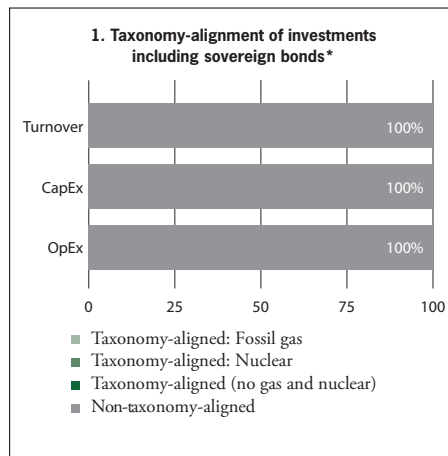

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.33% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

25.33% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.45% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Euro Strategic Bond Fund

Legal entity identifier: WJOVQOXBWMTMJ8MSW75

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.95% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.31%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	43.95%

As of year-end, a Fund holding representing 0.3% asset value did not meet the exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from thermal coal mining and extraction. This occurred after the investment was made, and was due to an increase in coal prices, as a result of the 2022 global energy crisis, which increased the issuer's revenue from this activity to above 5%, despite no acquisition of new coal assets. The Investment Adviser took action by selling

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

the holding in Q1 2023, within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 22.76%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

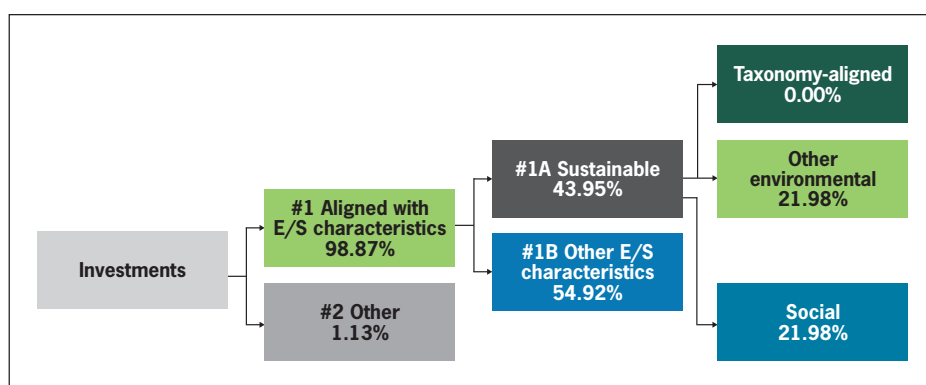

What was the proportion of sustainability-related investments?

98.87% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

43.95% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Treasuries	20.00%
Financials	17.90%
Suprationals & Agencies	16.43%
Sovereign	11.36%
Securitised	10.21%
Utilities	3.71%
Real Estate	2.39%
Communication Services	2.35%
Energy	2.30%
Industrials	2.05%
Consumer Staples	1.91%
Health Care	1.69%
Materials	1.59%
Consumer Discretionary	0.74%
Information Technology	0.52%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.63%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

21.98% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

21.98% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.13% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, one of the Fund’s investments did not meet the environmental or social characteristics of the Fund during the reference period and during its period in breach, it was included in the “other” category, since it was not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, “How did the sustainability indicators perform?” for further details.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European Fixed Income Opportunities Fund

Legal entity identifier: 549300NSROFF1GG4P265

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: ___%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.34% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective: ___%**

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	39.34%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 23.93%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

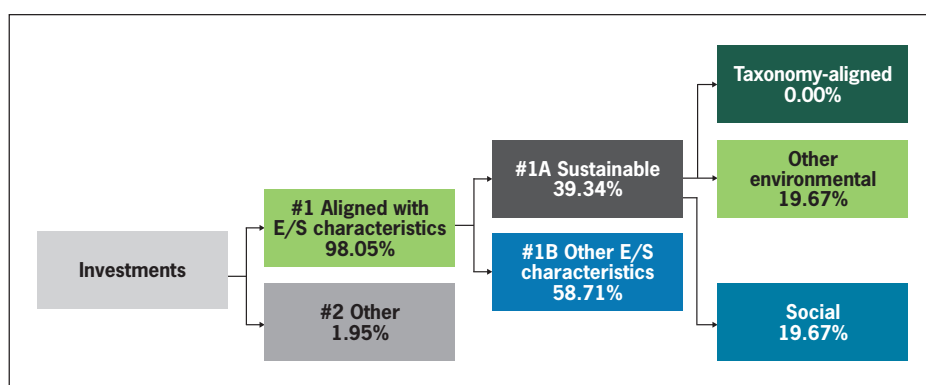

What was the proportion of sustainability-related investments?

98.05% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

39.34% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	31.31%
Treasuries	13.01%
Securitized	11.49%
Utilities	8.68%
Sovereign	5.66%
Mutual Funds	4.57%
Real Estate	3.48%
Communication Services	3.40%
Energy	3.23%
Industrials	2.57%
Consumer Discretionary	2.32%
Materials	2.00%
Health Care	1.95%
Consumer Staples	1.62%
Supranationals & Agencies	0.81%
Information Technology	0.51%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.74%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

19.67% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

19.67% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.95% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: European High Yield Bond Fund

Legal entity identifier: CV1X7ZNWEZI3HOSHCK68

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.73% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	32.73%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Lorca Telecom Bondco SA, Reg. S 4% 18/09/2027	Communication Services	1.94%	Spain

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 20.94%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

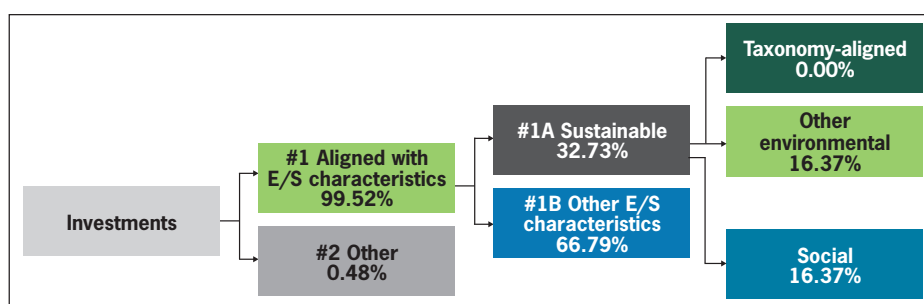

What was the proportion of sustainability-related investments?

99.52% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

32.73% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	20.32%
Communication Services	19.64%
Consumer Discretionary	16.05%
Financials	9.30%
Health Care	7.38%
Materials	6.97%
Utilities	4.88%
Energy	3.57%
Consumer Staples	2.08%
Real Estate	2.07%
Information Technology	1.88%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.92%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.37% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

16.37% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.48% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in excluded countries or activities. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of such the E/S characteristics, temporarily classifying them under the “Other” category, and formulating remediation plans, taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Asset Backed Securities Fund

Legal entity identifier: 5493000D3CS7FYLIY330

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the social characteristic of avoiding investments in securitisations that violate responsible business or lending practices.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Securitisations:		
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impact (“PAI”) indicators.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country
UMBS 4.5% 25/01/2052	Agency Residential Mortgage-Backed Securities	6.42%	United States of America

PRET LLC 'A1', 144A 5.927% 25/06/2052	Non-Agency Residential Mortgage-Backed Securities	0.67%	United States of America
BHMS, FRN, Series 2018-ATLS 'A', 144A 5.125% 15/07/2035	Commercial Mortgage-Backed Securities	0.64%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 24.24%

What was the proportion of sustainability-related investments?

99.74% of the Fund's investments attained the promoted social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes which did not attain the promoted environmental characteristics and were not subject to any minimum environmental or social safeguards.

