What is this product?

Type

This product is a share of an investment company qualifying as an undertaking for collective investment in transferable securities (UCITS).

Term

This sub-fund has no maturity date. However, the manufacturer may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund aims to preserve the shareholder's capital while achieving long-term capital growth and best risk adjusted returns by implementing an investment strategy consisting in a direct and/or indirect long exposure to financial markets. The sub-fund also aims to minimize the volatility of its portfolio.

Based on the management company's expectations of the evolution of the economic and market conditions, the sub-fund flexibly and dynamically invests in equities (up to 100% of the net assets but emerging market exposure is limited to 25% of the net assets), bonds (up to 100% of the net assets but investments in unrated bonds and/or in bonds with a rating below investment grade is limited to 20% of the net assets and investments in convertible bonds is limited to 10% of the net assets), money market instruments (up to 25% of the net assets), investment funds and exchange traded funds (up to 100% of the net assets), exchange traded notes and/or exchange traded commodities (up to 20% of the net assets) with no restriction in terms of sector. The percentage of the portfolio invested in these different instruments may vary depending on the valuation of the various asset classes ("bottom-up approach") and the market situation based on fundamental analysis of the global macroeconomic environment and of its indicators (e.g., growth, inflation, public deficits, etc.) ("top down approach"). The sub-fund's portfolio may be positioned defensively if the management company expects the financial markets to evolve negatively.

The sub-fund mainly invests in securities denominated in euro (EUR), US dollars (USD), Swiss francs (CHF), Danish krone (DKK), Swedish krona (SEK) and/or in pounds sterling (GBP).

The sub-fund may use all types of financial derivative instruments for hedging and investment purposes.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

Intended retail investor

This product is designed for investors who are willing to achieve income and capital growth and have a medium to long term horizon. The investor can bear losses up to the invested amount. This product is appropriate for investors with a basic to advanced knowledge and experience of the product and the global equity markets.

Other information

Depositary: Banque de Luxembourg

Dividend income: This class is a capitalisation class meaning that income is reinvested.

Conversion right: The investor has the right to convert his investment in shares in one sub-fund for shares in the same sub-fund or in another sub-fund. The investor can obtain information about how to convert in the prospectus of the fund.

Segregation: The assets and liabilities of a sub-fund are segregated pursuant to the law so that the commitments and liabilities of one sub-fund do not affect the other sub-funds.

Additional information: Additional information about the fund, copies of its prospectus, the latest annual and semi-annual report and the latest prices of shares may be obtained free of charge from the management company or on www.ecp.lu. The prospectus and the periodic reports are prepared for the entire fund and are available in English. The management company may inform you about other languages in which these documents are available.

This sub-fund was launched in 2021 and this share class in 2022.

The currency of the share class is expressed in EUR.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Concentration risk. Other risk factors might exist.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period: 5 years

Example investment: 10,000 EUR

		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	1,400 EUR	1,440 EUR
	Average return each year	-86.0 %	-32.2 %
Unfavourable	What you might get back after costs	8,920 EUR	10,760 EUR
	Average return each year	-10.8 %	1.5 %
Moderate	What you might get back after costs	10,680 EUR	16,410 EUR
	Average return each year	6.8 %	10.4 %
Favourable	What you might get back after costs	14,090 EUR	19,050 EUR
	Average return each year	40.9 %	13.8 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment be-

tween May 2022 and December 2023.

Moderate scenario: This type of scenario occurred for an investment between January 2018 and January 2023, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between December 2018 and December 2023, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if STRATEGIC SELECTION FUND is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	439 EUR	2,223 EUR
Annual cost impact (*)	4.4 %	2.8 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.3% before costs and 10.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount. These figures include the maximum distribution fee that the person selling you the product may charge (0.0% of amount invested / 3 EUR). This person will inform you of the actual distribution fee.
