Allianz Global Investors Fund - Allianz China A-Shares Share Class RT (H2-EUR)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU1997245417
WKN: A2PK1B

Objectives and Investment Policy

Long-term capital growth by investing in China A-Shares Equity Markets of the PRC in accordance with E/S characteristics.

Sub-Fund assets are invested in accordance with E/S characteristics. Min. 70% of Sub-Fund assets are invested in China A-Shares as described in the investment objective. Max. 20% of Sub-Fund asset may be invested in Equities of the PRC markets other than China A-Shares market (e.g. China B-Shares and China H-Shares). Max. 10% of Sub-Fund assets may be invested in Equities which are not traded and/or listed in the PRC. Sub-Fund assets may be invested in Emerging Markets. Max. 69% of Sub-Fund assets may be invested via RQFII. Max. 10% of Sub-Fund assets may be invested in closed-end funds listed on the Shanghai Stock Exchange or Shenzhen Stock Exchange. Max. 25% of Sub-Fund assets may be held directly in time deposits and/or (up to 20% of Sub-Fund assets) in deposits at sight and/or may be invested in Money-Market Instruments and/or in Debt Securities and/or (up to 10% of Sub-Fund assets) in money market funds for liquidity management. Max. 10% of Sub-Fund assets may be invested in UCITS and/or UCI. All bonds and money market instruments must have at the time of acquisition a rating of at least B- or a comparable rating from a recognised rating agency. Sub-Fund classifies as "equity-fund" according to German Investment Tax Act (GITA).

The Sub-Fund promotes environmental and social characteristics (E/S characteristics) by measuring an issuer's resilience to long-term risks across the three pillars of Environment, Social and Governance. Only issuers and instruments where the Investment Manager receives ESG Ratings are used to calculate the performance of ESG characteristics of the Sub-Fund. Based on this, the Investment Manager selects and weights - with simultaneous application of certain minimum exclusion criteria for direct investments - issuers from the remaining investment universe so that the Sub-Fund's average ESG Rating is

better than the average ESG Rating of the Sub-Fund's Benchmark. Sub-Fund's pre-contractual template describes all relevant information about the E/S characteristics' scope, details, and requirements and applied exclusion criteria.

Min. 80% of Sub-Fund's portfolio shall be evaluated by ESG Ratings. The basis for the calculation of the 80% threshold is the Sub-Fund's net asset value except instruments for which ESG Ratings are not available by nature (e.g., cash, deposits and derivatives). Min. 5.00% of Sub-Fund assets will be invested in Sustainable Investments.

We manage this Sub-Fund in reference to a Benchmark. Sub-Fund's Benchmark plays a role for the Sub-Fund's performance objectives and measures. We follow an active management approach with the aim to outperform the Benchmark. Although our deviation from the investment universe, weightings and risk characteristics of the Benchmark is likely to be material in our own discretion, the majority of the Sub-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

Exposure to the base currency of the Fund (USD) will be hedged to a large extent against the reference currency of the shareclass (EUR) which reduces the potential risks and limits potential gains from exchange rate movements.

Benchmark: MSCI China A Onshore Total Return Net (hedged into EUR).

You may redeem shares of the Fund usually on each business day.

We reinvest income generated into the Fund.

Recommended Holding Period: 5 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the Fund.

The categorisation of the Fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

Why is the Fund in this category?

Funds of category 6 have shown in the past a high volatility. The volatility describes how much the value of the Fund went up and down in the past. The units of a Fund of category 6 might be subject to high price fluctuations based on historical volatilities.

The following material risks are not fully captured by the risk and reward

indicator:

The Fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the Fund price may fall.

A significant portion of the Fund may be invested in emerging market assets. Emerging markets generally carry greater political, legal, counterparty and operational risk. In exceptional circumstances the Fund may encounter difficulties when buying and selling these investments.

Due to the fact that the Fund may invest into the China A-Shares market via both, Shanghai-Hong Kong Stock Connect and/or Shenzhen-Hong Kong Stock Connect, various additional risks which include but are not limited to regulatory risks and suspension risks may thereby be caused and should be emphasised to the general investment and equity related risks.