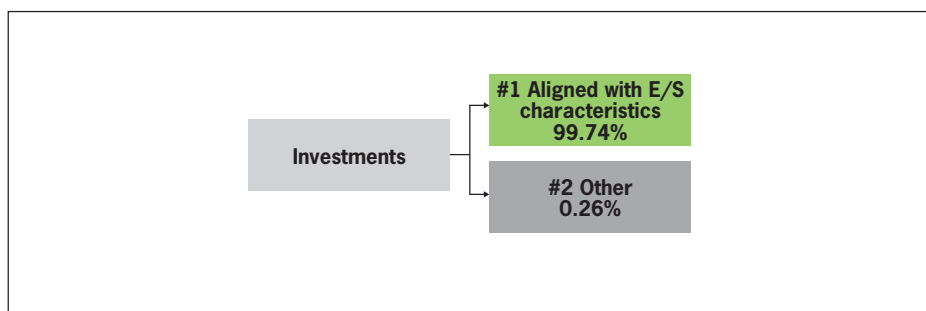

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Non-Agency Residential Mortgage-Backed Securities	38.58%
Agency Residential Mortgage-Backed Securities	26.39%
Asset-Backed Securities	16.79%
Commercial Mortgage-Backed Securities	15.91%
Financials	2.07%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.26% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Bond Fund

Legal entity identifier: XTIK5CR06MPXCNXP7M95

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.42% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	20.00%	23.42%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Italy Buoni Ordinari del Tesoro BOT, Reg. S, FRN, 144A 0.65% 28/10/2027	Treasuries	3.26%	Italy

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 22.04%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

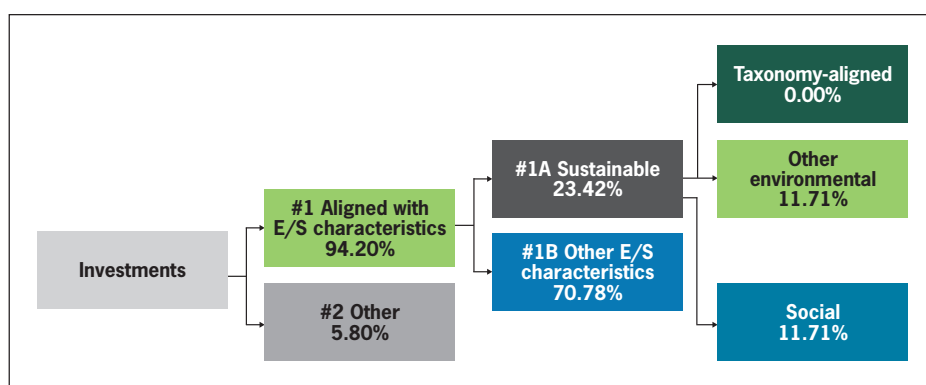

What was the proportion of sustainability-related investments?

94.20% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

23.42% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Treasuries	29.64%
Securitised	14.40%
Financials	12.20%
Supranationals & Agencies	9.52%
Communication Services	3.49%
Energy	3.01%
Industrials	2.04%
Consumer Discretionary	1.99%
Utilities	1.80%
Real Estate	1.71%
Sovereign	1.59%
Information Technology	1.53%
Materials	1.45%
Mutual Funds	0.97%
Health Care	0.90%
Consumer Staples	0.29%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.96%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

11.71% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

11.71% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

5.80% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Convertible Bond Fund

Legal entity identifier: K3YUM7KVVUDP746NXC39

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.01% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	51.01%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Block, Inc. 0.125% 01/03/2025	Information Technology	1.49%	United States of America
Cellnex Telecom SA, Reg. S 0.5% 05/07/2028	Communication Services	1.44%	Spain
America Movil BV, Reg. S 0% 02/03/2024	Communication Services	1.35%	Netherlands

Nippon Steel Corp., Reg. S 0% 05/10/2026	Materials	1.28%	Japan
Akamai Technologies, Inc. 0.125% 01/05/2025	Information Technology	1.26%	United States of America
Ford Motor Co. 0% 15/03/2026	Consumer Discretionary	1.22%	United States of America
Electricite de France SA, Reg. S 0% 14/09/2024	Utilities	1.18%	France
POSCO Holdings, Inc., Reg. S 0% 01/09/2026	Materials	1.14%	South Korea
Abu Dhabi National Oil Co., Reg. S 0.7% 04/06/2024	Energy	1.14%	United Arab Emirates
BioMarin Pharmaceutical, Inc. 0.599% 01/08/2024	Health Care	1.13%	United States of America
Liberty Media Corp., 144A 2.75% 01/12/2049	Communication Services	1.11%	United States of America
Hon Hai Precision Industry Co. Ltd., Reg. S 0% 05/08/2026	Information Technology	1.04%	Taiwan
Burlington Stores, Inc. 2.25% 15/04/2025	Consumer Discretionary	1.03%	United States of America
JPMorgan Chase Bank NA, Reg. S 0% 18/02/2024	Financials	0.99%	United States of America

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 18.09%

What was the proportion of sustainability-related investments?

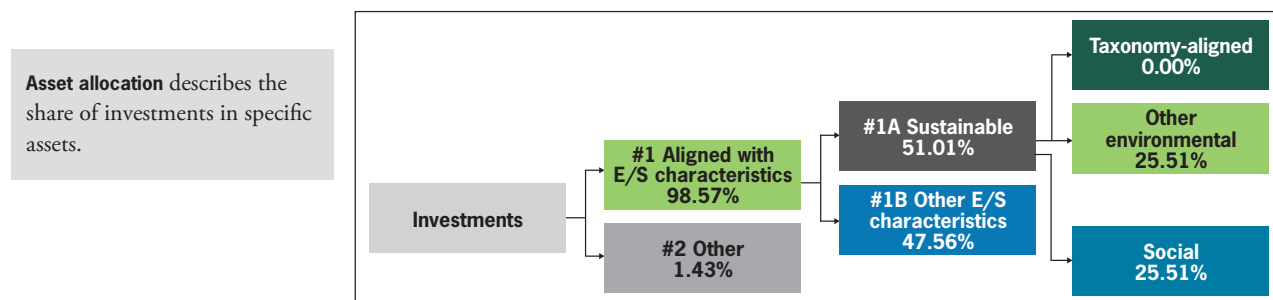

98.57% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

51.01% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	30.57%
Consumer Discretionary	15.61%
Health Care	10.65%
Communication Services	9.16%
Industrials	8.91%
Financials	7.53%
Materials	6.02%
Consumer Staples	3.01%
Utilities	2.63%
Energy	2.56%
Options	1.04%
Real Estate	0.81%
Healthcare	0.52%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

25.51% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

25.51% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.43% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in excluded countries or activities. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of such the E/S characteristics, temporarily classifying them under the “Other” category, and formulating remediation plans, taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Credit Fund

Legal entity identifier: 549300I79HKQYIXDUL59

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.35% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments		
% Fund investments that are sustainable investments	40.00%	57.35%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

“The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 18.65%

Security	Sector	% Assets	Country

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

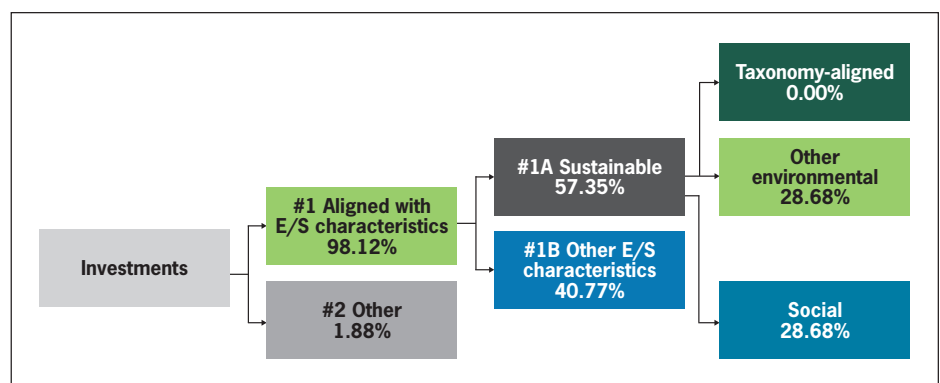

What was the proportion of sustainability-related investments?

98.12% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

57.35% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	46.37%
Utilities	7.88%
Communication Services	6.29%
Real Estate	5.64%
Energy	5.62%
Supranationals & Agencies	4.94%
Industrials	4.57%
Consumer Discretionary	4.13%
Health Care	4.13%
Information Technology	2.89%
Materials	1.95%
Consumer Staples	1.85%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	10.62%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

28.68% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

28.68% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.88% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

This Fund was classified as an Article 9 product under SFDR on 10 March 2021, based on information available at the time of implementation of the regulation. Following several regulatory clarifications on the required level of sustainable investments in a fund’s portfolio to be classified as an Article 9 product, the classification of this Fund was changed from Article 9 to Article 8, effective from 17 November 2022. This change did not entail any material changes in the composition of the Fund.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Fixed Income Opportunities Fund

Legal entity identifier: 549300GM4KLC6LR0TV49

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.15% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	20.00%	22.15%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 13.38%

Security	Sector	% Assets	Country

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

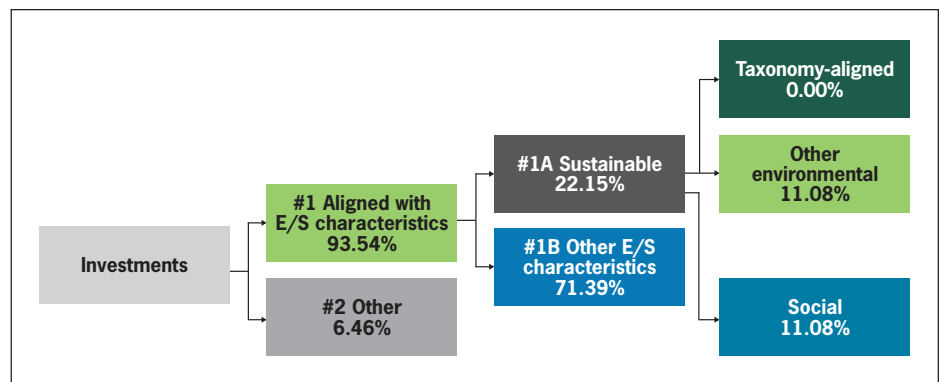

What was the proportion of sustainability-related investments?

93.54% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

22.15% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Securitized	32.69%
Financials	16.07%
Treasuries	9.54%
Consumer Discretionary	4.72%
Energy	4.44%
Materials	4.02%
Communication Services	3.38%
Industrials	3.16%
Utilities	2.89%
Mutual Funds	1.76%
Consumer Staples	1.67%
Health Care	1.61%
Information Technology	1.58%
Real Estate	1.29%
Sovereign	1.27%
Supranationals & Agencies	1.09%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.27%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

11.08% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

11.08% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

6.46% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global High Yield Bond Fund

Legal entity identifier: 549300FVQG82AXROU687

Reference period: 1 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.04% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	24.04%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 10.67%

What were the top investments of this financial product?

Security	Sector	% Assets	Country
EDP - Energias de Portugal SA, Reg. S, FRN 4.496% 30/04/2079	Utilities	1.06%	Portugal
Ford Motor Credit Co. LLC 4.125% 17/08/2027	Financials	1.04%	United States of America

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

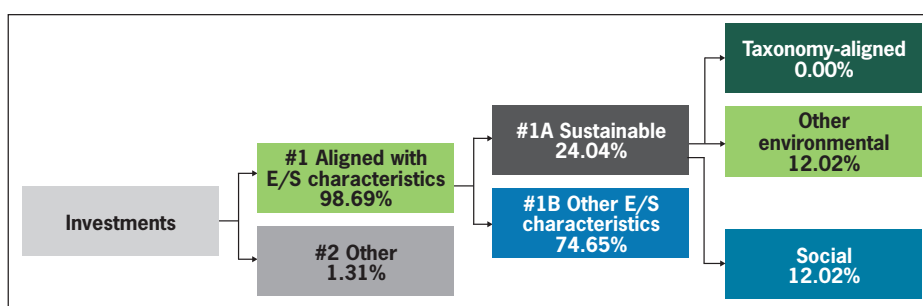

What was the proportion of sustainability-related investments?

98.69% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

24.04% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	20.03%
Consumer Discretionary	19.22%
Communication Services	11.01%
Materials	10.04%
Financials	9.02%
Health Care	8.32%
Energy	7.99%
Consumer Staples	4.66%
Information Technology	2.67%
Utilities	2.24%
Real Estate	2.21%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	10.10%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.02% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

12.02% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

1.31% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in excluded countries or activities. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of such the E/S characteristics, temporarily classifying them under the “Other” category, and formulating remediation plans, taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Short Maturity Euro Bond Fund

Legal entity identifier: IQZY8EWFJYACW1750M88

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.81% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	30.00%	46.81%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Italy Buoni Ordinari del Tesoro BOT, Reg. S, FRN, 144A 1.4% 26/05/2025	Treasuries	4.05%	Italy

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 29.43%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

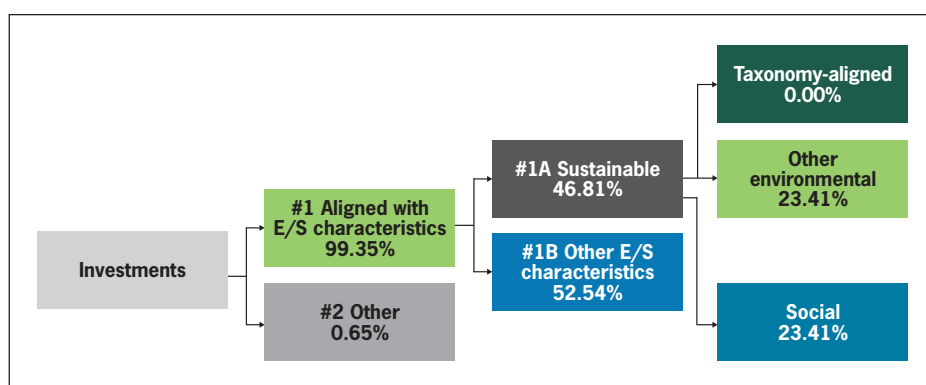

What was the proportion of sustainability-related investments?

99.35% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

46.81% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	24.01%
Treasuries	22.62%
Securitised	17.13%
Supranationals & Agencies	15.15%
Sovereign	6.26%
Real Estate	2.78%
Utilities	2.62%
Industrials	1.75%
Communication Services	1.34%
Health Care	1.25%
Consumer Staples	1.11%
Consumer Discretionary	0.74%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.01%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

23.41% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

23.41% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.65% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Euro Corporate Bond Fund

Legal entity identifier: 549300GCM5BJ69ZMX437

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.30% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Low carbon intensity and net zero target: The Fund promoted the environmental characteristic of climate change mitigation by:
 - Maintaining a lower carbon intensity than the Bloomberg Euro Aggregate Corporate index; and
 - Aiming to achieve net zero emissions at the portfolio-level for corporate investments by 2050, with an interim target to halve the Fund's carbon intensity by year-end 2030, compared to year-end 2020.
- Exclusions: The Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain business activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Best-in-class ESG tilts: The Fund also invested in companies that it considers to be best-in-class on ESG matters, based on relative or absolute proprietary ESG scores calculated by the Investment Adviser, and in doing so, it promoted environmental and social themes such as, but not limited to climate change mitigation, responsible use of natural resources, sustainable waste management, inclusive human capital management and gender equality.
- Sustainable Investments: The Fund made sustainable investments in:
 - Corporate issuers whose business practices, products or solutions, made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs"); or
 - Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Carbon footprint lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity	125.26	63.91
Net zero emissions by 2050 - emissions compared to baseline Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	100.72	63.91
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0.00%	0.00%
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Oil sands extraction (>5% revenue)	0.00%	0.00%
Arctic oil & gas production (>5% revenue)	0.00%	0.43%
Coal-fired power generation (>10% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%
Adult entertainment (>10% revenue)	0.00%	0.00%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0.00%	1.18%
ESG Tilt:		
Corporates - ESG Corporate Score - % Fund Exposure to corporate issuers that fall within the bottom 20% of each corporate sub-sector	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	60.00%	70.30%

As of year-end, a Fund holding representing 0.4% asset value did not meet the exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from Arctic gas production. This occurred after the investment was made, and was due to an expansion in the relevant issuer's Arctic gas production activities to benefit from growing demand and prices for gas as a result of the 2022 global energy crises, which increased the issuer's revenue from this activity to above 5%. The Investment Adviser took action by selling the holding in Q1 2023, within the Investment Adviser's pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Additionally as of year-end, a Fund holding representing 1.2% asset value did not meet the exclusionary criterion of avoiding investing in corporate issuers with evidence of involvement in very severe ESG related controversies. This occurred after the investment was made, and was associated with the escalation of a controversy related to labour rights for one corporate issuer, which is currently under further investigation. The Investment Adviser took action through the sale of the securities, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund. In addition, the Investment Adviser engaged directly with the company to obtain additional clarifications on the issue of concern, and recommended remedial actions.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which do not have any material mis-alignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 15.48%

What was the proportion of sustainability-related investments?

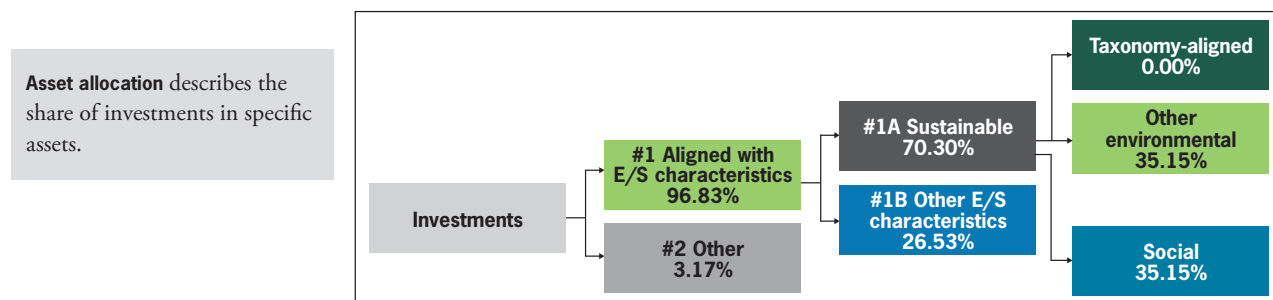

96.83% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

70.30% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	54.09%
Utilities	8.56%
Industrials	7.56%
Real Estate	6.45%
Communication Services	5.96%
Consumer Staples	5.18%
Health Care	3.96%
Energy	3.25%
Consumer Discretionary	1.59%
Materials	0.69%
Information Technology	0.23%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.67%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

35.15% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

35.15% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.17% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, one of the Fund’s investments did not meet the environmental or social characteristics of the Fund during the reference period and during its period in breach, it was included in the “other” category, since it was not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, “How did the sustainability indicators perform?” for further details.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Euro Strategic Bond Fund

Legal entity identifier: 5493001NHR60KNHKPZ06

Reference period: 1 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.09% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Low carbon intensity and net zero target: The Fund promoted the environmental characteristic of climate change mitigation by:
 - Maintaining a lower carbon intensity than the corporate portion of the Bloomberg Euro Aggregate index; and
 - Aiming to achieve net zero emissions at the portfolio-level for corporate investments by 2050, with an interim target to halve the Fund's carbon intensity by year-end 2030, compared to year-end 2020.
- Exclusions: The Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain business activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Best-in-class ESG tilts: The Fund also invested in companies, sovereigns and securitisations that it considers to be best-in-class on ESG matters, based on relative or absolute proprietary ESG scores calculated by the Investment Adviser, and in doing so, it promoted environmental and social themes such as, but not limited to the following:
 - Climate change mitigation, responsible use of natural resources, sustainable waste management, inclusive human capital management, and gender equality, for corporate issuers;
 - Climate change mitigation and adaptation, and human economic welfare standards, for sovereign issuers;
 - Energy efficiency, inclusive and affordable lending, for securitisations.
- Sustainable Investments: The Fund made sustainable investments in:
 - Corporate issuers whose business practices, products or solutions, made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
 - Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
 - Sustainable Bonds, from any type of issuer, which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were some minor exceptions to the Fund's attainment of certain environmental and social characteristics, which are explained in more detail below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Carbon footprint lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	106.02	90.50
Net zero emissions by 2050 - emissions compared to baseline Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	79.92	90.50
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0.00%	0.00%
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Oil sands extraction (>5% revenue)	0.00%	0.00%
Arctic oil & gas production (>5% revenue)	0.00%	0.36%
Coal-fired power generation (>10% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%
Adult entertainment (>10% revenue)	0.00%	0.00%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%
ESG Tilt:		
Corporates - ESG Corporate Score - % Fund Exposure to corporate issuers that fall within the bottom 20% of each corporate sub-sector	0.00%	0.00%
Sovereigns - ESG Sovereign Score (>=2 (1-5, where 5 is best)) - per income group	2.00	2.88
Securitisations - ESG Securitized Score (>=3 (1-5, where 5 is best))	3.00	n/a
Sustainable Investments:		
% Fund investments that are sustainable investments	50.00%	64.09%

As of year-end, a Fund holding representing 0.4% asset value did not meet the exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from Arctic gas production. This occurred after the investment was made, and was an expansion in the relevant issuer's Arctic gas

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

production activities to benefit from growing demand and prices for gas during as a result of the 2022 global energy crises, which increased the issuer's revenue from this activity to above 5%. The Investment Adviser took action by selling the holding in Q1 2023, within the Investment Adviser's pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

In addition, as of year-end, the Fund temporarily deviated from its pathway towards meeting its environmental characteristic of halving its carbon intensity (CO₂e/US\$ million revenue) by 2030, and achieving net-zero emissions by 2050 for corporate investments. While the Fund does not commit to a specific yearly decarbonisation rate, it aims to monitor its progress towards the 2030 interim target on a yearly basis, and its 2022 carbon intensity value (90.50 tons CO₂e./USD million revenue) was higher than the baseline value (79.92 tons CO₂e./USD million revenue). This temporary deviation was, in part, associated with investments in green bonds from corporate issuers with high carbon intensities, but financing projects that support a low carbon transition. The Investment Adviser will aim to rectify this deviation through taking appropriate steps to reducing the Fund's carbon intensity, keeping in mind the circumstances and the best interests of the shareholders of the Fund.

Also, as of year-end, the Fund did not hold any securitised investments, hence the indicators pertaining to securitisations are listed as "n/a".

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which do not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain securities the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom-10% ranked countries on an indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 22.53%

What was the proportion of sustainability-related investments?

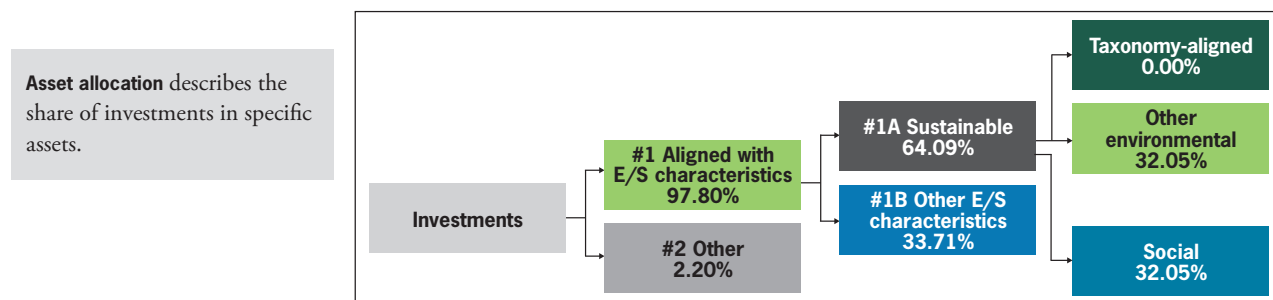

97.80% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

64.09% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	23.80%
Treasuries	21.50%
Supranationals & Agencies	15.25%
Securitized	8.79%
Sovereign	5.38%
Real Estate	4.50%
Utilities	4.30%
Industrials	3.98%
Communication Services	2.55%
Health Care	2.09%
Energy	1.97%
Consumer Discretionary	1.20%
Consumer Staples	0.84%
Information Technology	0.78%
Materials	0.45%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.16%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

32.05% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

32.05% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.20% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

In addition, as stated above, one of the Fund’s investments did not meet the environmental or social characteristics of the Fund during the reference period and during its period in breach, it was included in the “other” category, since it was not aligned with the environmental or social characteristics of the Fund during this period. Please see the answer to the question above, “How did the sustainability indicators perform?” for further details.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans, taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

This Fund was classified as an Article 9 product under SFDR on 10 March 2021, based on information available at the time of implementation of the regulation. Following several regulatory clarifications on the required level of sustainable investments in a fund’s portfolio to be classified as an Article 9 product, the classification of this Fund was changed from Article 9 to Article 8, effective from 17 November 2022. This change did not entail any change in the composition of the Fund nor in the way the Fund was managed.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable Global High Yield Bond Fund

Legal entity identifier: 549300IGC07J6GON2H29

Reference period: 18 November 2022 to 31 December 2022

This Fund was launched on 18 November 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.42% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Low carbon intensity and net zero target: The Fund promoted the environmental characteristic of climate change mitigation by:
 - Maintaining a lower carbon intensity than the corporate portion of the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index; and
 - Progressing towards achieving net zero emissions at the portfolio-level for corporate investments by 2050, with an interim target to halve the Fund's carbon intensity by year-end 2030, compared to March 2022.
- Exclusions: The Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain business activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Best-in-class ESG tilts: The Fund also applied positive screening. Only issuers whose business practices and governance structure were assessed to be consistent with the Calvert Principles for Responsible Investment (the "Calvert Principles") were eligible for inclusion in the Fund's portfolio. In practice, this resulted in a more than 20% reduction in the Fund's investable universe. The Calvert Principles assess investee company activities and behaviors across a number of ESG themes (which are considered on a materiality basis) to construct a portfolio of issuers that Calvert considers to be leaders on ESG matters.
- Sustainable Investments: The Fund made sustainable investments in:
 - Corporate issuers whose business practices, products or solutions, made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs"); and
 - Sustainable Bonds, from any type of issuer, which made a positive environmental or social contribution through their use of proceeds.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Carbon intensity footprint lower than the corporate portion of the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	291.63	178.54
Net zero emissions by 2050 - emissions compared to baseline (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	400.88	178.54
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0%	0.0%
Controversial weapons (>0% revenue)	0%	0.0%
Civilian firearms (>0% revenue)	0%	0.0%
Tobacco manufacturing (>0% revenue)	0%	0.0%
Oil sands extraction (>5% revenue)	0%	0.0%
Arctic oil & gas production (>5% revenue)	0%	0.0%
Coal-fired power generation (>10% revenue)	0%	0.0%
Gambling (>10% revenue)	0%	0.0%
Tobacco retail and distribution (>10% revenue)	0%	0.0%
Adult entertainment (>10% revenue)	0%	0.0%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0%	0.0%
ESG Tilt:		
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90%	95.62%
Calvert Principles (20% investible universe reduction)	20%	22.43%
Sustainable Investments:		
% Fund investments that are sustainable investments	20%	36.42%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser only included issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignments on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

96.48% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

36.42% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	19.44%
Communication Services	15.51%
Consumer Discretionary	14.76%
Health Care	11.44%
Materials	8.93%
Financials	6.51%
Information Technology	5.93%
Consumer Staples	4.20%
Utilities	4.05%
Real Estate	2.68%
Energy	2.03%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.48%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

18.21% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

18.21% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.52% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Sustainable US High Yield Bond Fund

Legal entity identifier: 54930007SWUXWYEHVP32

Reference period: 02 December 2022 to 31 December 2022

This Fund was launched on 02 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.95% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Low carbon intensity and net zero target: The Fund promoted the environmental characteristic of climate change mitigation by:
 - Maintaining a lower carbon intensity than the corporate portion of the ICE BofA U.S. High Yield Index; and
 - Progressing towards achieving net zero emissions at the portfolio-level for corporate investments by 2050, with an interim target to halve the Fund's carbon intensity by year-end 2030, compared to March 2022.
- Exclusions: The Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain business activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Best-in-class ESG tilts: The Fund also applied positive screening. Only issuers whose business practices and governance structure were assessed to be consistent with the Calvert Principles for Responsible Investment (the "Calvert Principles") were eligible for inclusion in the Fund's portfolio. In practice, this resulted in a more than 20% reduction in the Fund's investable universe. The Calvert Principles assess investee company activities and behaviors across a number of ESG themes (which are considered on a materiality basis) to construct a portfolio of issuers that Calvert considers to be leaders on ESG matters.
- Sustainable Investments: The Fund made sustainable investments in:
 - Corporate issuers whose business practices, products or solutions, made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs"); and
 - Sustainable Bonds, from any type of issuer, which made a positive environmental or social contribution through their use of proceeds.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Carbon intensity footprint lower than the corporate portion of the ICE BofA U.S. High Yield Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	313.82	139.85
Net zero emissions by 2050 - emissions compared to baseline (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO ₂ e/US\$ million revenue	452.37	139.85
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue)	0%	0.0%
Controversial weapons (>0% revenue)	0%	0.0%
Civilian firearms (>0% revenue)	0%	0.0%
Tobacco manufacturing (>0% revenue)	0%	0.0%
Oil sands extraction (>5% revenue)	0%	0.0%
Arctic oil & gas production (>5% revenue)	0%	0.0%
Coal-fired power generation (>10% revenue)	0%	0.0%
Gambling (>10% revenue)	0%	0.0%
Tobacco retail and distribution (>10% revenue)	0%	0.0%
Adult entertainment (>10% revenue)	0%	0.0%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0%	0.0%
ESG Tilt:		
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90%	95.89%
Calvert Principles (20% investible universe reduction)	20%	26.3%
Sustainable Investments:		
% Fund investments that are sustainable investments	20%	34.0%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser only included issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignments on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser used an indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Greystar Real Estate Partners LLC, 144A 5.75% 01/12/2025	Real Estate	1.40%	United States of America
Tervita Corp., 144A 11% 01/12/2025	Energy	1.34%	Canada

Clarios Global LP, 144A 8.5% 15/05/2027	Consumer Discretionary	0.85%	United States of America
Sirius XM Radio, Inc., 144A 5% 01/08/2027	Communication Services	0.84%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 15.81%

What was the proportion of sustainability-related investments?

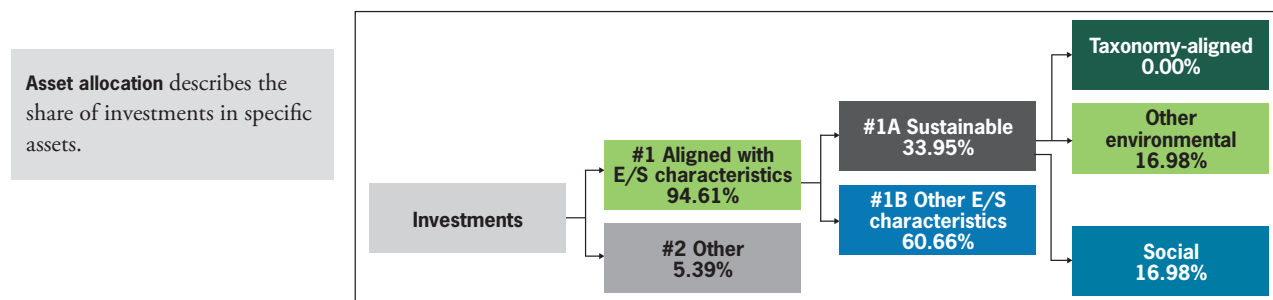

94.61% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

33.95% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	18.34%
Communication Services	14.64%
Industrials	14.50%
Health Care	12.55%
Information Technology	7.89%
Financials	7.28%
Materials	7.14%
Consumer Staples	4.54%
Energy	3.48%
Real Estate	3.38%
Utilities	2.91%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.37%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.98% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

16.98% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

5.39% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar Corporate Bond Fund

Legal entity identifier: 549300A8CL51MXFJCN13

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.85% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	42.85%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level, through the Investment Adviser’s proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Goldman Sachs Group, Inc. (The), FRN 2.615% 22/04/2032	Financials	1.41%	United States of America
Bank of Ireland Group plc, FRN, 144A 2.029% 30/09/2027	Financials	1.13%	Ireland

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 14.61%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

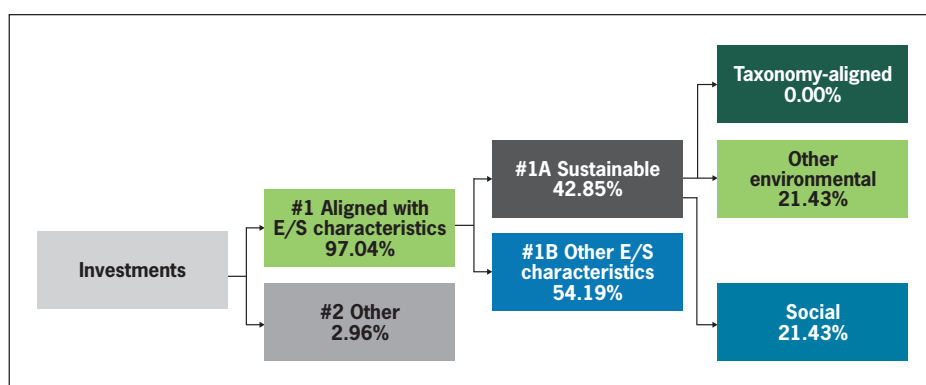

What was the proportion of sustainability-related investments?

97.04% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

42.85% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	36.91%
Utilities	10.40%
Communication Services	8.64%
Energy	7.87%
Consumer Discretionary	6.77%
Information Technology	6.42%
Health Care	4.55%
Industrials	4.45%
Materials	4.22%
Real Estate	3.19%
Consumer Staples	1.64%
Securitized	0.46%
Mutual Funds	0.07%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	19.18%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

21.43% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

21.43% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.96% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar High Yield Bond Fund

Legal entity identifier: 5493001L587BVK8II004

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.96% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	17.96%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 13.64%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the proportion of sustainability-related investments?

97.94% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

17.96% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	23.31%
Industrials	21.49%
Materials	11.54%
Communication Services	8.78%
Health Care	7.29%
Energy	6.84%
Financials	6.22%
Consumer Staples	4.82%
Information Technology	3.14%
Real Estate	1.72%
Utilities	1.55%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	9.45%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.98% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

8.98% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.06% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in excluded countries or activities. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of such the E/S characteristics, temporarily classifying them under the “Other” category, and formulating remediation plans, taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar Short Duration Bond Fund

Legal entity identifier: 5493008B8KBFODOHZX52

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

- | <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No |
|--|---|
| <input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.02% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective |
| <input type="checkbox"/> It made sustainable investments with a social objective : ___% | <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments |

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries for social violations	0.00%	0.00%
Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Consumer protection breach	0.00%	0.00%
Controversies	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	20.00%	52.02%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds (“Sustainable Bonds”), as labelled in the securities’ documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association (“ICMA”)’s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser’s proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.
- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser’s proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country’s positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The “do no significant harm” methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond’s use of proceeds were assessed at the security level. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond’s use of proceeds are still assessed at the issuer level.

The Fund’s PAI assessment was supported, on a qualitative basis, by the Investment Adviser’s engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser’s Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund’s sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Bank of Nova Scotia (The) 5.25% 06/12/2024	Financials	2.00%	Canada
Sumitomo Mitsui Trust Bank Ltd., 144A 0.8% 12/09/2023	Financials	1.89%	Japan

Sumitomo Mitsui Trust Bank Ltd., 144A 0.85% 25/03/2024	Financials	1.16%	Japan

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 22.01%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

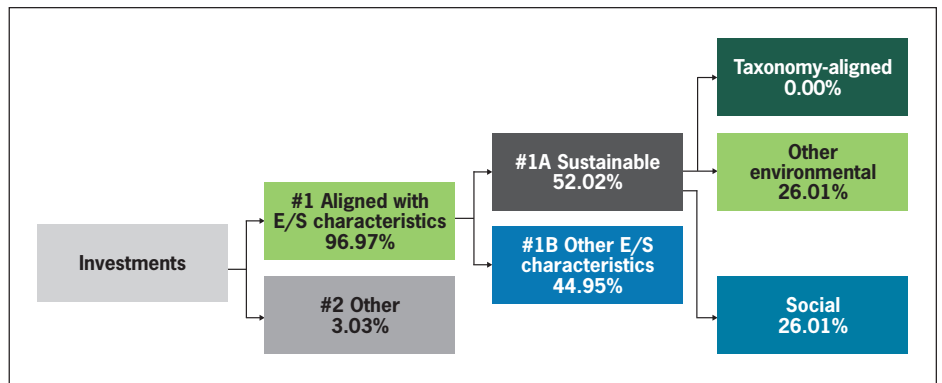

What was the proportion of sustainability-related investments?

96.97% of the Fund’s investments were aligned with the environmental and social characteristics of the Fund.

52.02% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund’s methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in the questions below (“What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?” and “What was the share of socially sustainable investments?”). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund’s investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	50.63%
Securitized	11.74%
Health Care	9.11%
Consumer Discretionary	6.05%
Utilities	4.79%
Industrials	3.78%
Information Technology	2.61%
Communication Services	2.13%
Materials	2.03%
Energy	1.54%
Consumer Staples	1.51%
Real Estate	0.57%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.62%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

26.01% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

26.01% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

3.03% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in countries or activities that should be excluded by the Fund’s characteristics. The Investment Adviser also monitored any existing holdings in the Fund that did not meet its E or S characteristics, and took appropriate steps (such as temporarily classifying them under the “Other” category, and formulating remediation plans), taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: US Dollar Short Duration High Yield Bond Fund

Legal entity identifier: 549300ZADDUDEM9Q8605

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.33% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, “How did the sustainability indicators perform?”).

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations’ Sustainable Development Goals (“SDGs”); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	15.33%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.
- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Principal adverse impacts

(PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments excluded issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors taken into account?”

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund’s exclusionary criteria, as follows:

- The Fund excluded issuers which derived any revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
Ford Motor Credit Co. LLC 4.125% 17/08/2027	Financials	1.51%	United States of America
Hadrian Merger Sub, Inc., 144A 8.5% 01/05/2026	Health Care	1.18%	United States of America

Alta Equipment Group, Inc., 144A 5.625% 15/04/2026	Industrials	0.98%	United States of America
Nathan’s Famous, Inc., 144A 6.625% 01/11/2025	Consumer Discretionary	0.95%	United States of America

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 16.43%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

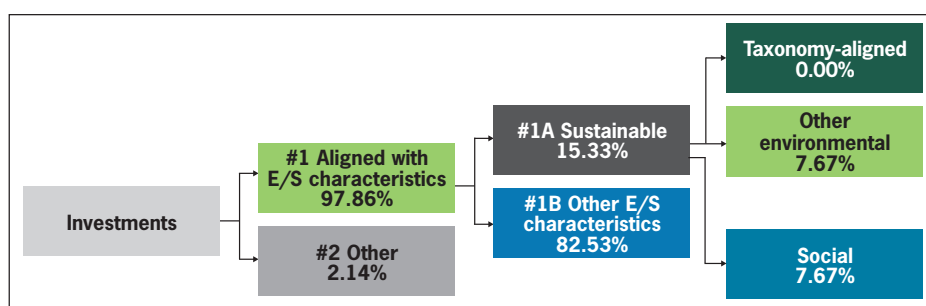

What was the proportion of sustainability-related investments?

97.86% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

15.33% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sustainable investments into environmental and social categories in the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	19.60%
Energy	15.94%
Consumer Discretionary	15.19%
Financials	12.05%
Health Care	8.57%
Communication Services	7.59%
Materials	7.44%
Real Estate	4.40%
Consumer Staples	3.55%
Utilities	1.82%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	16.92%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

7.67% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

What was the share of socially sustainable investments?

7.67% of the Fund’s investments were sustainable investments with a social objective during the reference period. As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective and does not seek to prioritise one over the other in its investment process. Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund’s sustainable investments into environmental and social categories in this question.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

2.14% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund’s environmental and social characteristics, to avoid any new investments in excluded countries or activities. The Investment Adviser also monitored any existing holdings in the Fund that were in breach of such the E/S characteristics, temporarily classifying them under the “Other” category, and formulating remediation plans, taking into consideration the best interest of the Fund’s shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund’s holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund’s PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund’s portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund’s portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Balanced Fund

Legal entity identifier: 5493001XMV1F05VL2L46

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the implementation of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.
- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund’s investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser’s credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser’s views on the credit quality of those sovereigns.

Credit

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which have caused severe environmental harm where appropriate remedial action has not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.

There were no exceptions to the Fund’s attainment of its environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal Coal Mining (>5% revenue)	0.00%	0.00%
oil Sands Extraction (>5% revenue)	0.00%	0.00%
manufacturing or production of controversial weapons	0.00%	0.00%
manufacturing of civilian firearms	0.00%	0.00%
tobacco (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds:		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt:		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure:		
(1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and		
(2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.69	7.64
Europe (Reference Index MSCI Europe)	7.88	8.73
Japan Basket (Reference Index MSCI Japan)	7.09	7.99
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.41	6.22
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.65	6.12
Total ESG Score of the MSCI ACWI index and that of the Fund:	6.20	7.71
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.10	6.26
Europe (Reference Index MSCI Europe)	5.93	6.25
Japan Basket (Reference Index MSCI Japan)	6.06	6.37
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.91	6.14

Appendix 9: Sustainable Finance Disclosure (unaudited)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.98	6.16
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	5.54	6.27
Government Bonds:		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, [with regard to the GBaR Government ESG score] (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score] of the benchmark and that of the Fund [(after the credit overlay had been applied) were:	5.87	5.90

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document include these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics:

- PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies):** The Fund considered PAI indicators numbers 1-3 regarding GHG emissions in part through its direct equity and corporate credit investments. The Fund considered these indicators because it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).
- PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities and corporate credit because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.
- PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities and corporate credit because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.
- PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.
- PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What were the top investments of this financial product?

Security	Sector	% Assets	Country
US Treasury 2.625% 15/02/2029	Government Bond	9.27%	United States of America
US Treasury 1.625% 15/05/2026	Government Bond	8.61%	United States of America

Morgan Stanley Investment Funds Emerging Markets Corporate Debt Fund - Class N	Collective Investment Scheme - UCITS	1.02%	Luxembourg
Xtrackers MSCI USA Health Care Fund	Exchange Traded Fund	0.99%	Germany
Mexican Bonos 8% 07/12/2023	Government Bond	0.98%	Mexico

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 46.05%

What was the proportion of sustainability-related investments?

63.96% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The relevant environmental and social characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the environmental and social characteristics of the Fund were made up of:

- 31.2% equity investments
- 24.4% investments in government bonds
- 8.3% investments in corporate credit

The ESG tilt of the equity investments was applied at the level of the five regional baskets and the portfolio of equity investments, and not at the level of individual holdings. Some investee companies may therefore have had an ESG score or Low Carbon Transition score lower than the average for the regional basket or for the whole portfolio of equity investments. Similarly, the carbon budget of the equity investments was applied at the portfolio level of all the equity investments (and not at the level of the individual holdings, which may on an individual basis have had higher carbon emissions than the average for all the equity investments).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Government Bond	43.38%
Equity & Corporate Bond	39.06%
Communication Services	2.93%
Consumer Discretionary	4.33%
Consumer Staples	3.04%
Energy	1.50%
Financials	8.31%
Health Care	4.18%
Industrials	4.10%
Information Technology	5.68%
Materials	1.58%
Real Estate	1.53%
Utilities	1.88%
Exchange Traded Fund	9.80%
Collective Investment Scheme - UCITS	1.02%
Credit Default Swap Contract	-0.03%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.00%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any companies that derive 5% or more of their revenues from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund's investments which promoted environmental characteristics have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

36.04% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as promoting environmental or social characteristics, (iv) any other investments which did not promote environmental or social characteristics (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Advisor carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. The Investment Advisor regularly engaged with the companies in which it invested and exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Advisor the opportunity to guide companies in which it invests towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Advisor's stewardship objectives are tied to E/S related outcomes that include amongst others:

- enhanced disclosure of sustainability related information;
- securing and encouraging improved management of material sustainability related risks and opportunities; and
- improving and enhancing the Investment Advisor's own understanding of sustainability related risks in the Fund.

The Investment Advisor voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Advisor is in no way obligated to follow such recommendations.

For more information on the Investment Advisor's engagement and voting with reference to the Fund please see the Stewardship Report.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Balanced Sustainable Fund

Legal entity identifier: 549300UMQ7ETEXI51419

Reference period: 01 January 2022 to 31 December 2022

Unless stated otherwise, the values below have been calculated based on the Fund's investments as of 30 December 2022

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: ___%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.76% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- **Exclusions:** The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question “How did the sustainability indicators perform?”.
- **ESG tilt:** the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.
- **Carbon budget:** The Fund promoted the environmental characteristic of reducing carbon emissions, by applying a carbon budget to all equity securities in the Fund’s portfolio every year. This carbon budget characteristic applied to investments in equity securities made directly by the Fund, but did not apply to equity securities held by the fund indirectly through investments in exchange-traded funds (ETFs) or other types of fund.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through : (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund’s investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser’s credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser’s views on the credit quality of those sovereigns.

Credit

- **Exposure to ESG CDS:** The Fund sold credit protection under index credit default swaps (“CDS”) in order to gain exposure to corporate credit. The Fund gained this exposure through one ESG-aligned CDS, which referenced the iTraxx MSCI ESG Screened Europe Index. Exposure to this index meant that the Fund’s credit exposure was targeted towards issuers that exhibit stronger performance with respect to management of ESG risks, as the index is screened by MSCI to exclude issuers with exposure to certain activities that have the potential to be harmful to human health and wellbeing, that have been subject to ESG controversies, or that have an MSCI ESG rating of BBB and below.

Solution providers

- The Fund promoted the characteristic of contributing to a number of social and environmental themes, by allocating a minimum percentage of investments to products offered by solution providers (i.e., external fund managers) who invested in businesses and activities that provided solutions across a number of social and environmental themes. The selection process examined the manager’s target themes, investment philosophy, investment process and (for solution

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

providers which invest in equities) the weighted average revenue-alignment of the manager's funds to environmental and social themes.

Sustainable investments

- The Fund made a certain number of sustainable investments, as explained in response to the question, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
oil Sands Extraction (>5% revenue)	0.00%	0.00%
controversial weapons	0.00%	0.00%
civilian firearms	0.00%	0.00%
tobacco (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds:		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt:		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure:		
(1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and		
(2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.69	7.63
Europe (Reference Index MSCI Europe)	7.88	8.74
Japan Basket (Reference Index MSCI Japan)	7.09	8.04
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.41	6.35

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.65	6.28
Total ESG Score of the MSCI ACWI index and that of the Fund:	6.20	7.79
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.10	6.31
Europe (Reference Index MSCI Europe)	5.93	6.26
Japan Basket (Reference Index MSCI Japan)	6.06	6.40
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.91	6.18
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.98	6.22
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	5.54	6.30
Government Bonds:		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The MSCI ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	5.87	5.97
Equity Investments Carbon Budget:		
The Investment Adviser aimed to ensure that the equity securities in each regional basket reduced their weighted average carbon intensity (total scope 1 and 2 GHG emissions/ EVIC) each year by 7%, as compared to the basket for that region for the previous year.		
The carbon intensity of each regional basket for the year 2021, and the % reduction over the reference period were:		
US Basket (Reference Index S&P 500)	25.13	19%
Europe (Reference Index MSCI Europe)	39.76	14%
Japan Basket (Reference Index MSCI Japan)	36.06	21%
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	76.54	19%
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	59.31	17%
Credit:		
Number of ESG CDS (which referenced the iTraxx MSCI ESG Screened Europe Index) which the Investment Adviser committed to have exposure to, and actual number it had exposure to:	1.00	1.00

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value
Solution Providers:		
% of investments in products offered by solution providers who invest in businesses and activities that sought to provide solutions across a number of ESG themes:	5.00%	9.00%
Sustainable Investments		
% of Fund investments that were sustainable investments:	30.00%	41.76%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Fund (which consisted of directly held equity investments, government bonds or investments made indirectly through solution providers) fell within one of the below categories:

- i. Equity investments which demonstrated a positive environmental or social contribution via revenue alignment. The Fund used a combination of data sources (including MSCI Sustainable Impact Metrics data and ISS alignment data) to determine if more than 20% of the revenue of the sustainable investment aligned with any of the ISS SDG or MSCI impact themes;
- ii. Equity investments which demonstrated operational contribution to environmental themes (for example, by key resource efficiency indicators on the use of energy, or on the production of waste & greenhouse gas emissions) or social themes (for example, labour relations, community relations or investment in human capital). An investment met this test if:
 - a. it had an environmental ESG pillar score, as defined by MSCI, which was within the range of environmental ESG pillar scores of the top 10 percentile of MSCI ACWI, provided that its social pillar score was not within the range of the pillar scores of the bottom 10 percentile of MSCI ACWI; or
 - b. it had a social ESG pillar score, as defined by MSCI, which was within the range of social ESG score of the top 10 percentile of MSCI ACWI, provided that its environmental pillar scores were not within the range of the pillar scores of the bottom 10 percentile of MSCI ACWI.
 - c. Additionally, a security was not deemed to be operationally contributing to climate change or social themes if the environmental or social pillar score which was in the top 10 percentile of MSCI ACWI was deemed “not material” to the security by MSCI. MSCI deems environmental or social pillars as “not material” to the company if the company has limited effect on the environmental or social themes.
- iii. sovereign bonds with a Government ESG Rating A or above, as determined by the MSCI ESG Government Rating.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Where the Fund invested via solution providers (i.e., external fund managers), all of the underlying investee companies fulfilled either:

- a) the 20% revenue alignment threshold described in (i) above; or
- b) criteria (ii) above by, demonstrating operational contribution to environmental themes or social themes.

Only those underlying investee companies which satisfied the tests described above were treated as constituting sustainable investments on a look-through basis and contributing towards the proportion of the Fund's assets allocated towards sustainable investments.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a “do no significant harm” methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact (“PAI”) indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation (“SFDR”) rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser excluded from the sustainable investments of the Fund, investments that caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules, and which were relevant to the investment. The Investment Adviser has determined specific thresholds for significant harm based on third-party data. PAI indicators:

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third-party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser excluded from the sustainable investments of the Fund, any issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third-party data.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Regulation requires that this document includes these statements. However, for the avoidance of doubt, this Fund has not and does not take into account the EU criteria for environmentally sustainable economic activities in the EU Taxonomy.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainable investments of the Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment, by screening out investments which did not meet certain thresholds set by the Investment Adviser for each of the mandatory indicators, as described above in response to the question, “How were the indicators for adverse impacts on sustainability factors been taken into account?”.

The equity investments of the Fund (including the portion that was not comprised of sustainable investments) considered the following PAI indicators through the application of the Fund’s binding environmental or social characteristics (as described elsewhere in this document):

PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies): The Fund considered these indicators because:

- it ensured that each regional basket of equity investments reduced its weighted average Scope 1 and 2 carbon emissions/EVIC by 7% each year as compared against the basket for that region for the previous year and
- it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score is designed to identify potential leaders and laggards by measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition and assesses carbon intensity of each of the equity securities. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

- PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.
- PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.
- PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.
- PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 50.42%

What was the proportion of sustainability-related investments?

74.30% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

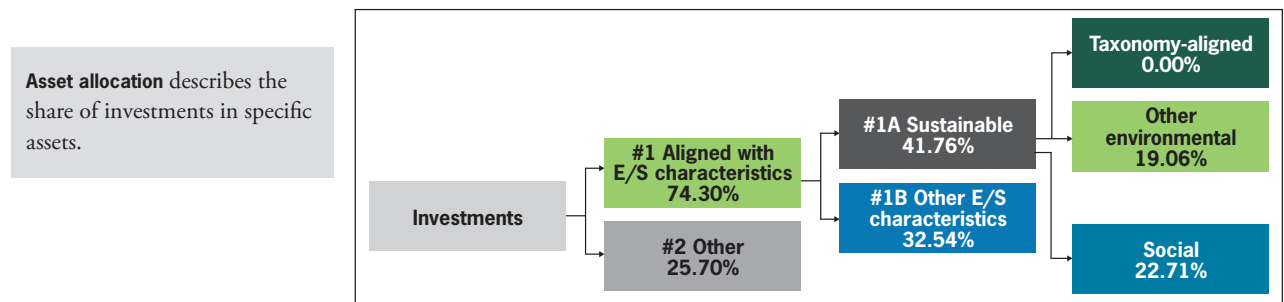

41.76% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category, as described below, in response to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?"

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The relevant E/S characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the E/S characteristics of the Fund were made up of:

- 31.2% equity investments
- 25.8% investments in government bonds
- 9.3% investments in solution providers (i.e., external fund managers)
- 8.1% investments in ESG aligned CDS

The ESG tilt of the portfolio was applied at the level of the five regional baskets and the portfolio as a whole, and not at the level of individual holdings.

Equity investments classified as sustainable investments

The Fund's methodology for categorising equity investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not seek to prioritise one over the other in its investment process and presents the breakdown for SFDR reporting purposes only.

Sovereign investments classified as sustainable investments

The Fund's methodology for categorising sovereign investments as sustainable investments considers both environmental and social factors (as relevant) and as set out above, the Fund does not categorise its sovereign sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sovereign sustainable investments into environmental and social categories in this question and the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Government Bond	52.17%
Equity & Corporate Bond	31.20%
Communication Services	2.38%
Consumer Discretionary	3.99%
Consumer Staples	2.92%
Energy	1.33%
Financials	4.64%
Health Care	4.21%
Industrials	3.73%
Information Technology	5.27%
Materials	1.32%
Real Estate	0.85%
Utilities	0.56%
Collective Investment Scheme - UCITS	7.39%
Exchange Traded Fund	1.95%
Credit Default Swap Contract	0.09%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.60%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any company that derives 5% or more of its revenue from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. Additionally, the Fund applies a carbon budget to its equity investments which may underweight certain sectors such as those involved in fossil fuels. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Investment Adviser did not take account of the EU Taxonomy in its management of the Fund. None of the Fund’s sustainable investments with an environmental objective have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

To comply with the EU Taxonomy the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

¹ Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

*Sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

19.06% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund does not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective. Solely for SFDR reporting purposes, the Investment Adviser has divided the proportion of the Fund’s sustainable investments into environmental and social categories, as per the methodology set out above.

What was the share of socially sustainable investments?

22.71% of the Fund’s investments were sustainable investments with a social objective during the reference period.

As noted above in response to the question “What was the asset allocation?”, the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective. Solely for SFDR reporting purposes, the Investment Adviser has divided the proportion of the Fund’s sustainable investments into environmental and social categories, as per the methodology set out above.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2022 (continued)

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

25.70% of the Fund’s investments were not aligned with the environmental or social characteristics of the Fund and have been included in the “other” category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as sustainable investments or if they promoted environmental or social characteristics, (iv) any other investments which neither promoted environmental or social characteristics, nor qualified as sustainable investments (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

The Investment Advisor carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. The Investment Advisor regularly engaged with the companies in which it invested and exercised proxy voting and other rights as shareholders with the Fund’s environmental and social characteristics in mind. These activities gave the Investment Advisor the opportunity to guide companies in which it invested towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Advisor’s stewardship objectives are tied to E/S related outcomes that include amongst others:

- enhanced disclosure of sustainability related information;
- securing and encouraging improved management of material sustainability related risks and opportunities; and
- improving and enhancing the Investment Advisor’s own understanding of sustainability related risks in the Fund.

The Investment Advisor voted by proxy in a prudent and diligent manner, based on MSIM’s proxy voting policies and in the best interests of the Fund’s clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Adviser is in no way obligated to follow such recommendations.

For more information on the Investment Advisor’s engagement and voting with reference to the Fund please see the Stewardship Report.

This Fund was classified as an Article 9 product under SFDR on 10 March 2021, based on information available at the time of implementation of the regulation. Following several regulatory clarifications on the required level of sustainable investments in a fund’s portfolio to be classified as an Article 9 product, the classification of this Fund was changed from Article 9 to Article 8, effective from 17 November 2022. This change did not entail any change in the composition of the Fund nor in the way the Fund was managed.

As at 31 December 2022 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third-party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

Article 6 Funds

The following Funds have been categorised as Article 6 financial products for the purposes of the Sustainable Finance Disclosure Regulation. For the purpose of the Taxonomy Regulation, it should be noted that the investments underlying the Funds do not take into account the EU criteria for environmentally sustainable economic activities.

EQUITY FUNDS

China A-shares Fund
China Equity Fund
Global Core Equity Fund
International Equity (ex US) Fund
